ADDENDUM NO. 2

Issued: October 25, 2016

Project: Joplin Early Childhood Center
Site Legal Description:
JOP MISC
BEG 1360.93' S & 50' E NW
COR SE E 456.91' N 318.78'
W 456.91' S 318.78' TO POB

Project No. 16054

Owner: Joplin Schools
310 West 8th Street
Joplin, MO 64801

Bidding Documents Issued: September 30, 2016

This Addendum includes these 13 pages and the following attachments:

Project Manual:
Re-issued Section 000110 "Table of Contents" consisting of 6 pages
Section 008100 – Prevailing Wage Determination modification sheets consisting of 6 pages.
New Section 072419 "Exterior Insulation and Finish System (EIFS)" consisting of 8 pages.
Re-issued Section 087100 "Door Hardware" consisting of 26 pages.
New Section 313200 "Subsoil Stabilization" consisting of 8 pages.
Pre-Construction Conference Notes consisting of 5 pages.
Civil Engineers Addendum 2 - Anderson Engineering consisting 3 pages, 7 drawings and 1 Detail Revisions
Landscape Engineers Addendum 2 – Land3Studio consisting of 1 page and 11 drawings
MEP Engineers Addendum 2 – Smith & Boucher consisting of 2 pages, Sections 271323 and 282300 and 5 drawings.

Drawings:
Revised Sheets: G001, G101, A101A, A101B, A101C, A121C, A141, A201, A202, A203, A361, A362, A363, A364, A501, A504, A601C, A621, A622, A623, A624, A625, A661, A681, A682 and A811

GENERAL – BIDDER'S QUESTIONS

G1 QUESTION: THE SPECIFICATIONS STATE A "LEAK DETECTION SYSTEM INSTALLER" IN SPEC SECTION 075423-1. IS THIS PROJECT NEEDING A PERMANENTLY EMBEDDED LEAK DETECTION SYSTEM OR A MEMBRANE INTEGRITY TEST?

G1.1 Answer: This requirement is deleted from the project in Addendum 2. Reference spec section075423-1.

G2 QUESTION: WHERE IS THE FLAGPOLE LOCATION INDICATED?

G2.1 Answer: Refer to sheet L100 for flag pole location. Addendum 1 contained information for the base detail on sheet G101. (Also included in Addendum 2)

G3 QUESTION: WHERE ARE THE SPECIFICATIONS FOR THE SIGNAGE?

G3.1 Answer: They were issued in Addendum 1.

G4 QUESTION: WHERE IS FRAME TYPE 25 LOCATED?

G4.1 Answer: Frame type 25 has been removed from the project. To clarify all clearstory frame locations, clearstory plans have been issued on the floor plan sheets in Addendum 2. Additionally, sheet A504 has been re-issued with a number of clarifications to correct inconsistencies.

G5 QUESTION: CLARIFY HM FRAME PAINT COLOR NOTES ON DETAIL A4/A622.

G5.1 Answer: Clarified in Addendum 2.

G6 QUESTION: CLARIFY WHAT APPEAR TO BE ALUMINUM FRAMES IN ELEVATION E4/A622 AND OTHER ELEVATIONS.

G6.1 Answer. These are HM frame type 31 at stud walls and 32 at masonry walls. They have been tagged on the plans in and elevated on sheet A504 in Addendum 2.

G7 QUESTION: CLARIFY FRAME TYPES IN DETAIL N13/A624.

G7.1 Answer: These frame types have been clarified in Addendum 2. Reference the floor plans and sheet A504.

G8 QUESTION: DOOR A101B IS LISTED ON THE DOOR SCHEDULE AS A TYPE "B" DOOR, IS THIS COORECT?

G8.1 Answer: This error has been corrected. Reference revised door schedule in Addendum 2.

G9 QUESTION: CONCERNING GLAZING DESIGN, PLEASE CLARIFY THE REQUIREMENT FOR SIGNED AND SEALED CALCULATIONS FOR DELEGATED DESIGN.

G9.1 Answer: Signed and sealed engineering calculations are required for the framing systems, not by glass manufactures. Reference the revised relevant sections in Addendum 2.

G10 QUESTION: WHAT IS ACTUALLY REQUIRED FOR THE MOCK UP AND FILD TESTING WHERE LISTED IN SECTION 084113-1.7?

G10.1 Answer: Refer to revised section 084113-1.7 and the revised curtain wall sections in Addendum 2 for clarification.

G11 QUESTION: ARE NFRC PERFOMANCE LABELS REQUIRED?

G11.1 Answer: No, show product performance in the shop drawings. Refer to revised relevant sections in Addendum 2.

G12 QUESTION: FOR THE CURTIAN WALL, THE SPECIFICATIONS INDICATION A 6" DEPTH, BUT THE DRAWINGS SHOW LARGER, PLEASE CLARIFY.

G12.1 Answer: The curtain wall depth is expected to be 7 ¼" to 7 ½" deep. No support steel is desired. Refer to revised details and specifications in Addendum 2.

G13 QUESTION: THE METAL ROOFING SPEC SECTION 074113 DOES NOT LIST INSULATION. FROM THE PLANS, THE INSULATION APPEARS TO BE 5.5", MATCHING THAT OF THE MEMBRANE ROOFING. IS THIS THE CASE?

G13.1 Answer: Roofing insulation under the metal roof is called out as 072100.A04. Refer to that section for requirements.

G14 QUESTION: WHAT KIND AND THICKNESS OF COVER BOARD IS WANTED AT THE METAL ROOFING?

G14.1 Answer: Refer to revised details provided in Addendum 2 – overboard is clarified and ties back to section 061600.A06.

G15 QUESTION: THE METAL ROOFING SPEC CALLS FOR CURVED ROOFING. THE ROOF DOES NOT APPEAR TO BE CURVED. ARE THE REGULAR BERRIDGE ZEE-LOCK ROOF PANELS APPROPRIATE?

G15.1 Answer: Refer to revised metal roofing section in Addendum 2 for clarifications. There is no curved metal roof on this project.

G16 QUESTION: THE PRICE FOR EACH ITEM WILL NEED TO BE 'DELIVERED' MEANING THAT THE PRICE OF EACH ITEM WILL BE AS IF IT IS PACKAGED AND SHIPPED INDIVIDUALLY? SHOULD I PROVIDE A 'PACKAGE' PRICE AS WELL BECAUSE IT WILL SAVE HUNDREDS IF NOT WELL OVER $1,000 TO PACKAGE AND SHIP AS A PACKAGE?

G16.1 Answer: Provide each unit price as if it will be shipped individually.

G17 QUESTION: THE PLAY AREA FOR THE JOPLIN EARLY CHILDHOOD CENTER BID. SHEET L102 SHOWS THE BERLINER/UDP ORBIT.01 BALANCE BEAM IN THE LAYOUT BUT IT IS NOT LISTED IN THE SPECIFICATIONS. CAN YOU CLARIFY IF I SHOULD INCLUDE IT IN PRICING TO GC'S OR NOT?

G17.1 Answer: This has been clarified in Addendum 1

G18 QUESTION: SECTION 07 54 23 PAGE 4 PARAGRAPH 2.3.A STATES ASTM 6878 (THIS IS NORMALLY AS STANDARD TPO SHEET) THEN THE PARAGRAPH GOES ON TO SAY FLEXIBLE FABRIC-BACKED TPO SHEET. STANDARD .060 TPO IS NOT FABRIC-BACKED. BUT THERE IS A SHEET CALLED FLEECE BACK. THIS SHEET IS NORMALLY 115 MIL.

G18.1 Answer: Refer to revised section 075423 in Addendum 2 for clarification. The TOP roof will be a standard TPO thickness .060 and will not be fabric backed.

G19 QUESTION: WHAT ARE THE SPECIFICATIONS OF THE "DIVIDERS" SEPARATING THE URINAL AND TOILET? IS THIS A SINGLE PANEL SUPPORTED BY A POST/PILASTER, AND WHAT ARE THE DIMENSIONS OF THE PANEL?

G19.1 Answer: This screen is to be the same as the urinal screen in materiality and size as in room C108. It will be wall mounted lower as directed by the Architect in the field,

G20 QUESTION: SIGN TYPE DIMENSIONS APPEAR TO BE INACCURATE AND NOT IN COMPLIANCE WITH ADA.

G20.1 Answer: Refer to the revised signage type sheet in Addendum 2 for revisions.

G21 QUESTION: IN AREA B CLARIFY ALUMINUM FRAMES 12 AND 32.

G21.1 Answer: Refer to the revised floor plans and sheet A504 in Addendum 2.

G22 QUESTION: IN AREA B CLARIFY FRAME TYPES AT DOORS B115A, B125A, AND B130A.

G22.1 Answer: Refer to the revised door schedule in Addendum 2.

G23 QUESTION: IN AREA C CLARIFY FRAME TYPES AT DOORS C122A, C123A, C130A, C131A.

G23.1 Answer: Refer to the revised door schedule in Addendum 2.

G24 QUESTION: WHAT ARE THE FRAME TYPES ON THE NORTH WALL OF C132?

G24.1 Answer: Refer to the revised floor plan in Addendum 2.

G25 QUESTION: WHAT ARE THE DIMENSIONS OF THE SKYLIGHTS? IS THE REQUIRED WOOD BLOCKING BY THE ROOFER OR THE SKYLIGHT SUPPLIER? WHO WILL CUT THE HOLE FOR THE SKYLIGHT?

G25.1 Answer: The dimensions of the skylight are determined by the skylight specification. The wood blocking is by the skylight supplier. The responsibility for who will cut the hole for the skylight will be determined by the General Contractor.

G26 QUESTION: THERE WERE A NUMBER OF STRUCTURAL CLARIFICATIONS IN ADDENDUM 1. WILL SHEETS BE ISSUED TO SHOW THE CHANGES?

G26.1 Answer: Revisions are shown in re-issued sheets in Addendum 2.

G27 QUESTION: ON ADDENDUM SHEET C104 NOTE D17 CALLS OUT HDPE PIPE BUT SAYS 4X4? D15 SAYS IT'S HDPE 18". IS D17 24" PER THE NOTE ABOUT THE DOWNSPOUT DRAINS ON THE NORTH SIDE OF THE BUILDING?

G27.1 Answer: D17 should be a 18" HDPE Pipe. The note for the downspout collectors will be changed to say dive pipe into 18" storm pipe.

G28 QUESTION: THE WOOD PANELING SPECS SAY THE SHOP/INSTALLER NEEDS TO BE AWI CERTIFIED. I'M NOT SEEING ANYTHING ABOUT THE MANUFACTURED CASEWORK OR INTERIOR ARCHITECTURAL WOODWORK BEING AWI CERTIFIED. IS EVERYTHING GOING TO BE AWI CERTIFIED? IF NOT, CAN WE WAIVE THE AWI CERTIFICATION ON THE WOOD PANELING?

G28.1 Answer: Addendum 2 removes the requirement for AWI certification from the project.

G29 QUESTION: ALTERNATE 7 – THE WAY I UNDERSTAND IT IS THE MODULAR BLOCK RETAINING WALL IS THE BASE BID, THE CAST-IN-PLACE RETAINING WALL IS THE ALTERNATE. IS THIS CORRECT?

G29.1 Answer: The base bid is the modular block retaining wall. Alternate 7 is contractor's option to provide a wall per the performance specifications. Clarification is added via Addendum 2.

G30 QUESTION: WILL YOU REQUIRE EXPANSION JOINT BETWEEN THE SIDEWALK AND THE CURB & GUTTER

G30.1 Answer: Yes, refer to revised elevation sheets and their sheet notes in Addendum 2.

G31 QUESTION: ARE THERE ANY SPECIFICATIONS FOR THE 072413.A01 MATERIAL CALLED OUT ON A201?

G31.1 Answer: These notes have been updated in Addendum 2 to read 072419.A01. Section 072419.A01has been issued as part of Addendum 2.

G32 QUESTION: REFERRING TO SHEET G001, CAN DIMENSIONS BE PROVIDED FOR THE TRASH ENCLOSURE FOR ITS OVERALL SIZE.

G32.1 Answer: The trash enclosure is 12' – 0" wide (inside face of block to inside face of block. It is 12' – 8" deep to the inside face of block.

G33 QUESTION: REFERRING TO A203 DETAIL – J8, CAN MORE INFORMATION BE PROVIDED FOR THE CUSTOM 3/8" ALUMINUM SILHOUETTES?

G33.1 Answer: The silhouettes will be of children playing and will not exceed the sizes shown on the elevations. Vector art will be provided by the architect. The information has been added to the building elevations in Addendum 2.

G34 **QUESTION: THE CEILING CLOUDS SHOWN ON A121C ARE DIFFERENT THAT THOSE SHOWN ON THE ENLARGED PLAN OF THIS SAME AREA L7/A434. A121C SHOWS (14) CLOUDS. A434 SHOWS 11 CLOUDS. WHICH ONE IS CORRECT?**

G34.1 Answer: A434 is correct. Sheet A121C is corrected in Addendum 2.

G35 **QUESTION: REFERENCE SHEET A101A. THE EXTERIOR WINDOW REFERENCES FRAME TYPE 2. I WONDER IF THIS IS CORRECT BECAUSE FRAME 2 ON SHEET A504 IS MUCH LARGER AND HAS A DOOR IN IT.**

G35.1 Answer: Frame 02 is correctly tagged in plan and elevated on sheet A504. The door is omitted on the frame elevation for clarity.

G36 **QUESTION: REFERENCE SHEET A902. PLEASE TAKE A LOOK AT THE EXTERIOR WINDOW TAGS ON H9/A902. I'M WONDERING IF THEY ARE CORRECT. TYPE 14 DOESN'T SEEM TO JIVE WITH WHAT I'M SEEING. ALSO, I'M NOT EVEN FINDING TYPES 32 AND 35 ON SHEET A504. I'M THINKING IT SHOULD PROBABLY BE 3 GROUPS OF THE 6,9,8,13 SEQUENCE SIMILAR TO ADJACENT CLASSROOMS A121, A125, A129.**

G36.1 Answer: Refer to revised sheet A902 in Addendum 2 for clarifications.

G37 **QUESTION: THE BERLINER WHITEWATER IS LISTED AS THE .03 (3 RAILS) ON THE BID FORM BUT IT IS SHOWN ON THE DRAWINGS AND LISTED IN THE SPECIFICATIONS AS THE .04 (4 RAILS). CAN YOU CLARIFY WHICH ONE IS TO BE USED.**

G37.1 Answer: Addressed in Addendum 1.

G38 **QUESTION: I'VE ASKED BERLINER AND BURKE DESIGNERS TO REVIEW PLANS AND INSURE THAT ALL PLAY PIECES FIT AS SHOWN ON THE PLANS. BURKE HAS NOT GOTTEN THIS DONE YET BUT A DESIGNER FROM BERLINER REPLIED: "ALL LOOKS GOOD EXCEPT THE PALMETTO SAUCER. EDGE OF SAFETY ZONE FALLS A LITTLE OUTSIDE OF WHERE THEY ARE SHOWING ARTIFICIAL TURF. CHECK OUT THE PDF I ATTACHED SHOWING THE OVERLAP. IF YOU WANT TO HAVE THE LA ADJUST THEIR PLAN ACCORDINGLY, I HAVE ALSO ATTACHED THE PALMETTO SAUCER CAD FILE FOR THEM TO USE FOR DESIGN."**

G38.1 Answer: Addressed in Addendum 2.

G39 **QUESTION: TO ENSURE THAT ALL PLAY EQUIPMENT FITS CORRECTLY, BURKE IS REQUESTING A CAD FILE TO MATCH THE PLAY AREA AS SHOWN ON SHEET L102. IS THIS SOMETHING YOU CAN PROVIDE? IF NOT, THEY CAN TRACE THE PLAN BUT THEY WON'T BE ABLE TO ENSURE THAT THE SCALE IS EXACT. PLEASE ADVISE.**

G39.1 Answer: We do not provide CAD files for the Landscape Drawings. The PDF files are to scale.

G40 **QUESTION: IS IT PERMISSIBLE TO USE DOUBLE T'S AND PRECAST WALLS IN LIEU OF THE HOLLOW CORE PLANKS AND MASONRY WALLS FOR THE HIGH WIND AREAS?**

G40.1 Answer: No. Please bid as shown in the documents and specifications.

G41 **QUESTION: REGARDING PL-1 THROUGH PL-7 ON SHEET A681, NONE OF THE COLORS EXIST ON THE WILSONART WEBSITE. PLEASE CLARIFY INTENT.**

G41.1 Answer: These are a recoloring of Wilsonart's verdigris crown laminate (7 different colors total).

G42 **QUESTION: PL-1 THRU PL-7 ALL REFERENCE THE SAME VENDOR COLOR CODE Z4271. PLEASE CLARIFY INTENT.**

G42.1 Answer: The pattern is identical for all (7) colors. Only the color changes.

G43 QUESTION: HAVING TROUBLE FINDING PL- 1 THRU PL-7. PLEASE CLARIFY.

G43.1 Answer: REF: J11/A621, which has a note that directs you to the finish plans for countertop plastic laminates. These are also found on some of the doors. REF: sheet A1/A501 and the Door Schedule.

G44 QUESTION: IF HIGH LEVELS OF LEAD ARE ENCOUNTERED ON THE SITE WHO IS RESPONSIBLE FOR REMEDIATION?

G44.1 Answer: In the event of any toxic materials on site, the owner is responsible for it's safe removal.

G45 QUESTION: ARE HIGH LEVELS OF LEAD ANTICIAPTED ON THE SITE?

G45.1 Answer: Refer to section 008400 – 1.2.C. The HUD Environmental Assessment – Appendix F-Site Contamination Report is available upon request from the City of Joplin for Contractor's use and reference.

G46 QUESTION: THERE IS A GREASE TRAP INDICATED ON SHEET C106. THE PLANS SAY REFER TO MECHANICAL PLANS FOR SIZE REQUIREMENTS, BUT MECHANICAL PLANS DO NOT HAVE SIZE REQUIREMENTS FOR GREASE TRAP. WHAT IS THE SIZE OF THE GREASE TRAP?

G46.1 Answer: The grease trap is no longer included in the project and has been removed from sheet C106. The grease trap will be installed at a later date when a commercial dishwasher is added to the kitchen/receiving area.

G47 QUESTIONS: IT APPEARS HARDWARE SCHEDULE IS NOT FOLLOWING DISTRICT STANDARDS. PLEASE CLARIFY.

G47.1 Answer: The hardware schedule has been revised in Addendum 2 to reflect the district standards accurately.

G48 QUESTION: WHERE IS THE IMPACT RESISTANT GYP LOCATED?

E1.2 Answer: Impact resistant gyp is not required and has been removed from the specifications in Addendum 2.

PROJECT MANUAL REVISIONS

A1 SECTION 000110 - TABLE OF CONTENTS

A1.1 REPLACE existing Table of Contents with the attached revised Table of Contents dated October 25, 2016.

A2 SECTION 008100 – PREVAILING WAGE DETERMINATION

A2.1 DELETE previously issued Federal Wage Determination document "General Decision Number MO160046 08/19/2016 MO46", and REPLACE with "General Decision Number MO160046 09/30/2106 MO46."

A3 SECTION 012200 – UNIT PRICES

A3.1 DELETE Paragraphs 3.1 P, 3.1 Q, 3.1 R and 3.1 S.

A4 SECTION 033000 – CAST-IN-PLACE CONCRETE

A4.1 INSERT Clause 1.4 B.1.a as follows: a. Batch delivery tickets shall indicate batch weights as well as amount of available water to add on each delivery ticket.

A4.2 DELETE Paragraph 2.5 G and associated subparagraph

A4.3 DELETE Paragraph 2.8 A and INSERT the following:

A. Granular Drainage Fill (033000.A15): Provide 2 inches of limestone fines and 4 inches of clean crushed stone or crushed or uncrushed gravel conforming to ASTM C 33, Size 57. Total thickness of 6 inches.

A4.4 Subparagraph 2.14 D.1; CHANGE to read: Use waterproofing (capillary break) admixture in concrete mixtures for all slabs on grade.

A4.5 Subparagraph 2.15 C.2; DELETE: 0.42 and INSERT: 0.45.

A4.6 DELETE Paragraph 2.15 E and associated subparagraphs, and INSERT the following:

E. Concrete Toppings: Normal-weight concrete.
1. Minimum Compressive Strength: 5000 psi at 28 days.
2. Minimum Cementitious Materials Content: 520 lb/cu. yd.
3. Slump Limit: 4 inches, plus or minus 1 inch.
4. Air Content: Do not allow air content of trowel-finished toppings to exceed 3 percent.

A4.7 Subparagraph 2.17 A.2; in the first line after the word "jobsite", INSERT: or batch plant as recommended by admixture manufacturer,.

A4.8 Subparagraph 2.17 A.2; in the last sentence, DELETE: and elevated slabs.

A4.9 Subparagraph 2.17 B.4; in the last sentence, DELETE: and elevated slabs.

A5 SECTION 061600 – SHEATHING

A5.1 Paragraph 2.5 A; DELETE: Grade A-B, and INSERT: Grade A-C…

A6 SECTION 064200 – WOOD PANELING

A6.1 DELETE Subparagraph 1.6 A.1. Note that AWI Certification is not required.

A7 SECTION 072419 – EXTERIOR INSULATION AND FINISH SYSTEM (EIFS)

A7.1 INSERT new Section 072419 "Exterior Insulation and Finish System (EIFS)" dated October 25, 2016, attached.

A8 SECTION 074113 – STANDING-SEAM METAL ROOF PANELS

A8.1 INSERT Subparagraph 1.1 B.3 as follows: 3. Section 061600 "Sheathing" for roof sheathing.

A8.2 INSERT Subparagraph 1.1 B.4 as follows: 4. Section 072100 "Thermal Insulation" for roof insulation.

A8.3 Paragraph 2.2 B; DELETE: snapping panels together, and INSERT: mechanically seaming panels together.

A8.4 Subparagraph 2.2 B.1; DELETE: Curved, and INSERT: Double-Lock.

A8.5 Clause 2.2 B.2.a; DELETE: 0.031 inch, and INSERT: 0.028 inch (24 gauge).

A8.6 Subparagraph 2.2 B.6; DELETE: Curved and INSERT: Double-Lock.

A8.7 Subparagraph 3.4 E.3; DELETE: Snap Joint: Nest standing seams and fasten together by interlocking and completely engaging factory-applied sealant., and INSERT: Seamed Joint: Double-crimp standing seams with manufacturer-approved, motorized seamer tool so clip, metal roof panel, and factory-applied sealant are completely engaged.

A9 SECTION 075213 – MODIFIED BITUMINOUS ROOFING

A9.1 Paragraph 2.3 A; DELETE: and light weight insulated concrete…

A9.2 ADD new Paragraph 2.3 Q as follows: Q. Asphalt: Asphalt shall meet requirements of ASTM D 312, Type IV.

A9.3 ADD new Paragraph 3.3 I as follows: I. Install vented base sheet at locations where concrete deck occurs in accordance with membrane manufacturer's written instructions.

A9.4 ADD new Subclause 3.4 A.1.a 2) as follows: 2) Set second layer of insulation in full mop of Type IV asphalt or low-rise foam adhesive as recommended by membrane manufacturer to meet performance requirements specified and offset joints 12 inches each way from first insulation layer.

A9.5 ADD new Subparagraph 3.4 A.5 as follows: 5. Over Concrete Decking**:** Install insulation in 2 layers, excluding tapered insulation and coverboard. Set first layer of insulation in full mop of Type IV asphalt as recommended by membrane manufacturer. Run long joints of insulation in continuous straight line, perpendicular to roof slope with ends joints staggered at least 12" between rows. Adhere first layer of insulation over entire area of roofing to meet FM for Windstorm Resistance Classification specified and per applicable requirements of FM Loss Prevention Data Sheet 1-28. Set second layer of insulation in full mop of Type IV asphalt as recommended by membrane manufacturer and offset joints 12" each way from first insulation layer.

A10 SECTION 075423 – THERMOPLASTIC POLYOLEFIN (TPO) ROOFING

A10.1 Paragraph 2.1 A; INSERT Clause "e" as follows: e. Mule-Hide Products Co., Inc.

A10.2 Paragraph 2.3 A; DELETE: fabric-backed…

A10.3 Subparagraph 2.3 A.1; INSERT Clause "e" as follows: e. Mule-Hide Products Co., Inc.

A10.4 Paragraph 2.6 D; INSERT Subparagraph 3 as follows:

3. High Density Polyisocyanurate Coverboard: Provide one of the following:
   a. Carlisle SynTec; SecurShield HD Plus, ½ inch thickness.
   b. GAF; EnergyGuard HD Plus, ½ inch thickness.
   c. Johns Manville (JM); Invinsa, ¼ inch thickness.
   d. Stevens: Comparable product.
   e. Mule-Hide Products Co., Inc.; Comparable product.

A11 SECTION 084113 – ALUMINUM ENTRANCES AND STOREFRONTS

A11.1 DELETE Paragraphs 1.4 A and 1.4 C.

A11.2 DELETE Article 1.7 in its entirety.

A11.3 CHANGE Subclause 3.5 B.1.a 1) to read: For punched openings, test 25 percent of installation, in each type of exterior finish substrate.

A11.4 CHANGE Subclause 3.5 B.1.a 2) to read: For storefront and clerestories; test each installation.

A12 SECTION 084413 – GLAZED ALUMINUM CURTAIN WALLS

A12.1 DELETE Article 1.9 in its entirety.

A12.2 Subparagraph 2.3 A.5; CHANGE frames depth to: 7-1/4 to 7-1/2 inches.

A12.3 Clause 3.5 C.1.a; CHANGE to read: Perform test at each area of curtain wall.

A13 SECTION 087100 - DOOR HARDWARE

A13.1 REPLACE existing Section 087100 – "Door Hardware" with the attached revised Section 087100 – "Door Hardware", dated October 25, 2016.

A14 SECTION 092900 – GYPSUM BOARD

A14.1 DELETE Clause 1.1 A.1.c.

A14.2 DELETE Paragraph 2.3 D and associated subparagraphs and clauses.

A14.3 DELETE Subparagraph 3.3 A.3.

A15 SECTION 313200 – SUBSOIL STABILIZATION

A15.1 INSERT new Section 313200 "Subsoil Stabilization" dated October 25, 2016, attached.

C1 REFER TO CIVIL ADDENDUM NO. 2 ATTACHED

M1 REFER TO ATTACHED MEP ADDENDUM NO 2

DRAWINGS REVISIONS

A16 SHEET G001 – GENERAL PROJECT INFORMATION

A16.1 REPLACE previously issued Sheet GOO1, with attached sheet G001 dated 10.25.2016. (Added a general note).

A17 SHEET G101 – OVERALL CODE FLOOR PLANS

A17.1 REPLACE previously issued Sheet G101, with attached sheet G101 dated 10.25.2016. (Added a general note and flag pole base).

A18 SHEET A101A – FLOOR PLAN – AREA A

A18.1 REPLACE previously issued Sheet A101A, with attached sheet A101A dated 10.25.2016. (Clarify clear story window locations and types and ADD elevation tags E7/E10/A101A to room A107 SLP Center).

A19 SHEET A101B – FLOOR PLAN – AREA B

A19.1 REPLACE previously issued Sheet A101B in Addendum 1, with attached sheet A101B dated 10.25.2016. (Clarify clear story window locations and types).

A20 SHEET A101C – FLOOR PLAN – AREA C

A20.1 REPLACE previously issued Sheet A101C in Addendum 1, with attached sheet A101C dated 10.25.2016. (Clarify clear story window locations and types).).

A21 SHEET A121C REFLECTED CEILING PLAN – AREA C

A21.1 REMOVE (3) PS1s to match enlarged plan on L7/A434.

A21.2 C101 Multi-Purpose – ADD 'P9' tag to gyp soffits

A22 SHEET A141 – OVERALL ROOF PLAN

A22.1 REPLACE previously issued Sheet A141in Addendum 1, with attached sheet A141 dated 10.15.2016. (Clarify walkway pads location and quantity).

A23 SHEET A201 – EXTERIOR OVERALL BUILDING ELEVATIONS

A23.1 REPLACE previously issued Sheet A201 in Addendum 1, with attached sheet A201 dated 10.25.2016. (Clarify EIFS system notes and custom aluminum sheet signage).

A24 SHEET A202 – ENLARGED EXTERIOR BUILDING ELEVATIONS

A24.1 REPLACE previously issued Sheet A202in Addendum 1, with attached sheet A202 dated 10.25.2016. (Clarify EIFS system notes and custom aluminum sheet signage).).

A25 SHEET A203 – ENLARGED EXTERIOR BUILDING ELEVATIONS

A25.1 REPLACE previously issued Sheet A203 in Addendum 1, with attached sheet A203 dated 10.25.2016. (Clarify EIFS system notes and custom aluminum sheet signage).).

A26 SHEET A361 – WALL SECTIONS

A26.1 REPLACE previously issued Sheet A361 in Addendum 1, with attached sheet A361 dated 10.25.2016. (Clarify details L1, K6, A6).

A27 SHEET A362 – WALL SECTIONS

A27.1 REPLACE previously issued Sheet A362in Addendum 1, with attached sheet A362 dated 10.25.2016. (Clarify details L5,L9, L13, A5, and A13).

A28 SHEET A363 – WALL SECTIONS

A28.1 REPLACE previously issued Sheet A363in Addendum 1, with attached sheet A363 dated 10.25.2016. (Clarify detail P13).

A29 SHEET A364 – EXTERIOR DETAILS

A29.1 REPLACE previously issued Sheet A364 in Addendum 1, with attached sheet A364 dated 10.25.2016. (Add details N6, A11, E15. Clarify Detail E11).

A30 SHEET A501 – DOOR SCHEDULE

A30.1 REPLACE previously issued Sheet A501, with attached sheet A501 dated 10.25.2016. (Clarify door schedule).

A31 SHEET A504 – FRAME ELEVATIONS

A31.1 REPLACE previously issued Sheet A504 ALUMIINUM FRAME TYPES, with attached sheet A504 FRAME TYPES dated 10.25.2016. (Clarify frame type dimensions, referencing details, and tags).

A32 SHEET A601C FINISH FLOOR PLAN – AREA C

A32.1 REPLACE previously issued Sheet A601C, with attached sheet A601C dated 10.25.2016. (ADD dimensions and callout for solid surface countertop and ADD callout for tile 'T3' behind water fountains on the east wall).

A33 SHEET A621 INTERIOR ELEVATIONS

A33.1 REPLACE previously issued Sheet A621, with attached sheet A621 dated 10.25.2016. (Sheet Note: Hollow Metal Frame Paint Colors: REPLACE note 6 with paint color Marine Blue #88GG 32/346 and note 7 with paint color Indian Bead #70BG 31/332 and Elevation A1: Replace keynote 12 32 00.A01 for keynote 12 32 00.A20 Pre-Manufactured Casework).

A34 SHEET A622 INTERIOR ELEVATIONS

A34.1 REPLACE previously issued Sheet A622, with attached sheet A622 dated 10.25.2016. (Elevation A4 – REMOVE Hollow Metal Frame Paint color tags for exterior windows, Sheet Note: Hollow Metal Frame Paint Colors: REPLACE note 6 with paint color Marine Blue #88GG 32/346 and note 7 with paint color Indian Bead #70BG 31/332 and Elevation E4 – ADD text "PAINTED WOOD FRAMES – PROFILES AND SIZES TBD. ATTACHED CABLES & HOOKS" under keynote 06 40 23.A02).

A35 SHEET A623 INTERIOR ELEVATIONS

REPLACE previously issued Sheet A623, with attached sheet A623 dated 10.25.2016. (Sheet Note: Hollow Metal Frame Paint Colors: REPLACE note 6 with paint color Marine Blue #88GG 32/346 and note 7 with paint color Indian Bead #70BG 31/332. Elevation J1 – ADD Hollow Metal Frame Paint Color tags to (3) windows: ADD text "PAINTED WOOD FRAMES – PROFILES AND SIZES TBD. ATTACHED CABLES & HOOKS" under keynote 06 40 23.A02 and Elevation N10 – ADD plastic laminate designations under associated keynotes).

A36 SHEET A624 INTERIOR ELEVATIONS

REPLACE previously issued Sheet A624, with attached sheet A624 dated 10.25.2016. (Sheet Note: Hollow Metal Frame Paint Colors: REPLACE note 6 with paint color Marine Blue #88GG 32/346 and note 7 with paint color Indian Bead #70BG 31/332, Elevation A9: ADD Hollow Metal Frame Paint color tags to (2) windows, Elevation A9: ADD door tags: ADD text "PAINTED WOOD FRAMES – PROFILE AND SIZES TBD. ATTACHED CABLES & HOOKS" under keynote 06 40 23.A02, Elevation A1: ADD Hollow Metal Frame Paint Color tags to (2) windows, ADD door tags to (2) doors, Add dimensions to WP3 panels and ADD text "PAINTED WOOD FRAMES – PROFILE AND SIZES TBD. ATTACHED CABLES & HOOKS" under keynote 06 40 23.A02)

A37 SHEET A625 INTERIOR ELEVATIONS

A37.1 REPLACE previously issued Sheet A625, with attached sheet A625 dated 10.25.2016. (Sheet Note: Hollow Metal Frame Paint Colors: REPLACE note 6 with paint color Marine Blue #88GG 32/346 and note 7 with paint color Indian Bead #70BG 31/332, Elevation A10: ADD text "PAINTED WOOD FRAMES – PROFILE AND SIZES TBD. ATTACHED CABLES & HOOKS" under keynote 06 40 23.A02, ADD elevations E7 and E10, Elevation A1 - ADD plastic laminate designation under associated keynotes, Elevation A6 – ADD plastic laminate designation under associated keynotes. CHANGE casework dimensions and Elevation E13 – ADD plastic laminate designation under associated keynote).

A38 SHEET A661 INTERIOR DETAILS

A38.1 REPLACE previously issued Sheet A661, with attached sheet A661 dated 10.25.2016. (Detail A11 – ADD 06 40 23.A22 Grommets, 06 40 23.A19 and 06 40 23.A18 and REPLACE Details: A1, A6, F10, F13)

A39 SHEET A681 MATERIAL FINISH LEGEND

A39.1 REPLACE previously issued Sheet A681, with attached sheet A681 dated 10.25.2016. (General Finish Notes: ADD note "13. SOLID SURFACE WINDOW SILLS TO BE SS1.")

A40 SHEET A682 ROOM FINISH SCHEDULE

A40.1 REPLACE previously issued Sheet A682, with attached sheet A682 dated 10.25.2016. (Room A104 Director's Office – CHANGE floor finish to C9, CHANGE south wall finish to P10 and Room C101 Multi-Purpose – ADD finishes to floor, base, walls, ceiling).

A41 SHEET A811 – SIGNAGE TYPES

A41.1 REPLACE previously issued Sheet A811, with attached sheet A811 dated 10.25.2016.

S1 ISSUED STRUCTURAL SHEETS

S1.1 Issued structural sheets that show the modifications made to the sheets where only verbiage was issued in Addendum No. 1: S000, S002, S100, S101, S102, S200, S201, S202 and S300

C1 REFER TO CIVIL ADDENDUM NO. 2 ATTACHED

L1 REFER TO LANDSCAPE ADDENDUM NO. 2 ATTACHED

M2 REFER TO MEP ADDENDUM NO. 2 ATTACHED

SUBSTITUTION REQUEST APPROVALS

This portion of the addendum designates those materials, products and equipment approved prior to submission of bids, as set forth in the contract documents. Items added to the proposed contract documents by this addendum are the only proposed substitutions received and approved by the architect in accordance with those provisions. No other items shall be substituted or bid as "equals".

It is understood that all items allowed by this addendum are subject to the full provisions of the original proposed contract documents and all modifications thereto and, as such, shall match standards of the original specified items with respect to materials, workmanship, design, size, capacity, type, function, finish, performance, quality, warranty, etc. Nothing in this addendum shall be construed as altering those original standards or modifications thereto.

Approvals are based upon the opinion, knowledge, information and belief of the architect at time of issuance of this addendum and reliance upon data submitted. Approvals are therefore interim in nature and subject to reconsideration as additional data, materials, workmanship and coordination with other work are observed and reviewed. In proposing items allowed by this addendum, bidder assumes all risk, costs and responsibility for item's final acceptance, integration into the work and performance.

SECTION 033000

SPEC HARD BY SPEC CHEM Is acceptable.

SECTION 072100

PROSEAL BY ICYNENE Is acceptable.

SECTION 072729

AIR-SHIELD BY W.R. MEADOWS INC.Is acceptable

SECTION 072729

RGUARD VAPOR BARRIER BY PROSOCO Is acceptable.

SECTION 075423

MULE-HIDE PROUCTS are acceptable. Note the basis of design has been clarified in Addendum 2.

SECTION 123200

FADCO SUPPLIERS Is acceptable

SECTION 283111

SIEMENS CERBERUS PRO Is acceptable

SECTION 321313

PAVE CURE REZ WHITE BY SPEC CHEM Is acceptable.

SPEC FILM RTU BY SPEC CHEM Is acceptable.

CURE & SEAL WB BY SPEC CHEM Is acceptable.

SECTION 321820

NO FAULT SAFETY SURFACE Is acceptable provided the stone base and geotextile fabric as specified in 321820 is acceptable base and will not require increase in cost due to differing stone gradation.

RETAINING WALL

BIG BLOCK Is acceptable.

.

Project No. 16054

General Decision Number: MO160046 09/30/2016 MO46

Superseded General Decision Number: MO20150046

State: Missouri

Construction Type: Building

County: Jasper County in Missouri.

BUILDING CONSTRUCTION PROJECTS (does not include single family homes or apartments up to and including 4 stories).

Note: Under Executive Order (EO) 13658, an hourly minimum wage of $10.15 for calendar year 2016 applies to all contracts subject to the Davis-Bacon Act for which the solicitation was issued on or after January 1, 2015. If this contract is covered by the EO, the contractor must pay all workers in any classification listed on this wage determination at least $10.15 (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in calendar year 2016. The EO minimum wage rate will be adjusted annually. Additional information on contractor requirements and worker protections under the EO is available at www.dol.gov/whd/govcontracts.

PAINTER: Spray	$ 17.78	0.00

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

==========

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than "SU" or "UAVG" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the

classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination
* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage

payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

==========

END OF GENERAL DECISION

SECTION 072419 - EXTERIOR INSULATION AND FINISH SYSTEM (EIFS)

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes:
   1. Drainage-type exterior insulation and finish system (EIFS) (072419.A01).

B. Related Sections:
   1. Section 061600 "Sheathing" for sheathing.

1.2 DEFINITIONS

A. Definitions in ASTM E 2110 apply to Work of this Section.

B. EIFS: Exterior insulation and finish system(s).

C. IBC: International Building Code.

D. Polymer-Based Exterior Insulation and Finish System: Class PB EIFS, as defined in ASTM E 2568.

1.3 SYSTEM DESCRIPTION

A. Class PB EIFS: A non-load-bearing, exterior wall cladding system that consists of an insulation board attached adhesively, mechanically, or both to the substrate; an integrally reinforced base coat; and a textured protective finish coat.

1.4 PERFORMANCE REQUIREMENTS

A. EIFS Performance: Comply with the following:
   1. Bond Integrity: Free from bond failure within EIFS components or between system and supporting wall construction, resulting from exposure to fire, wind loads, weather, or other in-service conditions.
   2. Weather Tightness: Resistant to water penetration from exterior into water-drainage EIFS and assemblies behind it or through them into interior of building that results in deterioration of thermal-insulating effectiveness or other degradation of EIFS and assemblies behind it, including substrates, supporting wall construction, and interior finish, and including a means that allows water entering into an EIFS assembly to drain to the exterior.

B. Class PB EIFS: Provide EIFS having physical properties and structural performance that comply with the following:
   1. Abrasion Resistance: Sample consisting of 1-inch- thick EIFS mounted on 1/2-inch- thick gypsum board; cured for a minimum of 28 days; and showing no cracking, checking, or loss of film integrity after exposure to 528 quarts of sand when tested per ASTM D 968, Method A.
   2. Absorption-Freeze Resistance: No visible deleterious effects and negligible weight loss after 60 cycles per EIMA 101.01.
   3. Accelerated Weathering: Five samples per ICC-ES AC235 showing no cracking, checking, crazing, erosion, rusting, blistering, peeling, delamination, or other characteristics that might affect performance as a wall cladding after testing for 2000 hours when viewed under 5 times magnification per ASTM G 153 or ASTM G 155.
   4. Freeze-Thaw: No surface changes, cracking, checking, crazing, erosion, rusting, blistering, peeling, or delamination, or indications of delamination between components when viewed under 5 times magnification after 10 cycles per ICC-ES AC235.
   5. Mildew Resistance of Finish Coat: Sample applied to 2-by-2-inch clean glass substrate, cured for 28 days, and showing no growth when tested per ASTM D 3273 and evaluated according to ASTM D 3274.
   6. Salt-Spray Resistance: No deleterious affects when tested according to ICC-ES AC235.
   7. Tensile Adhesion: No failure in the EIFS, adhesive, base coat, or finish coat when tested per ICC-ES AC235.
   8. Water Penetration: Sample consisting of 1-inch- thick EIFS mounted on 1/2-inch- thick gypsum board, cured for 28 days, and showing no water penetration into the plane of the base coat to expanded polystyrene board interface of the test specimen after 15 minutes at 6.24 lbf/sq. ft. of air pressure difference or 20 percent of positive design wind pressure, whichever is greater, across the specimen during a test period when tested per EIMA 101.02.

9. Water Resistance: Three samples, each consisting of 1-inch- thick EIFS mounted on 1/2-inch- thick gypsum board; cured for 28 days; and showing no cracking, checking, crazing, erosion, rusting, blistering, peeling, or delamination after testing for 14 days per ASTM D 2247.
10. Impact Resistance: Sample consisting of 1-inch- thick EIFS when constructed, conditioned, and tested per EIMA 101.86; and meeting or exceeding the following:
    a. Standard Impact Resistance: 25 to 49 inch-lb, where system is 8 feet above adjacent finished grade.
    b. Medium Impact Resistance: 50 to 89 inch-lb, where system is 8 feet or less above adjacent finished grade.
11. Structural Performance Testing: EIFS assembly and components shall comply with ICC-ES AC235 when tested per ASTM E 330.

1.5 ACTION SUBMITTALS

A. Product Data: For each type and component of EIFS indicated.

B. Shop Drawings: Include plans, elevations, sections, details of components, details of penetration and termination, flashing details, joint locations and configurations, fastening and anchorage details including mechanical fasteners, and connections and attachments to other work.

C. Samples for Initial Selection: For each type of finish-coat color and texture indicated.

D. Samples for Verification: 12-inch- square panels for each type of finish-coat color and texture indicated, prepared using same tools and techniques intended for actual work including an aesthetic reveal and a typical control joint filled with sealant of color selected.
1. Include sealants Samples to verify color selected.

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer and testing agency.

B. Manufacturer Certificates: Signed by manufacturers certifying that EIFS comply with requirements.
1. Accessory products installed with EIFS, including joint sealants, flashing, water-resistive coatings, and trim, whether or not furnished by EIFS manufacturer and whether or not specified in this Section, are acceptable to EIFS manufacturer.

C. Field quality-control reports and special inspection reports.

1.7 CLOSEOUT SUBMITTALS

A. Maintenance Data: For EIFS to include in maintenance manuals.

1.8 QUALITY ASSURANCE

A. Installer Qualifications: An installer who is certified in writing by EIFS manufacturer as qualified to install manufacturer's system using trained workers.

B. Source Limitations: Obtain EIFS from single source from single EIFS manufacturer and from sources approved by EIFS manufacturer as compatible with system components.

C. Mockups/Field Sample: Build mockup/field sample to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution and set quality standards for fabrication and installation.
1. Approved mockups/field samples may become part of the completed Work if undisturbed at time of Substantial Completion.

D. Preinstallation Conference: Conduct conference at Project site.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials in original, unopened packages with manufacturers' labels intact and clearly identifying products.

B. Store materials inside and under cover; keep them dry and protected from weather, direct sunlight, surface contamination, aging, corrosion, damaging temperatures, construction traffic, and other causes.
   1. Stack insulation board flat and off the ground.
   2. Protect plastic insulation against ignition at all times. Do not deliver plastic insulating materials to Project site before installation time.
   3. Complete installation and concealment of plastic materials as rapidly as possible in each area of construction.

1.10 PROJECT CONDITIONS

A. Weather Limitations: Maintain ambient temperatures above 40 deg F for a minimum of 24 hours before, during, and after adhesives or coatings are applied. Do not apply EIFS adhesives or coatings during rainfall. Proceed with installation only when existing and forecasted weather conditions and ambient outdoor air, humidity, and substrate temperatures permit EIFS to be applied, dried, and cured according to manufacturers' written instructions and warranty requirements.

1.11 COORDINATION

A. Coordinate installation of EIFS with related Work specified in other Sections to ensure that wall assemblies, including sheathing, weather-resistant sheathing paper, flashing, trim, joint sealants, windows, and doors, are protected against damage from the effects of weather, age, corrosion, moisture, and other causes. Do not allow water to penetrate behind flashing that is behind water-drainage EIFS.

1.12 WARRANTY

A. Manufacturer's Special Warranty for EIFS: Manufacturer agrees to repair or replace components of EIFS-clad wall and soffit assemblies that fail in materials or workmanship within specified warranty period.
   1. Failures include, but are not limited to, the following:
      a. Bond integrity and weather tightness.
      b. Deterioration of EIFS finishes and other EIFS materials beyond normal weathering.
   2. Warranty coverage includes the following components of EIFS-clad drainage-wall assemblies:
      a. EIFS finish, including base coats, finish coats, and reinforcing mesh.
      b. Insulation installed as part of EIFS including foam build-outs.
      c. Insulation adhesive.
      d. EIFS accessories, including trim components and flashing.
   3. Warranty Period: Ten (10) years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide EIFS systems by one of the following:
   1. Dryvit Systems, Inc.
   2. Parex, Inc.; a brand of ParexLahabra, Inc.
   3. Senergy; Degussa Wall Systems, Inc.
   4. Sto Corp.

2.2 MATERIALS

A. Compatibility: Provide water-resistive coating, adhesive, fasteners, board insulation, reinforcing meshes, base- and finish-coat systems, sealants, and accessories that are compatible with one another and with substrates and approved for use by EIFS manufacturer for Project.

B. Water-Resistive Coatings: EIFS manufacturer's standard formulation and accessories for use as water-resistive barriers; compatible with substrate and complying with physical and performance criteria of ASTM E 2570.
   1. Water-resistive coatings shall be compatible with air barrier coating system specified in Section 072729.

C. Flexible-Membrane Flashing: Cold-applied, self-adhering, self-healing, rubberized-asphalt and polyethylene-film composite sheet or tape and primer; EIFS manufacturer's standard or product recommended in writing by EIFS manufacturer.

D. Liquid Flashing: Manufacturer's standard.

E. Primer/Sealer: EIFS manufacturer's standard substrate conditioner designed to seal substrates from moisture penetration and to improve the bond between substrate of type indicated and adhesive used for application of insulation.

F. Insulation Adhesive: EIFS manufacturer's standard formulation designed for indicated use; compatible with substrate; and complying with one of the following:
   1. Job-mixed formulation of portland cement complying with ASTM C 150, Type I, and polymer-based adhesive specified for base coat.
   2. Factory-mixed non-cementitious formulation designed for adhesive attachment of insulation to substrates of type indicated, as recommended by EIFS manufacturer.

G. Molded, Rigid Cellular Polystyrene Board Insulation: Comply with ASTM C 578, Type I; EIFS manufacturer's requirements; and EIMA's "EIMA Guideline Specification for Expanded Polystyrene (EPS) Insulation Board" for most stringent requirements for material performance and qualities of insulation, including dimensions and permissible variations, and the following:
   1. Aging: Before cutting and shipping, age insulation in block form by air drying for not less than six weeks or by another method approved by EIMA that produces equivalent results.
   2. Flame-Spread and Smoke-Developed Indexes: 25 and 450 or less, respectively, per ASTM E 84.
   3. Dimensions: Provide insulation boards not more than 24 by 48 inches and in thickness indicated but not more than 4 inches thick or less than thickness allowed by ASTM C 1397.
   4. Foam Shapes: Provide with profiles and dimensions indicated on Drawings.
   5. At Contractor's option, pre-manufactured insulation starter strips may be used. Starter strips shall have 3 to 4 inch high pre-wrapped and reinforced edges. Starter strips shall not be less than 8 inches tall. Provide in manufacturer's standard lengths.

H. Reinforcing Mesh: Balanced, alkali-resistant, open-weave, glass-fiber mesh treated for compatibility with other EIFS materials, made from continuous multi-end strands with retained mesh tensile strength of not less than 120 lbf/in. per EIMA 105.01; complying with ASTM D 578 and the following:
   1. Standard-Impact Reinforcing Mesh: Not less than 4.0 oz./sq. yd.
   2. Intermediate-Impact Reinforcing Mesh: Not less than 12.0 oz./sq. yd.
   3. Strip Reinforcing Mesh: Not less than 3.75 oz./sq. yd.
   4. Detail Reinforcing Mesh: Not less than 4.0 oz./sq. yd.
   5. Corner Reinforcing Mesh: Not less than 7.2 oz./sq. yd.

I. Base-Coat Materials: EIFS manufacturer's standard mixture complying with one of the following requirements:
   1. Factory-blended dry formulation of portland cement, dry polymer admixture, and inert fillers to which only water is added at Project site.
   2. Factory-mixed non-cementitious formulation of polymer-emulsion adhesive and inert fillers that is ready to use without adding other materials.

J. Primer: EIFS manufacturer's standard factory-mixed, elastomeric-polymer primer for preparing base-coat surface for application of finish coat.

K. Finish-Coat Materials: EIFS manufacturer's standard acrylic-based coating with enhanced mildew resistance complying with the following:
   1. Factory-mixed formulation of polymer-emulsion binder, colorfast mineral pigments, sound stone particles, and fillers.
   2. Textures: As selected by Architect from manufacturer's full range.
   3. Colors: As selected by Architect from manufacturer's full range.

L. Water: Potable.

M. Mechanical Fasteners: When recommended by manufacturer to supplement adhesive, provide EIFS manufacturer's standard corrosion-resistant fasteners consisting of thermal cap, standard washer and shaft attachments, and fastener indicated below; selected for properties of pullout, tensile, and shear strength required to resist design loads of application indicated; capable of pulling fastener head below surface of insulation board; and of the following description:
   1. For attachment to masonry and concrete substrates, provide sheathing dowel in form of a plastic wing-tipped fastener with thermal cap, sized to fit insulation thickness indicated and to penetrate substrate to depth required to secure anchorage.
   2. For attachment, provide manufacturer's standard fasteners suitable for substrate.

N. Trim Accessories: Type as designated or required to suit conditions indicated and to comply with EIFS manufacturer's written instructions; manufactured from UV-stabilized PVC; and complying with ASTM D 1784, manufacturer's standard Cell Class for use intended, and ASTM C 1063.
   1. Casing Bead: Prefabricated, one-piece type for attachment behind insulation, of depth required to suit thickness of coating and insulation, with face leg perforated for bonding to coating and back leg.
   2. Weep Screed/Track: Prefabricated, one-piece type for attachment behind insulation with perforated face leg extended to form a drip and weep holes in track bottom, of depth required to suit thickness of coating and insulation, with face leg perforated for bonding to coating and back leg; designed to drain incidental moisture that gets into wall construction to the exterior at terminations of EIFS with drainage.
      a. Omit weep screed/starter track where pre-wrapped reinforced starter strips are used.
   3. Expansion Joint: Prefabricated, one-piece V profile; designed to relieve stress of movement.
   4. Window Sill Flashing: Prefabricated type for both flashing and sloping sill over framing beneath windows; with end and back dams; designed to direct water to exterior.

2.3 MIXING

A. General: Comply with EIFS manufacturer's requirements for combining and mixing materials. Do not introduce admixtures, water, or other materials except as recommended by EIFS manufacturer. Mix materials in clean containers. Use materials within time period specified by EIFS manufacturer or discard.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of EIFS.

B. Examine roof edges, wall framing, flashings, openings, substrates, and junctures at other construction for suitable conditions where EIFS will be installed.

C. Proceed with installation only after unsatisfactory conditions have been corrected.
   1. Begin coating application only after surfaces are dry.
   2. Application of coating indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Protect contiguous work from moisture deterioration and soiling caused by application of EIFS. Provide temporary covering and other protection needed to prevent spattering of exterior finish coats on other work.

B. Protect EIFS, substrates, and wall construction behind them from inclement weather during installation. Prevent penetration of moisture behind drainage plane of EIFS and deterioration of substrates.

C. Prepare and clean substrates to comply with EIFS manufacturer's written instructions to obtain optimum bond between substrate and adhesive for insulation.

3.3 EIFS INSTALLATION, GENERAL

A. Comply with EIFS manufacturer's written instructions for installation of EIFS as applicable to each type of substrate indicated.

3.4 SUBSTRATE PROTECTION APPLICATION

A. Primer/Sealer: Apply over each type of substrate encountered and where required by EIFS manufacturer for improving adhesion of insulation to substrate.

B. Water-Resistive Coating: Apply over sheathing to provide a water-resistive barrier.
   1. Tape and seal joints, exposed edges, terminations, and inside and outside corners of sheathing unless otherwise indicated by EIFS manufacturer's written instructions.

C. Flexible-Membrane Flashing: Install over weather-resistive barrier, applied and lapped to shed water; seal at openings, penetrations, terminations, and where required by EIFS manufacturer. Prime substrates if required and install flashing to comply with EIFS manufacturer's written instructions and details.

D. Liquid Flashing: Install over weather-resistive barrier, applied and lapped to shed water; seal at openings, penetrations, terminations, and where required by EIFS manufacturer. Prime substrates if required and install flashing to comply with EIFS manufacturer's written instructions and details.

3.5 TRIM INSTALLATION

A. Trim: Apply trim accessories at perimeter of EIFS, at expansion joints, at window sills**,** and elsewhere as indicated, according to EIFS manufacturer's written instructions. Coordinate with installation of insulation.
1. Weep Screed/Track: Use at bottom termination edges, at window and door heads of water-drainage EIFS unless otherwise indicated.
   a. Omit weep screed when pre-manufactured starter strips are used.
2. Window Sill Flashing: Use at windows unless otherwise indicated.
3. Expansion Joint: Use where indicated on Drawings.
4. Casing Bead: Use at other locations.

3.6 INSULATION INSTALLATION

A. Board Insulation: Adhesively attach insulation to substrate in compliance with ASTM C 1397, EIFS manufacturer's written instructions to accommodate water drainage installation, and the following:
1. Where vertical ribbons of adhesive are used, apply adhesive to insulation or to air barrier coating according to EIFS manufacturer's written instructions. Apply adhesive to a thickness recommended by EIFS manufacturer.
2. Press insulation into place. Apply pressure over the entire surface of insulation to accomplish uniform contact, high initial grab, and overall level surface.
3. Allow adhered insulation to remain undisturbed for period recommended by EIFS manufacturer, but not less than 24 hours, before beginning rasping and sanding insulation, or applying base coat and reinforcing mesh.
4. Apply insulation over air barrier coating and dry substrates in courses with long edges of boards oriented horizontally.
5. Begin first course of insulation from screed/track and work upward. Work from perimeter casing beads toward interior of panels if possible.
6. Stagger vertical joints of insulation boards in successive courses to produce running bond pattern. Locate joints so no piece of insulation is less than 12 inches wide or 6 inches high. Offset joints not less than 6 inches from corners of window and door openings and not less than 4 inches from aesthetic reveals.
   a. Adhesive Attachment: Offset joints of insulation not less than 6 inches from horizontal and 4 inches from vertical joints in sheathing.
7. Place insulation with adhesive strips and channels, slots, or waves aligned in the vertical position for drainage
8. Interlock ends at internal and external corners.
9. Abut insulation tightly at joints within and between each course to produce flush, continuously even surfaces without gaps or raised edges between boards. If gaps greater than 1/16 inch occur, fill with insulation cut to fit gaps exactly; insert insulation without using adhesive or other material.
10. Cut insulation to fit openings, corners, and projections precisely and to produce edges and shapes complying with details indicated.
11. Rasp or sand flush entire surface of insulation to remove irregularities projecting more than1/16 inch from surface of insulation and to remove yellowed areas due to sun exposure; do not create depressions deeper than 1/16 inch.
12. Cut aesthetic reveals in outside face of insulation with high-speed router and bit configured to produce grooves, rabbets, and other features that comply with profiles and locations indicated. Do not reduce insulation thickness at aesthetic reveals to less than 3/4 inch.
13. Interrupt insulation for expansion joints where indicated.
14. Form joints for sealant application by leaving gaps between adjoining insulation edges and between insulation edges and dissimilar adjoining surfaces. Make gaps wide enough to produce joint widths indicated after encapsulating joint substrates with base coat and reinforcing mesh.
15. After installing insulation and before applying field-applied reinforcing mesh, fully wrap board edges. Cover edges of board and extend encapsulating mesh not less than 2-1/2 inches over front and back face unless otherwise indicated on Drawings.

16. Treat exposed edges of insulation as follows:
    a. Except for edges forming substrates of sealant joints, encapsulate with base coat, reinforcing mesh, and finish coat.
    b. Encapsulate edges forming substrates of sealant joints within EIFS or between EIFS and other work with base coat and reinforcing mesh.
    c. At edges trimmed by accessories, extend base coat, reinforcing mesh, and finish coat over face leg of accessories.
17. Coordinate installation of flashing and insulation to produce wall assembly that does not allow water to penetrate behind flashing and water-/weather-resistive barrier.

B. Expansion Joints: Install at locations indicated, where required by EIFS manufacturer, and as follows:
1. At expansion joints in substrates behind EIFS.
2. Where EIFS adjoin dissimilar substrates, materials, and construction, including other EIFS.
3. Where wall height or building shape changes.
4. Where EIFS manufacturer requires joints in long continuous elevations.

3.7 BASE-COAT INSTALLATION

A. Base Coat: Apply to exposed surfaces of insulation in minimum thickness recommended in writing by EIFS manufacturer, but not less than 1/16-inch dry-coat thickness.

B. Reinforcing Mesh: Embed type indicated below in wet base coat to produce wrinkle-free installation with mesh continuous at corners and overlapped not less than 2-1/2 inches or otherwise treated at joints to comply with ASTM C 1397 and EIFS manufacturer's written instructions. Do not lap reinforcing mesh within 8 inches of corners. Completely embed mesh, applying additional base-coat material if necessary, so reinforcing-mesh color and pattern are not visible.
1. Standard-impact reinforcing mesh for installations 8 feet above adjacent finished grade.
2. Intermediate-impact reinforcing mesh for installations 8 feet or less above adjacent finished grade.

C. Double-Layer Reinforcing Mesh Application: Where indicated, apply second base coat and second layer of[standard or intermediate-impact reinforcing mesh, overlapped not less than 2-1/2 inches or otherwise treated at joints to comply with ASTM C 1397 and EIFS manufacturer's written instructions in same manner as first application. Do not apply until first base coat has cured.

D. Additional Reinforcing Mesh: Apply strip reinforcing mesh around openings extending 4 inches beyond perimeter. Apply additional 9-by-12-inch strip reinforcing mesh diagonally at corners of openings (re-entrant corners). Apply 8-inch- wide strip reinforcing mesh at both inside and outside corners unless base layer of mesh is lapped not less than 4 inches on each side of corners.
1. At aesthetic reveals, apply strip reinforcing mesh not less than 8 inches wide.
2. Embed strip reinforcing mesh in base coat before applying first layer of reinforcing mesh.

3.8 FINISH-COAT INSTALLATION

A. Primer: When recommended by EIFS manufacturer, apply over dry base coat according to EIFS manufacturer's written instructions.

B. Finish Coat: Apply over dry base coat, maintaining a wet edge at all times for uniform appearance, in thickness required by EIFS manufacturer to produce a uniform finish of color and texture matching approved sample and free of cold joints, shadow lines, and texture variations.
1. Textures: Match approved sample.
2. Colors: Match approved sample.

3.9 FIELD QUALITY CONTROL

A. Special Inspections: Owner will engage a qualified special inspector to perform the following special inspections:
1. According to ICC-ES AC24 or ICC-ES AC235 as applicable.

B. Testing Agency: Engage a qualified testing agency to perform tests and inspections other than “Special Inspections” when required by EIFS manufacturer and authority having jurisdiction.

C. EIFS Tests and Inspections: For the following:
   1. According to requirements of authority having jurisdiction and EIFS manufacturer.

D. Remove and replace EIFS where test results indicate that EIFS do not comply with specified requirements.

E. Prepare test and inspection reports.

3.10 CLEANING AND PROTECTION

A. Remove temporary covering and protection of other work. Promptly remove coating materials from window and door frames and other surfaces outside areas indicated to receive EIFS coatings.

END OF SECTION 072419

SECTION 087100 – DOOR HARDWARE

PART 1 - GENERAL

1.1 SUMMARY

A. Intent: The intent of this Section is to provide finish hardware for the proper operation and control of all wood, hollow metal and aluminum doors in the Project. Prior to bidding, notify the Architect of any doors that do not have hardware meeting this intention.

B. This Section includes items known commercially as finish or door hardware that are required for swinging doors, except special types of unique hardware specified in the same sections as the doors and door frames on which they are installed. This Section includes, but is not necessarily limited to furnishing and installing complete, the following:
   1. Finish hardware for proper operation and control of all wood, aluminum and hollow metal doors, including hinges, locks and latch sets, closers, panic devices, autoflushbolts, electric strikes, magnetic holders, removable mullions, cylinders, keys, miscellaneous stops, flat goods, weatherstripping and thresholds as required.
   2. Cylinder for access doors where specified.

C. Related work in other sections:
   1. Hollow metal doors, frames and silencers: Section 081113.
   2. Wood doors: Section 081416.
   3. Aluminum doors: Section 084113.

1.2 DEFINITIONS

A. "Finish Hardware" includes items known commercially as finish hardware which are required for swing, and folding doors, except special types of unique and non-matching hardware specified in the same section as the door and door frame.

1.3 ACTION SUBMITTALS

A. Product Data: Submit manufacturer's technical product data for each hardware item. Include information necessary to show compliance with requirements, and include instructions for installation and for maintenance of operating parts and finishes.
   1. Manufacturer shall submit written certification confirming closers compliance with U.L. 10C.

B. Hardware Schedule: Submit a hardware schedule in a vertical format (horizontal format not acceptable), organized into sets, including the information below. Designations for door numbers and hardware sets in the schedule shall match those used in the Construction Documents for each opening.
   1. Hardware Schedule shall be coordinated with doors, frames, and related work to ensure proper size, thickness, hand function, and finish of door hardware.
   2. Catalog cuts of each type of exposed hardware unit, highlighted in color to indicate compliance with the Hardware Schedule.
   3. Type, style, function, size and finish of each hardware item.
   4. Name and manufacturer of each item.
   5. Fastenings and other pertinent information.
   6. Explanation of all abbreviations, symbols, codes, etc., contained in schedule.
   7. Mounting locations for hardware.
   8. Door and frame sizes and materials.
   9. Deviations from Specifications shall be noted in cover letter.

C. Submittal Sequence: Submit schedule at earliest possible date particularly where acceptance of hardware schedule must precede fabrication of other work (e.g., hollow metal frames) which is critical in the project construction schedule. Include with schedule the product data, samples, shop drawings of other work affected by finish hardware, and other information essential to the coordinated review of hardware schedule.

D. Keying Schedule: Submit separate detailed schedule, at the same time as the Hardware Schedule, indicating keying for all locks and how Owner's instructions, on keying of locks has been fulfilled. Keying schedule must be approved before ordering any locks.

E. Pinning Transcript: Submit detailed schedule indicating each lock cylinder and core.

F. Templates: Furnish hardware templates to each fabricator of doors, frames and other work to be factory-prepared for the installation of hardware. Upon request, check shop drawings of such other work, to confirm that adequate provisions are made for proper location and installation of hardware.

1.4 QUALITY ASSURANCE

A. Manufacturer: Obtain each type of hardware (latch and lock sets, hinges, closers, etc.) from a single manufacturer, although several may be indicated as offering products complying with requirements.

B. Product/Material Qualifications: Manufacturer's product numbers are indicated for convenience in identifying finish hardware items. Unless otherwise indicated, manufacturer's description for indicated product number constitutes minimum standards of quality, design, function and performance required for each item to be incorporated into the Project.
   1. It will be the responsibility of the Bidder to furnish with his Bid a list clarifying any deviations from these specifications written or implied, in order that a fair and proper evaluation be made. Those Bidders not submitting a list of deviations will be presumed to have Bid as specified.

C. Supplier Qualifications: A recognized Architectural Finish Hardware Supplier, with warehousing facilities, who has been furnishing hardware in the project's vicinity for a period of not less than 2 years. Supplier shall be or employ an experienced Architectural Hardware Consultant (AHC) who is certified by and member of the Door and Hardware Institute. The Architectural Hardware Consultant shall be available, at reasonable times during the course of the work, for consultation about project's hardware requirements, to Owner, Architect and Contractor.
   1. Supplier shall meet with the Owner to finalize keying requirements and obtain final instructions in writing.

D. Fire-Rated Openings: Provide hardware for fire-rated openings in compliance with NFPA Pamphlets No. 80, No. 101 and of authorities having jurisdiction requirements. Provide only hardware which has been tested and listed by UL, FM or Warnock Hersey for types and sizes of doors required and complies with requirements of door and door frame labels.
   1. Where emergency exit devices are required on fire-rated doors, (with supplementary marking on doors' UL or FM labels indicating "Fire Door to be Equipped with Fire Exit Hardware") provide UL or FM label on exit devices indicating "Fire Exit Hardware".

E. Standards: Comply with the requirements of the latest edition of the following standards, unless indicated otherwise:
   1. American National Standards Institute (ANSI) Publications:
      a. A115 Series - Door and Frame Preparation.
      b. A156 Series - Hardware.
   2. Builders Hardware Manufacturers Association (BHMA) Publications:
      a. 1201 - Auxiliary Hardware.
      b. 1301 - Materials and Finishes.
   3. Door and Hardware Institute (DHI) Publications:

a. Keying - Procedures, Systems, and Nomenclature.
b. Abbreviations and Symbols.
c. Hardware for Labeled Fire Doors.
d. Recommended Locations for Builder's Hardware for Standard and Custom Steel Doors and Frames.
e. Wood Door Standards W1, W2, WDHS-2, WDHS-3.

4. National Fire Protection Association (NFPA) Publications:
   a. NFPA Pamphlet No. 80 - Standards for Fire Doors and Windows.
5. International Building Code - current edition as adopted and amended by the authority having jurisdiction.
6. Americans with Disabilities Act (ADA).

F. Keying Conference: Conduct conference in accordance with Section 013100. In addition to Owner, Construction Manager, and Architect, conference participants shall also include Installer's Architectural Hardware Consultant. Incorporate keying conference decisions into final keying schedule after reviewing door hardware keying system including, but not limited to, the following:
1. Function of building, flow of traffic, purpose of each area, degree of security required, and plans forfuture expansion.
2. Preliminary key system schematic diagram.
3. Requirements for key control system.
4. Address and timeframe for delivery of keys and cores.

G. Preinstallation Conference: Conduct conference at Project site to comply with requirements of Section013100 as follows:
1. Architectural Finish Hardware supplier (AFHS) shall conduct the preinstallation conference at the site. The AFHS shall instruct finish hardware installer on proper installation, adjustment and troubleshooting for each operable item of finish hardware specified. The AFHS shall observe the installation and adjustment of the first three locksets, closers and exit devices.

1.5 DELIVERY, STORAGE AND HANDLING

A. Package each hardware item in separate containers with all screws, wrenches, installation instructions and installation templates. Mark or tag each box with hardware heading and door number according to approved hardware schedule.

B. Packaging of door hardware is responsibility of supplier. As material is received by hardware supplier from various manufacturers, sort and repackage in containers clearly marked with appropriate hardware set number to match set numbers of approved hardware schedule. Two or more identical sets may be packed in same container.

C. Deliver individually packaged hardware items at the proper times to the proper locations (shop or project site) for installation. Provide a complete packing list showing items, door numbers and hardware headings with each shipment.

D. Store hardware in shipping cartons above ground and under cover to prevent damage.
1. Provide secure lockup for door hardware delivered to the Project, but not yet installed. Control handling and installation of hardware items that are not immediately replaceable so that completion of the Work will not be delayed by hardware losses both before and after installation.

E. Aluminum Door Hardware - Deliver hardware for aluminum doors as directed by the door supplier for factory installation by the aluminum door manufacturer.

F. Deliver keys and permanent cores to Owner by registered mail or overnight package service.

1.6 COORDINATION

A. Templates: Obtain and distribute to the parties involved templates for doors, frames, and other work specified to be factory prepared for installing door hardware. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing door hardware to comply with indicated requirements.

B. Electrical System Roughing-in: Coordinate layout and installation of electrified door hardware with connections to power supplies, fire alarm system and detection devices, access control system, security system, and building control system, as applicable.

1.7 MAINTENANCE

A. Maintenance Tools and Instructions: Furnish a complete set of specialized tools and maintenance instructions as needed for Owner's continued adjustment, maintenance, and removal and replacement of door hardware.

B. Maintenance Service: If there are any products listed hereinafter that normally require a maintenance or service contract, provide the Owner and Architect with details and costs of standard maintenance or service contract.

PART 2 - PRODUCTS

2.1 HARDWARE - GENERAL

A. Provide the materials or products indicated by trade names, manufacturer's name, or catalog number.

B. Provide manufacturer's standard products meeting the design intent of this Specifications, free of imperfections affecting appearance or serviceability.
1. Base Metals: Produce hardware units of basic metal and forming method indicated using manufacturer's standard metal alloy, composition, temper, and hardness, but in no case of lesser (commercially recognized) quality than specified for applicable hardware units for finish designations indicated.
2. Provide hardware complete with all fasteners, anchors, instructions, layout templates, and any specialized tools as required for satisfactory installation and adjustment.
3. Hand of door: Drawings show direction of slide, swing or hand of each door leaf. Furnish each item of hardware for proper installation and operation of door movement as shown.
4. Furnish screws for installation, with each hardware item. Provide Phillips flat-head screws except as otherwise indicated or approved. Finish screws exposed under any condition to match hardware finish or, if exposed in surfaces of other work, to match finish of such other work as closely as
5. Finish all other hardware in accordance with the BHMA finish as follows, unless otherwise indicated in manufacturers screws to secure hardware.
6. Provide concealed fasteners for hardware units which are exposed when door is closed, except to extent no standard units of type specified are available with concealed fasteners. Do not use thru-bolts for installation where bolt head or nut on opposite face is exposed in other work, except where indicated otherwise or where it is not feasible to adequately reinforce the work. In such cases, provide sleeves for each thru-bolt or use sex bolt fasteners.
7. Provide factory pinned cylinders and cores.

C. Hardware is specified in the hardware schedule by set, type, and functions which have been selected as best meeting the application requirements. Acceptable products for each category are specified under PART 2 of this Specification.

2.2 SPECIAL REQUIREMENTS

A. Hinges:

1. Provide non-removable pins for all exterior doors and out-swinging corridor doors. Use nonrising pins for all other doors.
2. Pre-drill pilot holes for hinge fasteners at factory to suit hinge type.
3. Provide pivots or continuous hinges where specified.

B. Locksets:
1. Locksets shall meet or exceed ANSI Grade 1 requirements.
2. Classroom locks shall have the ability to lock outside trim from the inside via a key.
3. Provide vandle resistant levers where specified.

C. Panic Devices:
1. Non-rated panic devices are to incorporate cylinder dogging.
2. Exit devices are to incorporate a flush and tapered end cap.
3. Hardware mullions are to be of the same manufacturer as the panic device. Provide keyed mullions unless otherwise specified. Provide mullion storage kits where specified.
4. Provide electrical options as specified.

D. Closers:
1. Comply with manufacturer's recommendations for unit size based on door size, weather exposure and usage.
2. Provide parallel arms for all overhead closers, except as otherwise indicated.
3. Through-bolt all closer units, using sex bolt fasteners.
4. All surface closers shall exceed ANSI A156.4 Grade 1 requirements in all aspects as called for below. All closers shall have certification by an independent testing laboratory of 10,000,000 cycles without failure. Provide special rust inhibitive primer (SRI) where specified.
5. Closers shall maintain control of the door in all conditions. Closers shall have 3 non critical adjusting valves: latch, main and backcheck. Where specified backcheck shall take affect at 45 (AVB) degrees of opening for parallel arm closers and 70 degrees for regular arm closers. Closers with pressure relief valves are not acceptable.
6. Closer cylinders shall be cast iron. Closer pinions shall be dual heat treated. Pinion and piston shall be steel alloy. Piston diameter shall be minimum 1-1/2”.
7. Furnish all brackets, drop plates and any other necessary hardware required to insure proper installation.

E. Stops
1. Provide heavy duty and concealed or surface mounted overhead stop or holder for interior doors as specified. Provide overhead stop at any door that swings more than 140 degrees before striking wall, opens against equipment, casework, sidelights, and where conditions do not allow wall stop.
2. Provide floor stops only where specified.

2.3 KEYING

A. All keying shall be accomplished at hardware manufacturer's plant where adequate records are maintained in order to avoid duplication of changes.

B. All cylinders to be keyed to the districts existing Schlage Primus masterkey system. Hardware supplier to verify proper key system. Keying schedule must be approved by the Owner prior to ordering locks.
1. Locks and cylinders are to accept a Schlage large format interchangeable core.
2. Provide construction cylinders for all keyed exterior doors and all aluminum doors during construction. Provide 20 additional temporary cylinders for locking interior doors.
3. Provide the correct type of cylinder for each hardware application, and supply cylinder with correct tailpiece and/or cam.

C. Key all locks separately, or alike, as directed by the Owner’s representative and Architect.

D. Provide keys as follows:
   1. Change Keys: Three (3) per lock.
   2. Master Keys: Three (3) required (per system).
   3. Grand Master Keys: Five.

E. Identification: Stamp all (master-type) keys with the following:
   1. Do Not Duplicate.
   2. Key change number (all keys).

2.4 KEY CONTROL SYSTEM

A. Key Control System Manufacturers:
   1. Acceptable Manufacturers: Telkee, Lund

B. Requirements:
   1. Provide a key control system, including envelopes, labels, tags with self-locking key clips, receipt forms, 3-way visible card index, temporary markers, permanent markers, and standard metal cabinet, all as recommended by system manufacturer, with capacity for 150% of the number of locks required for the Project.
   2. Provide complete cross index system set up by the hardware supplier, and place keys on markers and hooks in the cabinet as determined by the final key schedule.

2.5 THRESHOLDS, SEALS, DOOR SWEEPS, AUTOMATIC DOOR BOTTOMS, AND GASKETING

A. Requirements:

   1. Provide thresholds, weatherstripping (including door sweeps, seals, astragals) and gasketing systems (including smoke, sound, and light) as specified and per architectural details. Match finish of other items.
   2. Provide door sweeps, seals, astragals, and auto door bottoms only of type where resilient or flexible seal strip is easily replaceable and readily available.
   3. Gasketing and astragals on aluminum frames by door manufacturuer.

2.6 SILENCERS

A. Requirements:

   1. Provide "push-in" type silencers for hollow metal or wood frames.
   2. Provide one silencer per 30 inches (762 mm) of height on each single frame, and two for each pair frame.
   3. Omit where gasketing is specified.

2.7 HARDWARE FINISHES

A. Provide matching finishes for hardware units at each door to the greatest extent possible, unless otherwise indicated. In general, match items to the finish for the latch, lock or push-pull unit for color and texture.

B. Thresholds (087100.A01): Clear, anodized aluminum.
   1. Handicap accessible threshold (087100, A02).
      a. Product description or schedule:
         1) 626 satin chrome-plated.
         2) 630 satin stainless steel.

2.8 HARDWARE PRODUCTS

A. Hinges:
   1. Specified manufacturer: IVES Hardware; an Allegion Company.
   2. Acceptable substitutions:
      a. Hager Companies.
      b. McKinney Products Company; an ASSA ABLOY Group company.
      c. Stanley Commercial Hardware; Div. of The Stanley Works.

B. Continuous Gear-Type Hinges:
   1. Specified manufacturer: IVES Hardware; an Allegion Company.
   2. Acceptable substitutions:
      a. Hager Companies.
      b. Select Products Limited.

C. Locksets:
   1. Specified manufacturer: Schlage Commercial Lock Division; an Allegion Company.
   2. Substitutions: Not allowed. Products to match District standard.

D. Electronic Strikes:
   1. Specified manufacturer: Von Duprin; an Allegion Company.
   2. Acceptable Substitutions: HES; an ASSA Abloy Company.

E. Exit Devices:
   1. Specified manufacturer: Von Duprin; an Allegion Company
   2. Substitutions: Not allowed. Products to match District standard.

F. Closers:
   1. Specified manufacturer: LCN Closers; an Allegion Company.
   2. Substitutions: Not allowed. Products to match District standard.

G. Flatgoods:
   1. Specified manufacturer: Ives Hardware; an Allegion Company.
   2. Acceptable substitutions:
      a. Burns Manufacturing Incorporated.
      b. Rockwood; an ASSA Abloy Company.

H. Stops:
   1. Specified manufacturer: Ives Hardware; an Allegion Company.
   2. Acceptable substitutions:
      a. Burns Manufacturing Incorporated.
      b. Rockwood; an ASSA Abloy Company.
      c. Trimco

I. Overhead stops:
   1. Specified manufacturer: Glynn-Johnson; an Allegion Company.
   2. Acceptable substitutions:
      a. Architectural Builders Hardware Mfg., Inc.
      b. Door Controls International.
      c. Ives Hardware; an Allegion Company.
      d. Rixson Specialty Door Controls; an ASSA ABLOY Group.
      e. Trimco.

J. Electronic components:
   1. Specified manufacturer: Schlage Electronics; an Allegion Company.
   2. Acceptable substitutions:
      a. GE-Interlogix.
      b. Security Door Controls.
      c. Camden Door Controls.

K. Thresholds:
   1. Specified manufacturer: Zero International.

2. Acceptable substitutions:
    a. Pemko Manufacturing Co. ; an ASSA Abloy Company.
    b. Reese Enterprises.
    c. National Guard Products.

L. Door Gasketing:
1. Specified manufacturer: Zero International.
2. Acceptable substitutions:
    a. Pemko Manufacturing Co. ; an ASSA Abloy Company.
    b. Reese Enterprises.
    c. National Guard Products.

M. Weatherstriping:
1. Specified manufacturer: Zero International.
2. Acceptable substitutions:
    a. Pemko Manufacturing Co. ; an ASSA Abloy Company.
    b. Reese Enterprises.
    c. National Guard Products.

PART 3 - EXECUTION

3.1 PREPARATION

A. Carefully inspect doors, frames, and conditions under which hardware will be installed. Notify the Architect of any conditions that would adversely affect the installation or subsequent door operations. Do not proceed until unsatisfactory conditions are corrected.
1. Frames shall be verified, inspected, and confirmed by General Contractor as being plumb and true.

B. Refer to Sections 081113, 081416, and 084113 for additional installation requirements.

C. Prior to hardware installation, the Hardware Supplier shall meet with the Owner's Representative, Architect, and Hardware Installer to ensure the Installer has and understands the manufacturers' installation requirements for all hardware items.
1. The Supplier shall observe the installation of the first lockset, closer and panic device.

3.2 INSTALLATION

A. Mount Hardware units at heights indicated in respective DHI Standards, except as specifically indicated or required to comply with governing regulations, and except as may be otherwise directed by Architect.

B. Install each hardware item in compliance with the manufacturer's instructions and written recommendations. Wherever cutting and fitting is required to install hardware onto or into surfaces which are later to be field finished, coordinate removal, storage and reinstallation or application of surface protections with finishing work. Do not install surface-mounted items until finishes have been completed on the substrate.

C. Set units level, plumb and true to line and location. Adjust and reinforce the attachment substrate as necessary for proper installation and operation.
1. Special care shall be taken to avoid damaging surrounding surfaces.

D. Provide fasteners and anchoring devices of suitable size, quantity, and type to secure hardware in proper position for heavy use and long life.
1. Drill and countersink units which are not factory-prepared for anchorage fasteners. Space fasteners and anchors in accordance with industry standards.

E. Adjust door closers immediately upon installation. Adjust in exact conformance with manufacturer's printed instructions. Advance backcheck to eliminate shock at dead stop. Set latching speed to assure unassisted positive latching.
   1. Degrees of swing of doors for self-limiting closers shall be maximum available.

F. Install each protection plate with a thinly-spread spot of mastic at its center to assure even contact before fastening with screws. Install all such plates on visual centers of closed doors. Set bottom edges of all such plates flush with door bottom.

G. Cut and fit thresholds to door frame profiles. Prepare thresholds for the attachment of strikes and clearance for spindles as required. Set thresholds in a continuously laid bed of polyisobutylene mastic sealant to completely fill voids and exclude moisture from every source.

H. Seal weather protection components attached to the exterior sides of doors and frames, such as drip caps and weatherstripping, in place with clear silicone caulk in such a manner as to ensure a continuously filled seam throughout the joinery.

I. Cut and fit weatherstripping accurately to provide the greatest possible continuity of the contact element. Adjust closer templating as required.

J. At exterior doors, obtain satisfactory operation of the installation, then apply a thin layer of clear silicone caulk under hinge leaves, and outside lock trim. Remove excess caulk after torquing fasteners.

3.3 ADJUST AND CLEAN

A. Adjust and check each operating item of hardware and each door, to ensure proper operation or function of every unit. Replace units which cannot be adjusted to operate freely and smoothly as intended for the application made.
   1. Clean adjacent surfaces soiled by hardware installation.

B. Final Adjustment: Wherever hardware installation is made more than one month prior to acceptance or occupancy of a space or area, return to the work during the week prior to acceptance or occupancy, and make final check and adjustment of all hardware items in such space or area. Clean operating items as necessary to restore proper function and finish of hardware and doors. Adjust door control devices to compensate for final operation of heating and ventilating equipment.

3.4 INSTRUCTION AND INSPECTION

A. Instruct Owner's Personnel in proper adjustment and maintenance of hardware and hardware finishes, during the final adjustment of hardware.

B. After hardware is installed and adjusted, the Supplier shall inspect the job with the Architect and the Contractor to determine if the hardware is functioning properly.
   1. Maintain the instruction sheets, layout templates, and any supplementary literature regarding hardware in a readable condition. Transmit all such items to the Owner's Representative, together with all spare parts, specialized tools, other accessories supplied with the hardware, and a copy of the approved hardware schedule at the time of instruction.

C. Continued Maintenance Service: Approximately six months after the acceptance of hardware in each area, the Installer, accompanied by the representative of the latch and lock manufacturer, shall return to the project and re-adjust every item of hardware to restore proper function of doors and hardware. Consult with and instruct Owner's personnel in recommended additions to the maintenance procedures. Replace hardware items which have deteriorated or failed due to faulty design, materials or installation of hardware units at no cost to the Owner. Prepare a written report of current and predictable problems (of substantial nature) in the performance of the hardware.

3.5 DOOR HARDWARE SCHEDULE

A. The hardware sets listed below represent the design intent and direction of the owner and architect. They are a guideline only and should not be considered a detailed hardware schedule. Discrepancies, conflicting hardware and missing items should be brought to the attention of the architect with corrections made prior to the bidding process.

Pre-Bid Conference

Joplin Early Childhood

Project No.:16054

Date: Oct 13, 2016
By: Ryan Walters

INTRODUCTIONS

Owner Representatives:
- Dr. Kerry Sachetta, Assistant Superintendent of Operations
- David Pettit, Project Manager
- Mark Barlass, Executive Director of Student Services
- Amanda Boyer, Director of Early Childhood

Architects/ Structural: Hollis + Miller Architects
- John Brown, Partner in Charge
- Ryan Walters, Project Architect
- David Hackney, Structural
- Phone: 816-525-5600
- rwalters@hollisandmiller.com

Grant Consultant to Hollis + Miller Architects
- Ashley Micklethwaite
- ashleymickle@outlook.com

Civil Engineer/ Geotechnical Engineer: Anderson Engineering
- Wayne Stephenson, Project Manager
- Cody White, Laboratory Manager
- Joshua Oathout, Design Engineer
- joathout@andersonengineeringinc.com

Landscape Architect: Land3 Studio
- Bob Bushyhead, Principal
- Michael Killeen, Landscape Architect
- MKilleen@land3studio.com

Mechanical/ Electrical: Smith & Boucher Eng.
- Aaron Blush - Elect
- Phone: 913.345.2172
- ablush@smithboucher.com
- Matt Heinrich – Mech/ Plumb

MHeinrich@smithboucher.com

Deloitte Associate
Travis Green
travgreen@deloitte.com

Bidders:

PROPOSAL FORM

1. Examine all Construction Documents, Project Site, and all conditions affecting the work.
2. Provide Base Bid Sum.
3. Provide Unit Prices as indicated.
4. Provide Alternate Prices (additions and deducts) as indicated.
5. Provide list of major subcontractors as indicated. (by 4:00 one day after Bid)
6. Owner reserves right to waive any informalities and to reject any or all Bids.
7. Owner, Architect, and other Bidders released from any claims relating to acceptance, non-acceptance or rejection of any Bidders.
8. The following documents must accompany all bids per CDBG Requirements (refer to Section 008400 in Project Manual)
    a. Certification of Bidder Regarding Equal Employment Opportunity
    b. Certification of Contemplated Minority, Women, and Section 3 Business Utilization
    c. Certification by Proposed Subcontractor Regarding Equal Employment Opportunity. (by 4:00 one day after Bid)

INVITATION TO BID

1. Construction Documents distributed from Springfield Blueprint Company.
2. Bid opening will be held at **November 1th at 2pm, Joplin School District Offices.**
3. Bids valid for sixty (60) days.
4. Corporations require corporate seal.
5. Each Bid is to be accompanied by a Bid Bond (or Cashier's check, or Certified check) in the amount of 5% of the total bid submitted. Check is to be made payable to Owner.
    a. Bidders discovering any discrepancies, omissions, etc., shall advise the Architect who will issue any necessary clarifications by Addendum to all listed plan holders.
    b. Faxed bids will not be accepted.

c. Bids submitted after deadline will be returned unopened.
d. Within three (3) days after selection, selected Bidders to submit:
    i. Statement of costs of major portions of Work (schedule of values).
    ii. Description of Work to be performed by Bidders own forces.
    iii. List of Job Superintendent and all Subcontractors.

SUPPLEMENTARY INFORMATION FOR BIDDERS

1. Basis for Instructions – CDBG Information For Bidders – Section 002100 and 002200 in the project manual.
2. Substitutions to follow guidelines per Section 012500. Substitutions Request form must be completed and submitted by October 21st. Must include form. Approval of substitutions will be part of final addendum on October 25th. please email substitution requests to rwalters@hollisandmiller.com

SUPPLEMENTARY GENERAL CONDITIONS

1. Basis for General Conditions – CDBG Contract – Section 007200 and 007300 in the project manual.
2. Contractor guarantees all work for one (1) year from Date of Substantial Completion.
3. Contractor shall keep up-to-date Record Drawings.
4. Weather day delays are allotted (Section – 007300).
5. Substitutions after execution of Contract constitute Changes in the Work and must be incorporated into Project by Change Order.
6. Contractor agrees to pay $1500 per day to Owner for every calendar day that the Project is not completed beyond the Contract Time until work is substantially complete, and until Contractor delivers to Owner Certificate of Occupancy.
7. Contractor shall submit three (3) notarized copies each of AIA Documents G702 and G703 - Application for Payment. Applications for Payment must be received by the Architect by the 25th of the month for submittal to Owner by last day of the month. Payment will be issued by Owner within14 days following receipt of Architect's Certification.
8. Five percent (5%) of Sum of Application for Payment retained until Project is Substantially Complete. No further retainage will be withheld provided work and performance have been satisfactory.
9. Required insurance listed Section 007200 and 007300.

ADDITIONAL INFORMATION

1. Important dates:
    a. Substitution requests: October 21 – COB to H+M
    b. Final Addendum Release: October 25
    c. Bid Opening: November 1, 2016
    d. Start of Construction: December 1st ,2016

e. Substantial Completion: July 1st , 2018
f. Final Completion: August 1st , 2018

2. Scope
    a. Approx. 38,000 sq ft, 1 story school.
    b. Load bearing structural stud walls, metal stud roof trusses, outboard continuous insulation, metal panel, EIFS and brick.
    c. All roof drainage is conductor head, gutter, downspout.
    d. Roof is mechanically fastened TPO and standing seam metal panel.
    e. High Wind Shelter – 250 mph – (4) classrooms and corridor, CMU walls, precast hollow core roof slab.
    f. Site:
        i. Roads, parking, playgrounds, play equipment
        ii. Retaining wall along north, east, and west property lines.
        iii. Known mines below portions of the site. Building sited to avoid mines and associated geology.
    g. Mech/ Plumb/Elec:
        i. Sprinkler system.
        ii. VAV Roof Top Units serving fan powered VAV boxes with electric reheat.
        iii. LED Lighting.
        iv. Instantaneous gas water heaters.
3. Alternates – see attached list
4. Unit Prices – see attached list
5. Temporary construction plan
    a. Parking lot to the east of the site is owned by the district.
    b. Electrical service will have to be relocated. Power to Irving Elementary must remain undisturbed.

<u>QUESTIONS???</u>

1. Will the general contractor be performing all special inspections / testing?
    a. Answer: All special inspections and testing will be handled by the owner.
2. On sheet C102 of the civil documents, there is an alternate listed for concrete paving instead of asphalt paving. Which is the base bid and how do you bid the two types of paving?
    a. Answer: The concrete paving alternate will be removed from the civil documents. The only bid will be for asphalt paving, plus the alternate asphalt pavement.
3. Will the general contractor be responsible for filing a land disturbance permit and who will responsible for the associated filling fee?
    a. Answer: The design team's civil engineers will prepare the land disturbance permit documents and will require the general contractor's signatures. The owner will be responsible for the filling fee and executing permit through DNR with engineers help.
4. What constitutes unsuitable soil?
    a. Refer to the Site Development section beginning on page 30 of the

Geotech Report.

5. Who will pay the temporary utility company fees etc.?
    a. Answer: Reference Article 10 of Community Development Block Grant Program General Conditions for temporary licenses and permits.
6. What is the magnitude of the project?
    a. Answer: $7,000,000.00 to $8,000,000.00.
7. Will material escalation be allowed?
    a. Answer: No material escalation will be allowed. Note, although there is a generous construction schedule, there is no need for the contractor to stretch out the construction process. Given the size and simplicity of the building a shorter construction period is anticipated but not required.
8. Where is the telecommunication information on the drawings?
    a. Refer to the power floor plans and associated notes and schedules.
9. Will non-set accelerating corrosion inhibiting admixture be used?
    a. This is deleted from the project in Addendum #2.
10. Will capillary break admixtures be used? If used, can it be added at the batch plant?
    a. Answer: Yes, capillary break admixtures will be used at all interior slabs. Refer to revised section 033000 2.17 A.2 – the admixture will be added at the jobsite or batch plant in accordance with the admixture's manufacturer's written instructions.
11. Can we use an air entrained footing mix if it meets the slump, and water / cement ratio requirements?
    a. Answer: Yes, as long as it meets slump, water / cement ratio and strength.
12. How will the verification of the 0.42 water / cement ratio be enforced?
    a. Refer to new spec information 033000 1.4.B.1.a.
13. Is super-plasticizer allowed on interior slabs on grade?
    a. Yes, as long as the water / cement ratio and strength requirements are met.
14. For the lightweight concrete topping, would we be allowed to use 18% fly ash and 5-8% air entrainment?
    a. Refer to the revised section 033000 2.15 E. Light weight concrete has been removed from the project. Normal weight concrete topping is required.

ADDENDUM 002

October 25, 2016

JOPLIN EARLY CHILDHOOD CENTER
ADDENDUM #2

SPECIFICATIONS

DRAWINGS – The following plan sheets have been modifies as follows. Replace entire sheet(s) with provided addenda.

Sheet L100 – PLAY AREA & FURNISHING PLAN
- A. **REVISE** play area surfaces

Sheet L101 – PLAY AREA ENLARGEMENT - SURFACING
- A. **REVISE** edge of artificial turf play surface
- B. **ADD** rubber surfacing within daycare play area

Sheet L102 – PLAY AREA ENLARGEMENT - LAYOUT
- A. **REVISE** layout of swings.
- B. **REVISE** layout of concrete band at artificial turf
- C. **ADD** concrete curb within daycare play area

Sheet L103 – PLAY AREA ENLARGEMENT – GRADING & DRAINAGE
- A. **REVISE** subdrain line within artificial turf area
- B. **ADD** subdrain line within rubber surface area

Sheet L104 – PLAY AREA ENLARGEMENT – PLAYGROUND EQUIPMENT
- C. **REVISE** layout of swings.

Sheet L110 – PLAY AREA DETAILS
- A. **REVISE** detail #6
- B. **REVISE** detail #11

Sheet L200 – LANDSCAPE PLAN (BASE BID)
- A. **REVISE** plants in northwest play area
- B. **REMOVE** plants within daycare play area

Sheet L202 – LANDSCAPE PLAN ALTERNATES
- A. **REVISE** plants in northwest play area

Sheet L210 – PLAY AREA DETAILS
- A. **REVISE** detail #8

Sheet L300 – IRRIGATION PLAN (BASE BID)
- A. **REVISE** irrigation layout in northwest play area
- B. **REMOVE** irrigation within daycare play area
- C. **REVISE** irrigation schedule

Sheet L301 – IRRIGATION PLAN ALTERNATE
- A. **REVISE** irrigation layout in northwest play area

ANDERSON ENGINEERING
EMPLOYEE OWNED

ADDENDUM NO. 2

Issued: October 25, 2016

Project: Joplin Early Childhood, Package No. 2
2810 South McClelland Blvd
Joplin, Missouri 64804

Project No. 50040-16

Owner: Board of Education
Joplin Schools
3901 E. 32nd Street
Joplin, Missouri 64801

Bidding Documents Issued: September 30, 2016

This Addendum is hereby made a part of the Contract Documents to the same extent as if it were originally included therein. Receipt of this Addendum shall be acknowledged on the Proposal Form.

Any Specification Sections and Drawings attached herein shall hereby be made a part of the Contract Documents.

This Addendum includes these 3 page[**s**] and the following attachments:

Drawings:

Civil: C100, C102, C103, C104, C105, C106, and C109 consisting of 7 pages.

Added Details:

Civil: Typ. Mining Feature Structural Cap consisting of 1 page.

GENERAL – BIDDER'S QUESTIONS

G1 **QUESTION:** Is alternate seven contractor's choice of retaining wall? We choose if we want to construct it of modular block or cast in place concrete?

G1.1 Answer: Yes, alternate 7 will be contractor's choice between modular block and cast in place. The big difference between the base bid and the alternate bid is the

amount of traffic the retaining walls will be seeing. The base bid is for a retaining wall that is emergency vehicle traffic rated only. The base bid retaining wall is expected to possibly see on average 1 emergency vehicle every couple years on the gravel road above the retaining wall. This base bid retaining wall is under the assumption that the City of Joplin can keep regular Vehicular traffic other than emergency vehicles off the gravel road. The alternate bid is for a retaining wall which will receive constant vehicular traffic loads. The alternate retaining wall will allow the owner in the future to build a paved road over the currently existing gravel drive which will result in the alternate retaining wall to receive constant traffic loads.

G2 **QUESTION:** On addendum sheet C104 note D17 calls out HDPE pipe but says 4'x4'? D15 says its 18". Is D17 24" per the note about the downspout drains on the North side of the building?

G2.1 Answer: D17 should be an 18" HDPE pipe. The note about the downspout drains will be changed to dive 8" HDPE pipes into 18" stormpipe.

PROJECT MANUAL REVISIONS

DRAWINGS REVISIONS

C1 SHEET C100 – OVERALL SITE PLAN

C1.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete.

C2 SHEET C102 – SITE GEOMETRY PLAN

C2.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete.

C3 SHEET C103 – SITE GRADING PLAN

C3.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete.

C4 SHEET C104 – STORMWATER PLAN - SITE

C4.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete. Downspout note changed to dive 8" HDPE pipes into 18" stormpipe instead of 24". D17 size changed in Drainage Structures Index to show 18" instead of 4'x4' and Top elevation was changed to N/A. Area inlets were updated in the drainage structure table to show top elevation. Drainage structure table item D2 was updated and no longer shows top elevation. Water quality swale in drainage structures updated to show N/A for size. Water quality swale size shown with contours on sheet C103.

C5 SHEET C105 – STORMWATER POLLUTION PREVENTION PLAN

C5.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete.

C6 SHEET C106 – UTILITY PLAN

C6.1 Removed the planting beds w/in the daycare alternate footprint and replaced w/ concrete. Grease trap removed from the plan sheet.

C7 SHEET C109 – ADD ALTERNATES

C7.1 Add Alternate 7 note changed to provide cost for poured retaining wall OR block wall alternate. This will be contractor's choice between a poured wall or modular block wall. Add Alternate Modular Block Retaining Wall Detail has been added to the sheet. Refer to Question G1 for more information regarding base bid and add alternate retaining walls.

DETAIL REVISONS

D1 TYP. MINING FEATURE STRUCTURAL CAP

D1.1 This detail has been added as a typical detail only for use of bidding purposes. This item should be a unit rate bid item due to the uncertainty of the amount of structural caps needed at the site. Typical installations of structural caps require 1 to 2 boulder truck loads. Any mine features discovered will need to be evaluated on a case by case basis to verify this design applies. It is likely during excavation that mine features will be discovered which will require a structural cap. All earthwork excavation should be done according to the civil drawings and geotech report. Refer to the geotech report for additional information regarding mining on site. Anderson Engineering must be notified of any suspected or possible mine features encountered prior to beginning excavation of suspected mine feature. Anderson Engineering must be present during excavation of any suspected mine feature.

END OF ADDENDUM NO. 2

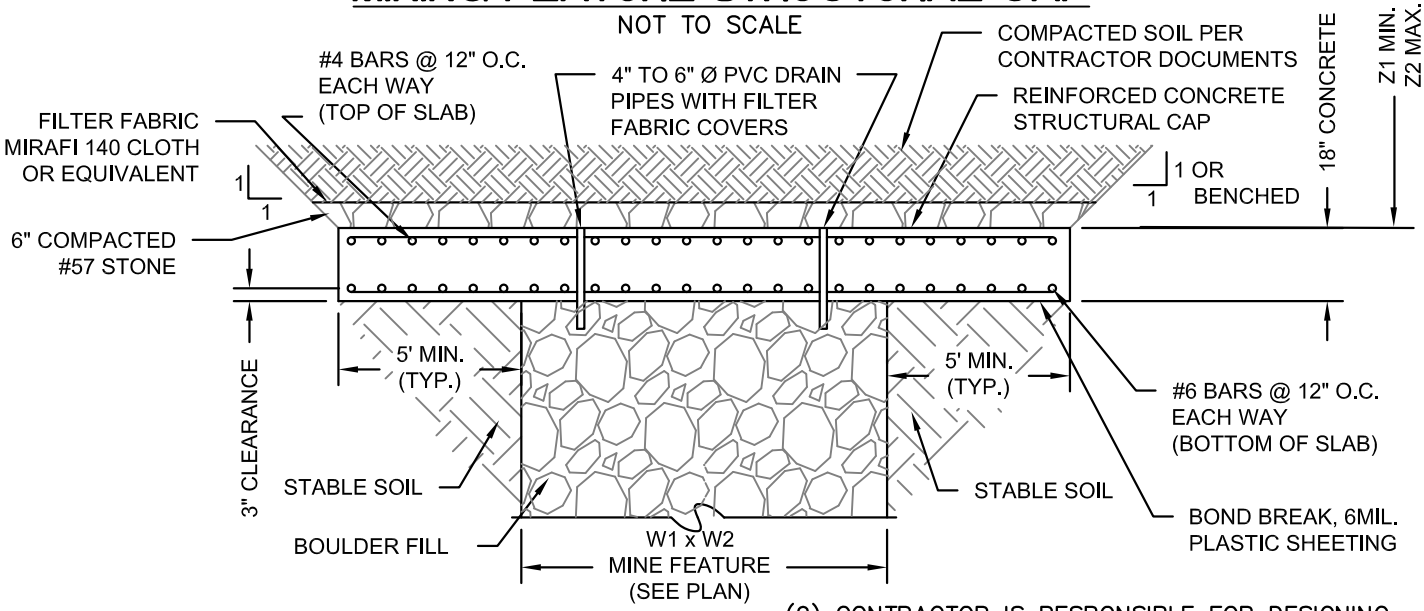
MINING FEATURE STRUCTURAL CAP

NOT TO SCALE



NOTE:

1) CLEAN LOOSE SOIL AND DEBRIS FROM BOTTOM OF EXCAVATION PRIOR TO PLACING BOULDER FILL.
2) THE FIRST LAYER OF BOULDER FILL SHOULD BE NESTLED INTO THE SOILS AT THE BOTTOM OF THE EXCAVATION. SUCCESSIVE LAYERS OF BOULDER FILL SHOULD BE PLACED AND CONSOLIDATED WITH THE EXCAVATION BUCKET UNTIL A DENSE CONDITION IS ACHIEVED.
3) ANDERSON ENGINEERING SHOULD BE PRESENT DURING MINE FEATURE EXCAVATION, DURING PLACEMENT OF BOULDER FILL AND TO VERIFY SOIL BEARING FOR STRUCTURAL CAP AND DIMENSIONS.
4) MINIMUM COMPRESSIVE CONCRETE STRENGTH:
   f'c= 4000PSI @ 28 DAYS
   (3000PSI MINIMUM FOR PLACEMENT OF FILL ON STRUCTURAL CAP)
5) REINFORCING STEEL fy = 60,000PSI
6) POINT COORDINATES ARE UNAVAILABLE. ENGINEER OF RECORD OR THEIR REPRESENTATIVE MUST BE PRESENT DURING EXCAVATION TO FIELD VERIFY DESIGN DEPTHS AND DIMENSIONS AND TO VERIFY SOIL BEARING CAPACITY.
7) SURVEY POINTS FOR AS-BUILT CONDITIONS.
8) MINING FEATURE STRUCTURAL CAP IS DESIGNED TO ADDRESS ONLY THE MINE FEATURE OBSERVED AT THE SURFACE. IT DOES NOT ADDRESS ANY DEEPER MINE FEATURES OR OPENINGS THAT MAY BE PRESENT.
9) CONTRACTOR IS RESPONSIBLE FOR DESIGNING THE EXCAVATION SLOPES AND OR TEMPORARY SHORING AND BRACING. CARE MUST BE TAKEN NOT TO REMOVE REQUIRED SUPPORT FOR EXISTING FOUNDATIONS.
10) THIS IS A TYPICAL DETAIL ONLY FOR USE OF BIDDING PURPOSES. ANY MINE FEATURES DISCOVERED WILL NEED TO BE EVALUATED ON A CASE BY CASE BASIS TO VERIFY THIS DESIGN APPLIES.

The information included herein represents mechanical, electrical, and plumbing (MEP) modifications to the Bid Documents dated 09-30-16and shall be incorporated into the overall information for "ADDENDUM #2" dated 10-24-2016 as issued by the Architect.

PROJECT MANUAL:

1. **Section 271323 – Communications Optical Fiber Backbone**
   - Add entire section.

2. **Section 282300 – Video Surveillance**
   - Add entire section.

DRAWINGS:

1. **ME201 – SITE PLAN**
   A. See full size drawing for added flagpole lighting.

2. **E201A – FLOOR PLAN - AREA A - POWER**
   A. See full size drawing for added security camera locations.
   B. See full size drawing for added intercom push button locations.
   C. See full size drawing for revised vestibule and lobby layouts.

3. **E202B – FLOOR PLAN - AREA B - POWER**
   A. See full size drawing for added security camera locations.
   B. See full size drawing for added intercom push button locations.

4. **E203C – FLOOR PLAN - AREA C - POWER**
   A. See full size drawing for added security camera locations.
   B. See full size drawing for added intercom push button locations.
   C. See full size drawing for location of secondary IT switch and revised cable tray routing.

5. **E301 – SCHEDULES - ELECTRICAL**
   A. See full size drawing for added in-grade lighting for flagpole.

GENERAL NOTES:

1. **CLARIFICATION OF ELECTRICAL SPECIAL SYSTEMS**.
   A. Intercom system includes talk back speakers in classrooms with intercom push buttons near classroom entrances.
   B. Secured entrance system includes door contacts at indicated exterior doors. Cabling to be routed back to a central security station where each door can be individually scheduled for arming and duration that door is able to be opened before triggering the alarm. Manual remote system arm/disarm keypads are near the secured exterior doors.
   C. Main entrance to include a pushbutton request to enter with audio intercom connection with front desk. When main entrance doors are scheduled to be locked (during school hours), remote pushbutton at front desk shall temporarily unlock the exterior vestibule door to allow entrance.
   D. Video surveillance system to be standalone for the Early Childhood Center with functionality similar to other district systems. Coordinate requirements with owner.

END OF MEP ITEMS FOR "ADDENDUM #2"

SECTION 271323 - COMMUNICATIONS OPTICAL FIBER BACKBONE CABLING

PART 1 - GENERAL

1.1 SUMMARY

A. Provide a complete intra-building (premises) and inter-building (campus) optical fiber backbone cabling system in accordance with these Contract Documents. Including but not limited to, the following:
   1. Optical fiber cables.
   2. Splices (where required by these Contract Documents).
   3. Necessary installation and supporting hardware.

1.2 RELATED SECTIONS INCLUDE THE FOLLOWING

A. Except as modified by governing codes and by the Contract Documents, comply with the applicable provisions, requirements, and recommendations in Sections 27 00 00 - “Communications” and 27 13 00 – “Communications Backbone Cabling.”

1.3 CODES, REFERENCES, AND STANDARDS

A. Follow all applicable codes, references, and standards listed in Sections 27 00 00 - “Communications” and 27 13 00 – “Communications Backbone Cabling.”

1.4 WARRANTIES

A. As required by Section 27 13 00 – “Communications Backbone Cabling.”

1.5 SUBMITTALS

A. Follow the requirements for submittals in Sections 27 00 00 - “Communications” and 27 13 00 – “Communications Backbone Cabling.”

B. The following submittals are due at the “pre-construction” phase submission:
   1. Shop Drawings: As required by Section 27 13 00 – “Communications Backbone Cabling”
   2. Provide a typed list indicating part name, manufacturer, part number, and color (if applicable) for products specifically identified herein by the exact and complete part number (no wild-card characters)
   3. Submit manufacturers’ cut sheets or catalog cut sheets for all parts not specifically identified by its exact part number and for any product the installer is seeking to use as an equivalent replacement for a specified product.
   4. Required warranty information as indicated herein and elsewhere in this Division.

C. The following submittals are due at the “Project Completion” phase submission:
   1. As-built Drawings: As required by Section 27 13 00 – “Communications Backbone Cabling.”
   2. Warranty Certificate.
   3. Full test results sorted numerically by fiber strand ID.

PART 2 - PRODUCTS

2.1 OPTICAL FIBER CABLE SPECIFICATIONS

A. General Optical Fiber Cable Requirements:
   1. See Division 27 and backbone (riser) diagram(s) on the Drawings for required fiber counts.
   2. Cable shall meet the transformation performance and physical specifications of ANSI/TIA-568 latest standard revision.
   3. Cable jacket marking: Must be legible and shall contain the following information:
      a. Manufacturer’s name and trade mark
      b. Fiber size
      c. Fiber Grade
      d. UL listing (MUST be suitable for the application)
      e. Sequential length markings
   4. Cable jacket color shall be:

a. ORANGE for standard multi-mode fiber optic cable
b. AQUA for laser optimized 50/125 um multi-mode fiber optic cable
c. YELLOW for single-mode fiber optic cables

B. Multi-mode Inter-building/OSP Optical Fiber Backbone Cable Requirements:
1. Optical fiber specifications:
a. Cable jacket must be outside plant only, distribution loose tube and suitable for installation such environments; do not use the indoor/outdoor rated fiber
b. Cable jacket rating must be consistent with manufacturer's requirements to be covered under warranty specified in Section 27 13 00 – "Communications Backbone Cabling".
c. Maximum allowable attenuation (db/km) is 1.0 at 1310nm and 1.0 at 1550nm
d. Low water peak
e. Dispersion shifted fiber optic construction.
f. Manufacturer shall be:
1) Superior Essex, 110123T01 or pre-approved equal
2) 12-strands, 250um jacketed Yellow jacket

C. Multi-mode Intra-building; Optical Fiber Backbone Cable Requirements.
1. Cabling does not leave foot print of interior building wall assemblies
2. Plenum rated Optical fiber specifications:
a. Cable jacket must be plenum rated (OFNP), multi-mode 50/125um laser optimized, OM3 fiber
b. Number of strands as indicated on the drawings
c. With a modal bandwidth of 2000Mhz•km @ 850 nm 500Mhz•km @ 1300 nm for laser optimized 50/125 µm
d. Maximum allowable attenuation (db/km) is 3.5 at 850nm and 1.5 at 1300nm.
e. Manufacturer shall be:
1) Superior Essex, 44012BG01 or pre-approved equal
2) 12-strands, 900 um buffer Aqua jacket
3. Non-plenum riser rated Optical fiber specifications:
a. Cable jacket must be non-plenum, riser rated (OFNR), multi-mode 50/125um laser optimized, OM3 fiber
b. Number of strands as indicated on the drawings
c. With a modal bandwidth of 2000Mhz•km @ 850 nm 500Mhz•km @ 1300 nm for laser optimized 50/125 µm
d. Maximum allowable attenuation (db/km) is 3.5 at 850nm and 1.5 at 1300nm.
e. Manufacturer shall be:
1) Superior Essex, 43012BG01 or pre-approved equal
2) 12-strands, 900 um buffer Aqua jacket

2.2 SPLICES

A. In general, optical fiber cables are not to be spliced except where indicated otherwise in the Drawings and Specifications.

B. Where splicing is indicated in the Drawings and Specifications, multi-mode and single-mode optical fiber cable splicing shall be fusion splicing.

C. Factory pre-terminated optical fiber pig-tails (Contractor's option): Instead of field terminating the optical fiber backbone cables onto appropriate type connectors, the Contractor may choose to splice the optical fiber cables near their termination points in the Telecommunications rooms to connectors that have been factory pre-terminated with optical fiber pig-tails. The following requirements apply to the use of this termination approach:
1. Rack mounted splice tray enclosures shall be by the same manufacturer as the optical fiber connector panels.
2. Trays shall be used to hold all splices.
3. Splice trays shall be stored in a rack mountable splice enclosure that allocates space for fiber trays and storage of excess fiber. Splice Trays are not to be located within the same fiber enclosure where the fiber connectors are mounted unless the enclosure was designed to do so.
4. Optical fiber cables shall be labeled at the splice trays.

D. Maximum allowable loss for splices is 0.3 db.

PART 3 - EXECUTION

3.1 CABLE INSTALLATION

A. General:
1. Place all optical fiber backbone cabling in accordance with these specifications, and as indicated on the cable schedules and the Drawings.
2. Splices between riser rated optical fiber cables and factory connectorized pigtails are permitted, but not required at each fiber termination location indicated on the Drawings. Pre-terminated riser cables meeting the material specifications may be utilized.
3. Comply with all referenced standards and guidelines.

B. Pre-installation testing:
1. Optical fiber cables: Perform visible light continuity check on each fiber before installing the fiber trunk cable in the backbone pathway. If one end is not accessible: perform OTDR test to assure fiber continuity; this test should be performed soon after receiving the product so as to not delay the project should the reel have to be replaced.

C. Optical Fiber Backbone Cables:
1. Place optical fiber between the telecommunications rooms as noted in the cable schedules and the Drawings.
2. Optical fiber cable is to be installed within inner duct at all locations where it is within nominal 4-inch conduit and supported by cable tray.-see Telecommunications drawings for details
3. Support optical fiber riser cables with suitable support grips. After being supported, the optical fiber cables will be routed over to the optical fiber patch panel in that particular Telecommunications room

3.2 OPTICAL FIBER MAIN DISTRIBUTION FRAME

A. Optical fiber cables shall be routed to each of the Telecommunications Rooms via conduits, trays and riser sleeves. See the Drawings.

B. Optical fiber cables shall enter the Fiber Distribution Frame from the top of the frame and then routed to the connector and splice modules/shelves.

C. The Fiber Distribution Frame shall be attached to the structural concrete floor, to the cable ladder above and adjacent racks, frames or cabinets. See Specification Section 27 11 16 – “Communications Cabinets, Racks, Frames and Enclosures”

3.3 ACCEPTANCE

A. Upon receipt of the Contractor’s documentation of cable testing, the General Contractor and/or Engineer will review/observe the installation and randomly request tests of the cables/wires installed.

END OF SECTION 271323

SECTION 282300 - VIDEO SURVEILLANCE

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes video surveillance system equipment consisting of
   1. Cameras.
   2. Video Management System.
   3. Video Servers and Storage.
   4. Wiring.

1.3 DEFINITIONS

A. AGC: Automatic gain control.

B. B/W: Black and white.

C. CCD: Charge-coupled device.

D. VMS: Video Management System.

E. LED: Light Emitting Diode

F. MPEG: Moving picture experts group.

G. NTSC: National Television System Committee.

H. UPS: Uninterruptible power supply.

1.4 FUNCTIONAL DESCRIPTION OF SYSTEM

A. Video surveillance system shall consist of Video Management Software (VMS). Video of security events occurring within areas having video surveillance areas shall be “pushed” to VMS client stations for observation by responsible control station.

B. The VMS shall provide video surveillance of persons desiring passage through security barriers, remote monitoring of areas not under continuous staff supervision, and other areas of security concern.

C. Video surveillance system monitors may display full screen video images, or up to 32 camera images on a single screen. Monitor locations are shown on the contract drawings with video content originating from VMS client stations having multiple DVI or HDMI monitor outputs.

D. Video surveillance system shall consist of IP cameras, Powered Over Ethernet (POE), connected to a 1000T based Ethernet security network having multiple network switches.

E. Video Recording will be provided for all cameras.
   1. Capacity for recording of cameras shall be provided to allow a minimum of 21 days of recording at 10 frames per second, using highest camera resolution with mild (10% or less) H.264 compression.
   2. Video recording shall be by rack mounted video servers running video management software.
   3. Servers shall have fault tolerant RAID 1 or better fault tolerant operating system drives.
   4. Video servers shall have an onboard DVD burner for archiving selected video files.
   5. Video storage shall be by direct-attached, hot swappable RAID 6 configured hard drives.
   6. A monitor, keyboard, and KVM switch shall be provided within the Equipment Rack in Tel Rm G121 for direct access and management of each video sever, and storage within the equipment rack. The monitor

and keyboard shall have access to all management features of each sever, as well as the ability to view any of the connected cameras in the facility.

7. Program camera titles and on-screen placement as coordinated with the Owner.
8. Develop and program camera tours or views as coordinated with the Owner. At the Owner's discretion, tours/views may or may not include the use of the quad displays. Adjust sequence and dwell of each tour as requested by the Owner.

1.5 SURGE AND TAMPER PROTECTION

A. Refer to Division 28 Section "General Requirements Electronic Safety and Security".

B. Interference Protection: Component function shall be unaffected by radiated-radio-frequency interference and electrical induction of 15 V/m over a frequency range of 10 to 10,000 MHz, or by conducted interference signals up to 0.25-V RMS injected into power supply lines at 10 to 10,000 MHz.

1.6 SUBMITTALS

A. The following submittals are due at the "Bid" phase submission:
   1. Provide unit prices for the following:
      a. Camera Pricing:
         1) Supply unit pricing for the addition/deletion of each type of camera.

B. The following submittals are due at the "Pre-construction" phase submission:
   1. Product Data: For each type of product indicated, including dimensions and data on features, performance, electrical characteristics, ratings, and finishes.
      a. Network Video Storage: Sizing calculations.
         1) Storage size estimate for each type of camera per location type (hallway, gymnasium, cafeteria, etc.)
         2) Schedule with all cameras listed and total storage required for video management system.
   2. Shop Drawings: Detail assemblies of standard components that are custom assembled for specific application on this Project.
      a. Conduit routing and cable fill data for each conduit run.
      b. Diagrams for cable management system within equipment rooms.
      c. System labeling schedules, including electronic copy of labeling schedules.
      d. Wiring Diagrams.
         1) Functional Block diagram of system component connections identifying cable numbers and types.
         2) Typical wiring schematics.
         3) Power, signal, and control wiring, and grounding.
         4) Point-to-point wiring schedules or diagrams.
      e. Dimensioned plan and elevations of equipment racks, control panels, and consoles. Show access and workspace requirements.
      f. Camera title sheets for coordination of camera titles with Owner.
      g. Camera tour sheets for Owner coordination pre-populate with tours identified by these specifications with adequate space for required additional Owner designated tours. Note that Owner retains the right to differ tour assignment selections until after substantial completion, but before final completion.
   3. Equipment List: Include every piece of equipment by model number, manufacturer, serial number, location, and date of original installation. Add pretesting record of each piece of equipment, listing name of person testing, date of test, set points of adjustments, name and description of the view of preset positions, description of alarms, and description of unit output responses to an alarm.
   4. Field quality-control test reports.
   5. Operation and Maintenance Data: For cameras, power supplies, monitors, digital video recorders, video switches, and control-station components to include in emergency, operation, and maintenance manuals. In addition to items specified in Division 01 Section "Operation and Maintenance Data" include the following:
      a. Lists of spare parts and replacement components recommended to be stored at the site for ready access.
   6. Warranty: Special warranty specified in this Section.

1.7 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

B. Comply with NECA 1.

C. Comply with NFPA 70.

1.8 PROJECT CONDITIONS

A. Environmental Conditions: Capable of withstanding the following environmental conditions without mechanical or electrical damage or degradation of operating capability:
   1. Central Equipment: Rated for continuous operation in ambient temperatures of 60 to 85 deg F (16 to 29 deg C) and a relative humidity of 20 to 80 percent, noncondensing.
   2. Interior, Controlled Environment: System components, except central equipment, installed in air-conditioned interior environments shall be rated for continuous operation in ambient temperatures of 36 to 122 deg F (2 to 50 deg C) dry bulb and 20 to 90 percent relative humidity, noncondensing. NEMA 250, Type 1 enclosures.
   3. Exterior Environment: System components installed in locations exposed to weather shall be rated for continuous operation in ambient temperatures of minus 30 to plus 122 deg F (minus 34 to plus 50 deg C) dry bulb and 20 to 90 percent relative humidity, condensing.
   4. Security Environment: Camera housings for use in high-risk areas where surveillance equipment may be subject to physical violence.

1.9 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace components of cameras, equipment related to camera operation, and control-station equipment that fail in materials or workmanship within specified warranty period.
   1. Warranty Period: Two year from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. In other Part 2 articles where titles below introduce lists, the following requirements apply to product selection:
   1. Manufacturers: Subject to compliance with requirements, provide products by one of the manufacturers specified.

2.2 IP CAMERAS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   1. Axis.
   2. Sony.
   3. Pre-approved equal.

B. Refer to Contract Drawing’s camera legend for performance specifics and allowable models meeting performance requirements.

2.3 LENSES

A. Description: Optical-quality coated optics, designed specifically for video surveillance applications, and matched to specified camera. Provide color-corrected lenses with color cameras.
   1. Auto-Iris Lens: Electrically controlled iris with circuit set to maintain a constant video level in varying lighting conditions.
   2. Fixed Lenses: Auto remote focus.
   3. Zoom Lenses: Motorized, remote-controlled units, rated as "quiet operating." Features include the following:
      a. Electrical Leads: Filtered to minimize video signal interference.
      b. Motor Speed: Variable.
      c. Lens shall be available with preset positioning capability to recall the position of specific scenes.

2.4 POWER SUPPLIES

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   1. Altronix.
   2. Bosch.

3. Pelco.
4. Pre-approved equal.

B. Power Supplies: Low-voltage power supplies matched for voltage and current requirements of cameras and accessories, type as recommended by camera manufacturer.
1. Power supplies shall be UL and CSA certified, and NEC compliant for Class 2 circuits.
2. Provide fused outputs for each camera for 24VAC service.
3. No more than one camera supplied per output termination where POE is insufficient.
4. Provide power limiting.
5. Do not exceed 80VA per power supply.
6. Enclosure: Type 1.

2.5 CAMERA SUPPORTING EQUIPMENT

A. Minimum Load Rating: Rated for load in excess of the total weight supported times a minimum safety factor of two.

B. Mounting Brackets for Fixed Cameras: Type matched to items supported and mounting conditions. Include manual pan and-tilt adjustment.

C. Secure mounting equipment with expansion anchors rated for the load, independent of other anchors.

2.6 VIDEO MANAGEMENT SYSTEM

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
1. ExacqVision.
2. Pre-approved equal.

B. The video management system (VMS) shall be an enterprise-class client/server based IP video security solution that provides seamless management of digital video, audio and data across an IP network. The video management system shall work with CCTV products as part of a total video security management system to provide full virtual matrix switching and control capability. Cameras, recorders, and viewing stations may be placed anywhere in the CCTV system IP network.

C. The system's server components shall run on Windows 7 Pro or Windows 2008 Server.

D. The system's clients shall run on Windows XP Pro, Windows 7 or Windows 8 Pro and Apple/ Intel based Macintosh with OS X package.

E. The VMS shall not charge for the number of concurrent clients.

F. The VMS software shall provide at no additional charge a purpose built mobile application capable of viewing multiple simultaneous live video streams and playing a recorded video stream. Application shall be provided for both iOS and Android operating systems (including Kindle Fire).

G. Provide a web client interface
a. Internet Explorer 6.0 or Later
b. Safari
c. Firefox
d. Opera
e. Chrome

H. Support for all standard and high definition H.264 and MPEG-4 Encoders, decoders, IP Cameras, IP PTZs.

I. The VMS shall not require the manufacturer to be contacted when a camera fails.

J. The VMS shall allow the use of maps. The maps will be accessible to users with the appropriate permission levels and display video sources and their status.

K. The VMS shall not require a database when recording video.

L. Recording Time: 21 days at full resolution.

M. Frame Rate: 10 frames per second.

N. Provide at least 10 different and independent programmable recording schedules. The schedules may be programmed to provide different record frame rates for day, night, and weekend periods as well as special days. Advanced task schedules may also be programmed that could specify allowed logon times for user groups, when events may trigger alarms, and when data backups should occur.

O. VMS and workstation software must have the ability to digitally zoom on live video and playback video. The encrypted video player must also have the ability to digitally zoom on video.

P. Allow the establishment of user groups that have access rights to specific cameras, rights for exporting video, and access rights to system event log files. Access to live, playback, auxiliary commands shall be programmable on an individual camera basis.

Q. Auto discover all cameras and IP video devices.

2.7 VIDEO SERVERS

A. Network Video Servers
   1. Provided by owner.

B. System Health Monitoring
   1. Client-server monitoring system required for the video surveillance deployment.
      a. Connection loss on any IP camera
      b. Hard drive failure
      c. System temperature alerts
      d. Loss of server connection
   2. Central monitoring of the status of all servers is needed.

C. Client stations shall be connected to the ESN for remote viewing of camera video, both real-time and recorded. Software client must be capable of running natively on Windows XP Pro, Windows 7 or Windows 8 Pro and Apple/Intel based Macintosh with OS X package.

PART 3 - EXECUTION

3.1 WIRING

A. Comply with requirements in Division 28 Section "General Requirements for Electronic Safety and Security" for conduit requirements.

B. Wiring within Enclosures: Bundle, lace, and train conductors to terminal points with no excess and without exceeding manufacturer's limitations on bending radii. Provide and use lacing bars and distribution spools.

C. Splices, Taps, and Terminations: For power and control wiring, use numbered terminal strips in junction, pull, and outlet boxes; terminal cabinets; and equipment enclosures. Tighten electrical connectors and terminals according to manufacturer's published torque-tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A and UL 486B.

D. Grounding: Provide independent-signal circuit grounding recommended in writing by manufacturer.

3.2 VIDEO SURVEILLANCE SYSTEM INSTALLATION

A. Set pan unit and pan-and-tilt unit stops to suit final camera position and to obtain the field of view required for camera. Connect all controls and alarms, and adjust.

B. Install power supplies and other auxiliary components at control stations, unless otherwise indicated.

C. Install tamper switches on components indicated to receive tamper switches, arranged to detect unauthorized entry into system component enclosures, and mounted in self-protected, inconspicuous positions.

D. Identify system components, wiring, cabling, and terminals according to Division 26 Section "Identification of Electrical Systems."

E. Perfect all fixed camera views with respect to aiming, field of view, and focus at the Owner's direction.

3.3 FIELD QUALITY CONTROL

A. Manufacturer's Field Service: Engage a factory-authorized service representative to inspect field-assembled components and equipment installation and supervise pretesting, testing, and adjusting of video surveillance equipment.

B. Inspection: Verify that units and controls are properly installed, connected, and labeled, and that interconnecting wires and terminals are identified.

C. Pretesting: Align and adjust system and pretest components, wiring, and functions to verify that they comply with specified requirements. Conduct tests at varying lighting levels, including day and night scenes as applicable. Prepare video surveillance equipment for acceptance and operational testing as follows:
1. Prepare equipment list described in Part 1 "Submittals" Article.
2. Verify operation of auto-iris lenses.
3. Set back-focus of fixed focal length lenses. At focus set to infinity, simulate nighttime lighting conditions by using a dark glass filter of a density that produces a clear image. Adjust until image is in focus with and without the filter.
4. Set back-focus of zoom lenses. At focus set to infinity, simulate nighttime lighting conditions by using a dark glass filter of a density that produces a clear image. Additionally, set zoom to full wide angle and aim camera at an object 50 to 75 feet (17 to 23 m) away. Adjust until image is in focus from full wide angle to full telephoto, with the filter in place.
5. Set and name all preset positions; consult Owner's personnel.
6. Set sensitivity of motion detection.
7. Connect and verify responses to alarms.
8. Verify operation of control-station equipment.

D. Test Schedule: Schedule tests after pretesting has been successfully completed and system has been in normal functional operation for at least 14 days. Provide a minimum of 10 days' notice of test schedule.

E. Operational Tests: Perform operational system tests to verify that system complies with Specifications. Include all modes of system operation. Test equipment for proper operation in all functional modes.

F. Remove and replace malfunctioning items and retest as specified above.

G. Record test results for each piece of equipment.

H. Retest: Correct deficiencies identified by tests and observations and retest until specified requirements are met.

3.4 ADJUSTING

A. Occupancy Adjustments: When requested within 12 months of date of Substantial Completion, provide on-site assistance in adjusting system to suit actual occupied conditions and to optimize performance of the installed equipment. Tasks shall include, but are not limited to, the following:
1. Check cable connections.
2. Check proper operation of cameras and lenses. Verify operation of auto-iris lenses and adjust back-focus as needed.
3. Adjust all preset positions; consult Owner's personnel.
4. Recommend changes to cameras, lenses, and associated equipment to improve Owner' utilization of video surveillance system.
5. Provide a written report of adjustments and recommendations.

3.5 CLEANING

A. Clean installed items using methods and materials recommended in writing by manufacturer.

B. Clean video surveillance system components, including camera-housing windows, lenses, and monitor screens.

3.6 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain video surveillance equipment.
   1. Train Owner's maintenance personnel on procedures and schedules for troubleshooting, servicing, and maintaining equipment.
   2. Demonstrate methods of determining optimum alignment and adjustment of components and settings for system controls.
   3. Review equipment list and data in maintenance manuals. Refer to Division 01 Section "Operation and Maintenance Data."
   4. Conduct a minimum of four hours' training as specified in instructions to Owner's employees in Division 01 Section "Demonstration and Training."

3.7 SUPPORT AND MAINTANENCE

A. Response Time
   1. Emergency Service – maximum of 8 hour service response required if the following should happen:
      a. Server Failure
      b. Multi-camera outage
   2. Standard Service – maximum of 24 hour response required for any other malfunction in the system.

GENERAL ARCH. NOTES

1. DO NOT SCALE DRAWINGS. USE FIGURED DIMENSIONS ONLY. VERIFY ALL DIMENSIONS PRIOR TO START OF WORK. IN THE EVENT OF DISCREPANCY, NOTIFY ARCHITECT AND OBTAIN RESOLUTION BEFORE PROCEEDING.
2. NOTIFY THE ARCHITECT OF ANY AND ALL DISCREPANCIES BETWEEN EXISTING CONDITIONS AND THE CONTRACT DOCUMENTS BEFORE PROCEEDING WITH THAT PORTION OF WORK. FAILURE TO NOTIFY THE ARCHITECT WILL NOT RELIEVE THE CONTRACTOR OF RESPONSIBILITY TO PERFORM THE WORK AS INTENDED BY THE CONTRACT DOCUMENTS. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL WORK ARISING FROM SUCH FAILURE TO COORDINATE DISCREPANCIES TO THE SATISFACTION OF THE ARCHITECT.
3. ALL SLEEVES, OPENINGS ETC FOR CONDUIT, PIPES, DUCTS ETC (OUTSIDE OF RATED CHASES) THROUGH FLOOR SLABS AND RATED PARTITIONS ARE TO BE FIRE SEALED IN ACCORDANCE WITH FIRE RATED ASSEMBLY DESIGNS, APPLICABLE CODES AND FIRE MARSHALS REQUIREMENTS
4. PROVIDE A MINIMUM OF 3/4" FIRE RETARDANT TREATED WOOD BLOCKING OR 18GA MINIMUM STEEL PLATE BLOCKING AS REQUIRED WITHIN STEEL STUD FRAMED PARTITIONS FOR SECURE AND PROPER ATTACHMENT OF NEW WORK, INCLUDING BUT NOT LIMITED TO A/V EQUIPMENT, MILLWORK, VISUAL DISPLAY SURFACES, SIGNAGE, AND FURNISHINGS WHERE INDICATED ON PLANS.
5. CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING ALL DIMENSIONS, ELEVATIONS AND DETAIL SHOWN ON THE DRAWINGS. ANY DISCREPANCIES WHICH WILL PREVENT THE ACCOMPLISHMENT OF INTENT SHOWN ON DRAWINGS SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE ARCHITECT. INDICATED CONDITIONS ARE NOT INTENDED AS REPRESENTATIONS OR WARRANTIES OF ACCURACY. IT IS EXPRESSLY UNDERSTOOD THAT THE OWNER WILL NOT BE RESPONSIBLE FOR INTERPRETATIONS OR CONCLUSIONS DRAWN BY THE CONTRACTOR.
6. ON FLOOR PLANS ALL DIMENSIONS ARE TO FACE OF STUD OR BLOCK UNLESS OTHERWISE NOTED. (2)

ALTERNATES

ALTERNATES - ADDITIONS

1. ADD EXTERIOR DOORS AT CLASSROOMS AND ALL ASSOICATED PAVING - SEE CIVIL, LANDSCAPE AND ARCHITECTURAL ALTERNATE SHEETS AND THE DOOR SCHEDULE.
2. ADD THREE CLASSROOMS AND ALL ASSOCIATED SUPPORT ROOMS - SEE CIVIL, LANDSCAPE, ARCHITECTURAL AND STRUCTURAL ALTERNATE SHEETS AND THE DOOR SCHEDULE.
3. ADD FLOOR DRAINS AT ALL SINGLE TOILET ROOMS - SEE PLUMBING DRAWINGS.
4. EXPAND PARKING LOT - SEE CIVIL SHEETS.
5. PROVIDE MOD BIT ROOF IN LIEU OF TPO. PROVIDE ALL NECESSARY BLOCKING, CANT STRIPS ETC. TO ALLOW THE MOD BIT SYSTEM TO COMPLY WITH BASE BID WALL HEIGHTS AND ROOFING TRANSITIONS - SEE SPECIFICATIONS.
6. PROVIDE ADDITIONAL LANDSCAPING FEATURES - SEE LANDSCAPE DRAWINGS.
7. PROVIDE ENHANCED RETAINING WALL IN LIEU OF BASE BID. SEE CIVL ALTERNATE SHEETS AND NOTES FOR PARAMETERS.

ALTERNATES - DEDUCTION

A. REPLACE CLEARSTORY IN AREA B WITH SKYLIGHTS - SEE ALTERNATE SHEETS AND SPECIFICATIONS.

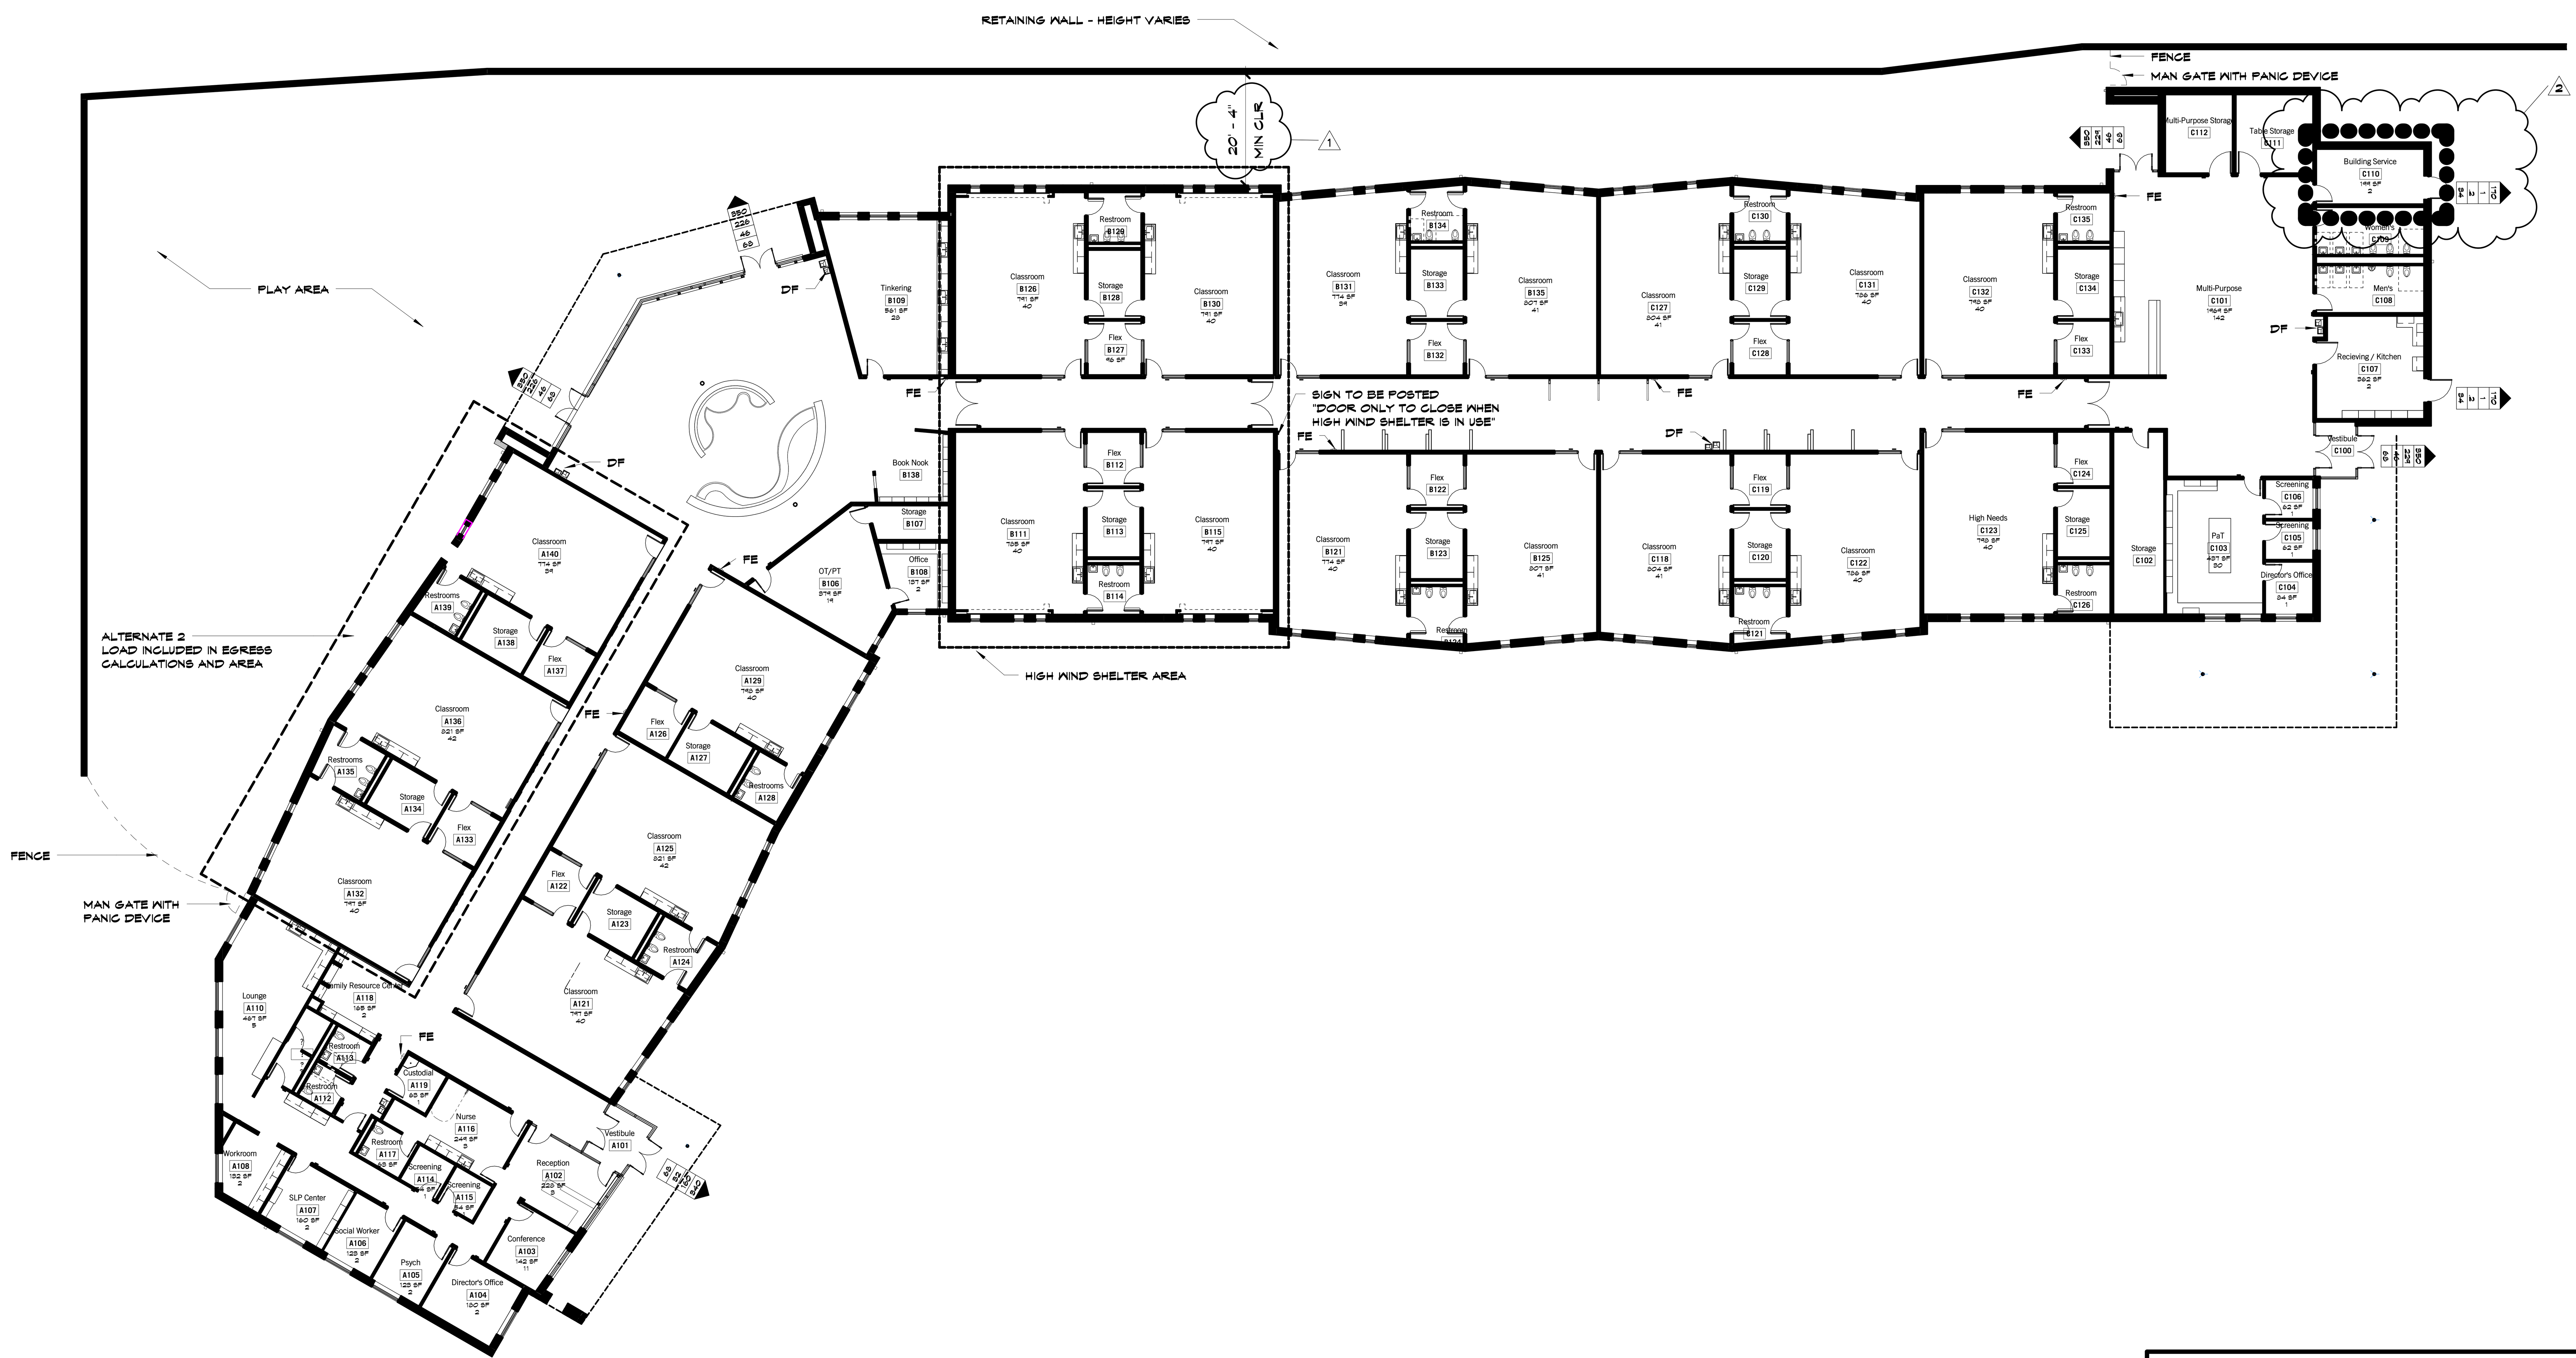
GENERAL PROJECT INFORMATION



FIRE PROTECTION ITEMS

ACTIVE FIRE PROJECTION PROVIDED:
NFPA 13 FIRE SPRINKLER SYSTEM:
- * REQUIRED FOR BUILDING HEIGHT AND AREA INCREASES;
- * PROVIDED THROUGHOUT BUILDING

FIRE ALARM SYSTEM:
- * MANUAL FIRE ALARM SYSTEM NOT REQUIRED WITH SPRINKLERS.
- * SMOKE DETECTORS AT HORIZONTAL EXITS FOR HOLD OPENS
- * AUDIBLE/VISUAL DEVICES PROVIDED THROUGHOUT COMMON SPACES AND IN CLASSROOMS.

PASSIVE FIRE PROTECTION PROVIDED:
- * CONSTRUCTION TYPE II-B, NON-COMBUSTIBLE, NON-PROTECTED.
- * TWO-HOUR FIRE WALLS BETWEEN BUILDINGS, 90-MINUTE RATED DOORS.
- * INCIDENTAL USE AREAS-STORAGE>100 SF - SMOKE RESISTANT WALLS
- * CORRIDORS - NOT RATED WITH FIRE SPRINKLERS.

PROJECT INFORMATION

TYPE OF CONSTRUCTION	II B
OWNER	JOPLIN SCHOOLS
OWNER ADDRESS	310 W. 8TH STREET JOPLIN, MO 64802
FIRE DEPARTMENT	JOPLIN FIRE DEPARTMENT
ANTICIPATED OCCUPANCY	AUGUST 2018

PROJECT CODES

THE FOLLOWING CODES WERE USED FOR THIS PROJECT:

30 — NUMBER OF OCCUPANTS

ALLOWABLE AREA CALCULATIONS

$$I_f = 100\left[\frac{F}{P} - 0.25\right]\frac{W}{30} \quad \text{(Equation 5-2)}$$

where:
I_f = Area increase due to frontage (percent).
F = Building perimenter which fronts on a public way or open space having 20 feet open minimum width.
P = Perimeter of entire building.
W = Minimum width of public way or open space.

$$I_f = 100\left[\frac{1088}{1148} - 0.25\right]\frac{28}{30}$$

I_f = 65%

506.1 General. Ther areas limited by Table 503 shall be permitted to be increased due to frontage (If) and automatic sprinkler system protection (Is) in accordance with the following:

$$A_a = A_t + \left[\frac{A_t I_f}{100}\right] + \left[\frac{A_t I_s}{100}\right] \quad \text{(Equation 5-1)}$$

where:
A_a = Allowable area per floor (square feet).
A_t = Tabular area per floor in accordance with Table 503 (square feet).
I_f = Area increase due to frontage (percent) as calculated in accordance with Section 506.2.
I_s = Area increase due to sprinkler protection (percent) as calculated in accordance with Section 506.3.

$$A_a = 14{,}500 + \left[\frac{14{,}500 \times 65\%}{100}\right] + \left[\frac{14{,}500 \times 300\%}{100}\right]$$

A_a = 14,500 + 9,425 + 43,500

A_a = 67,425 SF

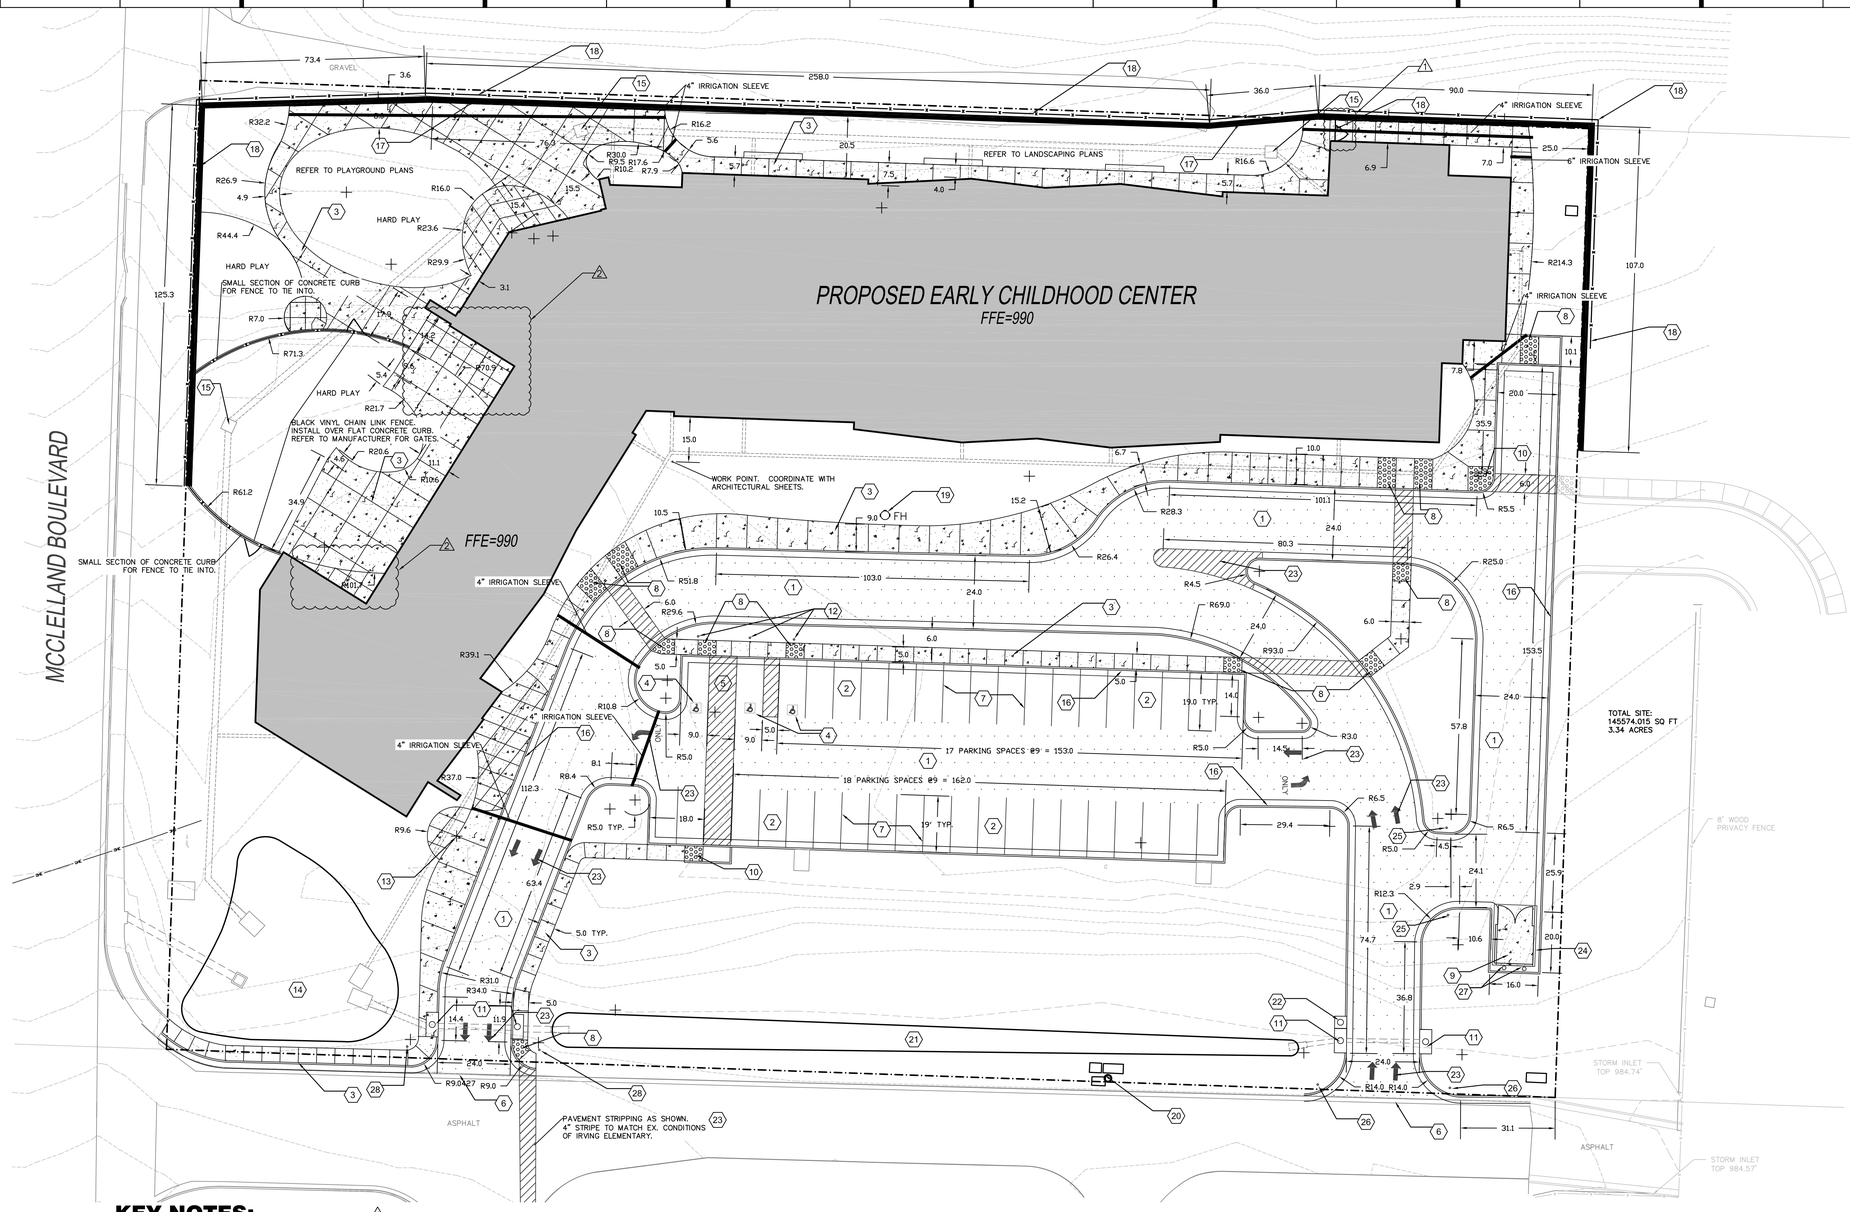
OVERALL SITE PLAN



KEY NOTES:

1. HEAVY DUTY ASPHALT PAVING REFER TO DETAIL 2/C107.
2. STANDARD DUTY ASPHALT PAVING IN PARKING: REFER TO DETAIL 1/C107
3. CONCRETE SIDEWALK: REFER TO DETAIL 10/C107.
4. HANDICAP PARKING SYMBOL: REFER TO DETAIL 3/C107.
5. HANDICAP ACCESS UNLOADING ZONE: SLOPE 2% MAX. EACH WAY (ADA COMPLIANT) AND STRIPE AS SHOWN. REFER TO DETAIL 2/C103.
6. LIMITS OF NEW PAVING: SEE DETAIL 9/C107.
7. PARKING LOT STRIPING: SYSL4" (TYP.)
8. ADA STANDARD RAMP: REFER TO DETAIL 4/C108, 5/C108 AND 6/C108
9. TRASH PAD CONCRETE PAVING-HEAVY DUTY CONCRETE: MIN. 14'x20'; REFER TO DETAIL 7/C107.
10. TYPE A ADA RAMP. REFER TO DETAIL 11/C108.
11. 4' X 8' CURB INLET REFER TO DETAIL 9/C108.
12. ADA SIGN ON POST: REFER TO DETAIL 4/C107. PROVIDE BEHIND SIDEWALK.
13. FLAG POLE LOCATION
14. WATER QUALITY POND REFER TO LANDSCAPING PLANS.
15. STORM INLET: REFER TO STORM WATER PLANS.
16. CURB AND GUTTER: REFER TO DETAIL 14/C107
17. INTERLOCKING MODULAR BLOCK RETAINING WALL: CONTRACTOR TO PROVIDE ENGINEERED SUBMITTALS FOR RETAINING WALL TYPE, LOCATION, TIEBACKS, ETC. RETAINING WALL TO BE EMERGENCY VEHICLE TRAFFIC RATED. TIEBACKS TO BE LOCATED ALONG GRAVEL DRIVE PER MANUFACTURER REQUIREMENTS FOR LIVE TRAFFIC LOADING. REFER TO GRADING PLAN & DETAIL 7/C108 FOR ADDITIONAL DETAILS. SEE SHEET C109 FOR ALTERNATES.
18. CHAIN LINK FENCE: REFER TO DETAIL 12/C108.
19. FIRE HYDRANT ASSEMBLY REFER TO DETAIL 8/C108
20. NEW LOCATION OF ELECTRIC BOX AND VAULT. WORK TO BE DONE BY EMPIRE ELECTRIC.
21. WATER QUALITY SWALE: REFER TO GRADING PLAN/LANDSCAPING PLANS
22. 4' X 4' CURB INLET. CURB INLET SHOULD MEET JOPLIN STANDARDS AND SPECIFICATIONS.
23. STRIPING AS SHOWN. SEE DETAIL 11/C107.
24. TRASH ENCLOSURE. REFER TO ARCH DETAILS.
25. BUS ONLY SIGN: PROVIDE SUBMITTALS
26. ENTRANCE ONLY SIGN: PROVIDE SUBMITTALS
27. CONCRETE BOLLARD: REFER TO DETAIL 4/C107.
28. EXIT ONLY SIGN: PROVIDE SUBMITTALS.

GENERAL NOTES:

A. ALL SITE DIMENSIONS TO THE EDGE OF PAVEMENT, CONCRETE OR PROPERTY LINE UNLESS OTHERWISE NOTED.

B. CONTRACTOR TO FIELD VERIFY EXISTING CONDITIONS BY DETAILED INSPECTION PRIOR TO SUBMITTING BID AND STARTING CONSTRUCTION.

B. COORDINATE WORK WITH OTHER SITE RELATED DEVELOPMENT DRAWINGS.

C. REFER TO STRUCTURAL PLANS FOR DEVELOPMENT OF SIDEWALKS ADJACENT TO FOUNDATIONS.

D. REFER TO ARCHITECTURAL PLANS FOR EXACT BUILDING DIMENSIONS.

E. DIMENSIONS THAT LOCATE THE BUILDING ARE MEASURED TO THE OUTSIDE FACE OF THE BUILDING.

F. SIGN CONSTRUCTION AND PAVEMENT MARKINGS SHALL CONFORM TO THE REQUIREMENTS OF THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (MUTCD), LATEST EDITION.

PAVEMENT MARKING KEY:

SYSL4" - SINGLE YELLOW SOLID LINE, 4" WIDE

PAINT LEGEND	
BOLLARDS	SURFACES SHOULD BE CLEAN, DRY AND METAL SURFACES FREE OF HEAVY RUST. 2 COATS SHERWIN WILLIAMS - KEM 4000 ACRYLIC ALKYD ENAMEL SAFETY YELLOW B55Y300.
STRIPING AND HANDICAP STRIPING	SURFACES SHOULD BE CLEAN, DRY, TOP COAT SHERWIN WILLIAMS - PRO MAR TRAFFIC MARKING PAINT YELLOW TM5495
HANDICAP PARKING "SYMBOLS" ONLY	SURFACES SHOULD BE CLEAN, DRY, TOP COAT SHERWIN WILLIAMS - PRO MAR TRAFFIC MARKING PAINT "H.C." BLUE

NOTE: SEE ARCHITECTURAL PLANS FOR EXACT BUILDING DIMENSIONS.

INTERLOCKING MODULAR BLOCK RETAINING WALL NOTE: RETAINING WALL TO MEET MANUFACTURER'S GUIDELINES AND REQUIREMENTS. ALL RETAINING WALL SUBMITTALS TO BE ENGINEERED BY MANUFACTURER & REVIEWED BY CIVIL ENGINEER FOR CONFORMANCE AND ACCEPTANCE PRIOR TO ORDERING MATERIALS.

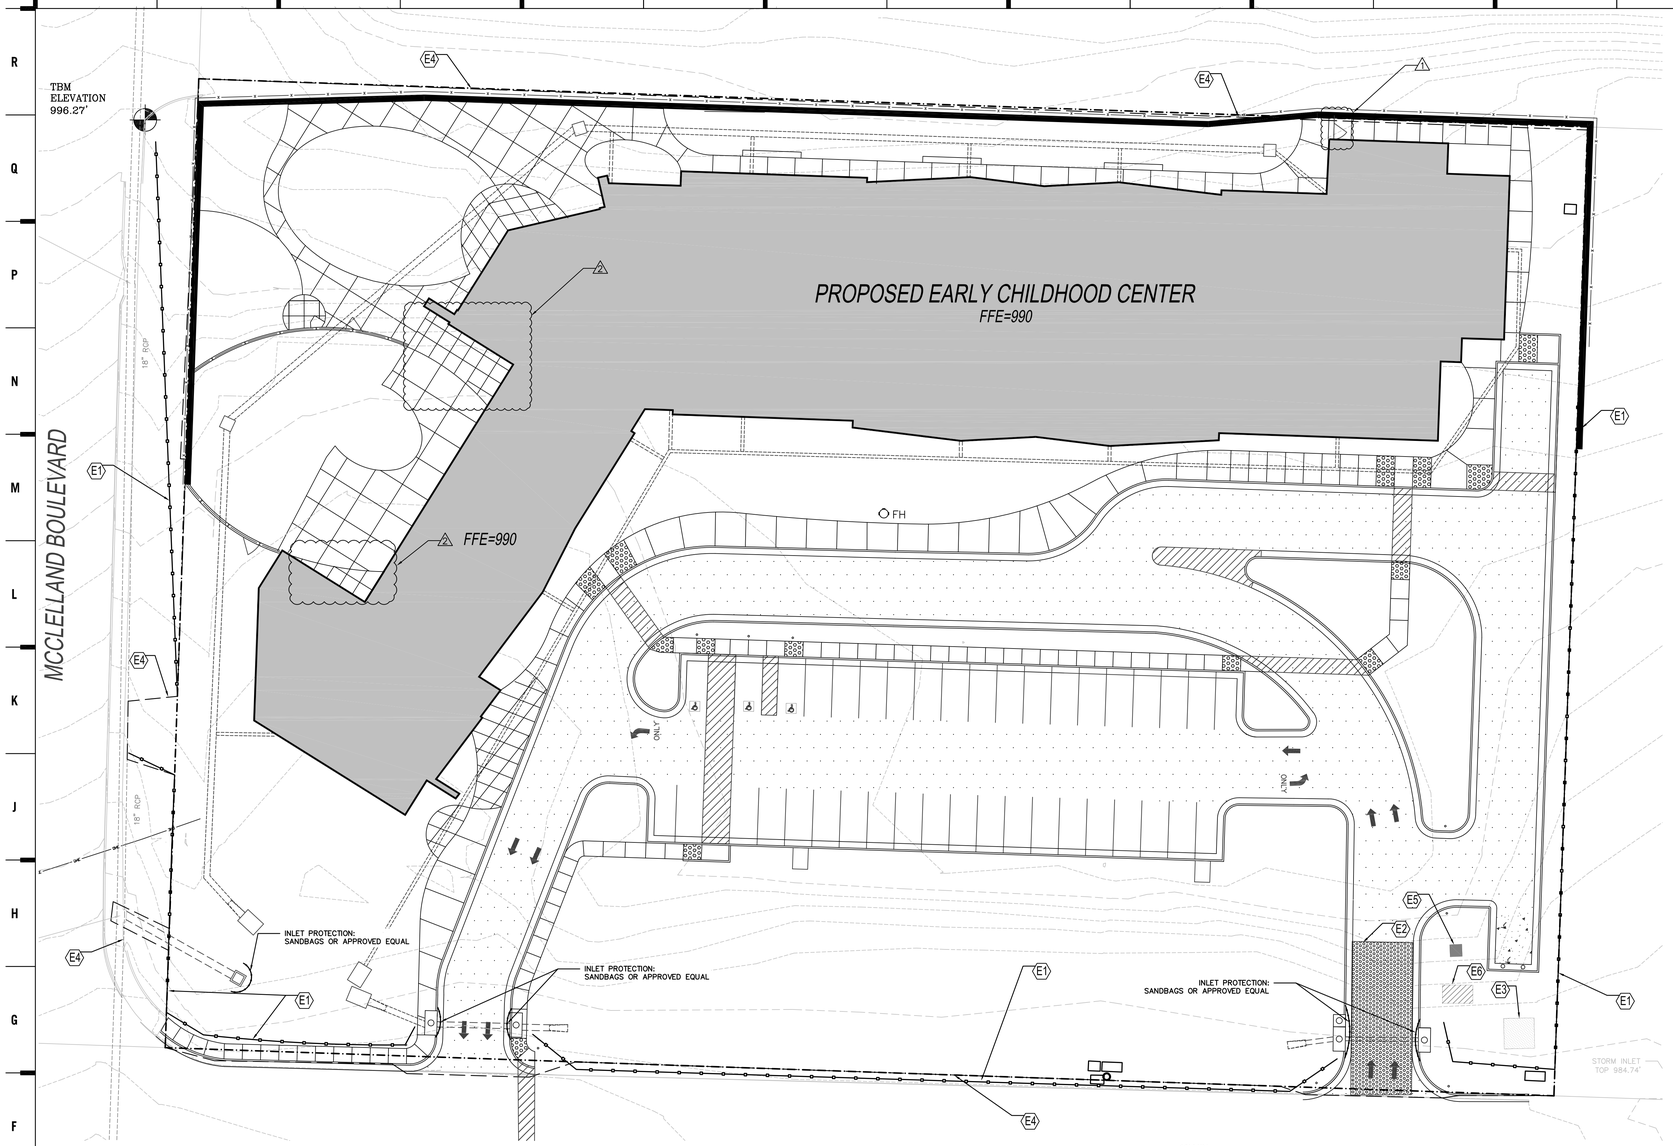
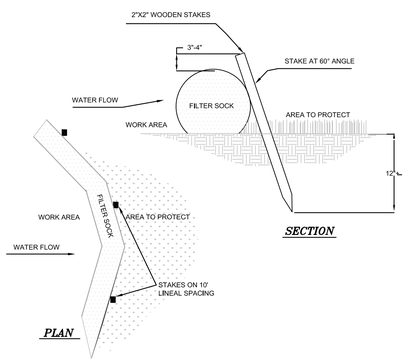
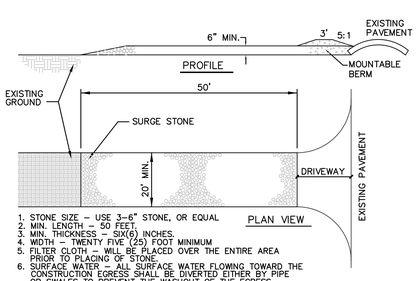
STORMWATER PLAN - SITE





1 COMPOSITE FILTER SOCKS

C105 SCALE: NOT TO SCALE



1. STONE SIZE – USE 3–6" STONE, OR EQUAL
2. MIN. LENGTH – 50 FEET.
3. MIN. THICKNESS – SIX(6) INCHES.
4. WIDTH – TWENTY FIVE (25) FOOT MINIMUM
5. FILTER CLOTH – WILL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING OF STONE.
6. SURFACE WATER – ALL SURFACE WATER FLOWING TOWARD THE CONSTRUCTION EGRESS SHALL BE DIVERTED EITHER BY PIPE OR SWALES TO PREVENT THE WASHOUT OF THE EGRESS.
7. MAINTENANCE – THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS–OF–WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND, AND REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACKED ONTO PUBLIC RIGHTS–OF–WAY MUST BE REMOVED IMMEDIATELY.

DRY DENTION POND

DRY DETENTION POND TO BE CONSTRUCTED AT COMMENCEMENT OF SITE GRADING TO TEMPORARILY ACT AS SEDIMENT SETTLING POND. POND SHALL BE CLEANED OF SEDIMENT AS NEEDED AND UPON SITE STABILIZATION.

RIP-RAP NOTE:

PLACE RIP-RAP IN ALL PLACES AS INDICATED ON THE PLAN. THE STONE FOR RIP-RAP SHALL CONSIST OF FIELD STONE OR ROUGH UNHEWN QUARRY STONE AS NEARLY AS UNIFORM, IN SECTION AS PRACTICAL. THE STONES SHALL BE DENSE, RESISTANT TO THE ACTION OF AIR AND WATER, AND SUITABLE IN ALL ASPECTS FOR THE PURPOSE INTENDED UNLESS OTHERWISE SPECIFIED. RIP-RAP SHALL CONSIST OF MATERIAL WITH A PREDOMINANT ROCK SIZE OF 6", A MAXIMUM ROCK SIZE OF 10", AND A GRADATION SUCH THAT NO MORE THAN 15% WILL BE LESS 3". STONES SHALL BE PLACED A MINIMUM OF 12" BELOW FINISH GRADE. ALL RIP-RAP SHALL BE PLACED OVER GEOTEXTILE FILTER FABRIC.

EROSION CONTROL

1. RETAIN FLOATABLE WIND BLOWN MATERIALS ON SITE BY STORING ALL TRASH AND BUILDING MATERIAL WASTE IN ENCLOSURES UNTIL PROPER DISPOSAL AT OFF-SITE FACILITIES. CHECK ADJACENT AREAS DAILY AND PICK UP CONSTRUCTION WASTE MATERIALS AND DEBRIS THAT HAVE BLOWN OR WASHED OFF SITE.
2. PERMANENTLY STABILIZE ALL SURFACE AREA WITHIN AND ADJACENT TO THIS SITE THAT IS DISTURBED BY VEHICLES, GRADING AND OTHER CONSTRUCTION FOR THE PROPOSED FACILITY. STABILIZATION IS OBTAINED WHEN THE DISTURBED SURFACE IS COVERED WITH STRUCTURES, PAVING AND OR PERENNIAL VEGETATION HAVING A UNIFORM COVERAGE DENSITY OF AT LEAST 70%. STABILIZATION OF ALL DISTURBED AREA IS REQUIRED BEFORE TERMINATING MAINTENANCE AND REMOVAL OF EROSION CONTROL MEASURES.
3. CONTRACTORS SHALL INSPECT POLLUTION CONTROL MEASURES AT LEAST ONCE EVERY 14 DAYS AND WITHIN 24 HOURS AFTER A STORM EVENT OF 1/2 INCH OR GREATER. DAMAGED MEASURES THAT PROVE TO BE INEFFECTIVE SHALL BE REPLACED WITH MORE EFFECTIVE MEASURES OR ADDITIONAL MEASURES WITHIN SEVEN DAYS. REPEATED FAILURE OF A CONTROL MEASURE REQUIRES INSTALLATION OF A MORE SUITABLE DEVICE TO PREVENT DISCHARGE OF POLLUTANTS FROM THE CONSTRUCTION SITE.
4. INSTALLATION OF ADDITIONAL EROSION CONTROL MEASURES MAY BE REQUIRED BY GOVERNING AUTHORITY. CONTRACTOR TO VERIFY REQUIREMENTS PRIOR TO BEGINNING ANY WORK ON PROJECT SITE.
5. CARE SHALL BE TAKEN TO MINIMIZE THE ENCROACHMENT OF SEDIMENT INTO ALL STORM DRAIN APPURTENANCES, PUBLIC STREETS, AND ONTO PRIVATE PROPERTY UNTIL IMPERVIOUS MATERIAL (ROAD/PARKING AREA SURFACE) IS APPLIED OR UNTIL PROPOSED LANDSCAPE HAS BEEN ESTABLISHED.
6. ALL GRASS AREAS WHERE SLOPES EXCEED 3:1 (H:V) SHALL BE STABILIZED WITH TEMPORARY TURF REINFORCEMENT MATS. INSTALLATION OF TEMPORARY TURF REINFORCEMENT MATS SHALL BE TO MANUFACTURER'S SPECIFICATIONS. CONTRACTOR SHALL CONTACT MANUFACTURER TO COORDINATE PROPER INSTALLATION OF TEMPORARY TURF REINFORCEMENT MATS TO PREVENT SLOPE FAILURES AND EROSION.
7. SEE SWPP BOOKLET FOR ADDITIONAL INSTRUCTIONS.

STAGES OF CONSTRUCTION:

1. CONTRACTOR TO PERFORM DETAILED SITE INSPECTION TO LOCATE ALL EXISTING UTILITIES AND VERIFY ANY POSSIBLE CONFLICTS WITH PROPOSED IMPROVEMENTS PRIOR TO BEGINNING ANY CONSTRUCTION. CONTACT ENGINEER WITH ANY CONFLICTS.
2. INSTALLATION OF EROSION CONTROL MEASURES.
3. INSTALLATION OF ALL STORM WATER DRAINAGE IMPROVEMENTS.
4. FINAL GRADING.
5. PLACEMENT OF FINAL LANDSCAPING ITEMS AND SOD.
6. REMOVAL OF EROSION CONTROL MEASURES.

GENERAL NOTES:

1. ALL WORK, MATERIALS, AND DETAILS SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF THE CITY OF JOPLIN STANDARD SPECIFICATIONS, DATED MAY 31, 2016. CONTRACTORS SHALL OBTAIN A COPY OF THESE STANDARDS TO ENSURE COMPLIANCE.
2. EXISTING UTILITIES AND UNDERGROUND INSTALLATIONS HAVE BEEN LOCATED TO THE GREATEST EXTENT PRACTICAL THROUGH REVIEW OF CONSTRUCTION PLANS AND SURFACE OBSERVATIONS. THE CONTRACTOR SHALL FIELD VERIFY ALL HORIZONTAL AND VERTICAL LINES AND GRADES OF EXISTING UTILITIES PRIOR TO THE CONSTRUCTION OF IMPROVEMENTS. THE CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY UPON DISCOVERING A DISCREPANCY BETWEEN THE CONTRACT DRAWINGS AND ACTUAL FIELD CONDITIONS. CONTACT ONE CALL: 1-800-344-7483.
3. THE CONTRACTOR MUST COORDINATE CONSTRUCTION WITH THE NECESSARY AUTHORITIES.
4. NO WORK SHALL COMMENCE UNTIL ALL NECESSARY PERMITS ARE OBTAINED BY THE OWNER.
5. PROVIDE POSITIVE DRAINAGE AWAY FROM ANY BUILDINGS WITHOUT PONDING ON PARKING LOTS OR SIDEWALKS. ALL IMPROVED RUNOFF TO DRAIN TO DRAINWAYS.
6. ALL CONTOURS AND SPOT ELEVATIONS SHOWN ARE FINISH GRADE.
7. THE REMOVAL OF ANY TREES GREATER THAN 7 INCHES IN DIAMETER AT BREAST HEIGHT (DBH) ARE TO BE CLEARED WITH THE CITY PRIOR TO REMOVAL.
8. ANY DAMAGE TO EXISTING STRUCTURES, VEGETATION, OR IMPROVEMENTS RESULTING FROM NEW CONSTRUCTION ACTIVITIES SHALL BE REPAIRED BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.

SANITARY SEWER NOTES:

ALL 4" AND 6" SANITARY SEWER SERVICE LINES SHALL BE SCHEDULE 40 PVC. ALL 4" SANITARY SEWER SERVICE LINES SHALL HAVE A 2% MINIMUM SLOPE AND 6" SANITARY SEWER SERVICE LINES SHALL HAVE A 1% MINIMUM SLOPE. INSTALL CLEAN OUTS AT ALL CHANGES IN SLOPE AND/OR GEOMETRY AND @ EVERY 100'.

AT&T CONDUIT NOTES:

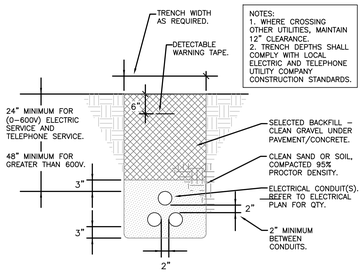
PRIOR TO PURCHASING AND INSTALLING, CONTRACTOR SHALL COORDINATE MATERIALS AND INSTALLATION WITH AT&T.

FIRE LINE NOTES:

INSTALL ALL BENDS FOR 6" WATER LINE WITH NECESSARY MECHANICAL RESTRAINED JOINT AND MECHANICAL RESTRAINED FITTINGS PER THE STANDARD SPECIFICATIONS FOR THE CITY OF JOPLIN.

INSTALL DOUBLE CHECK DETECTOR VALVE ASSEMBLY AT WEST CONNECTION OF 6" FIRE LINE TO WATER MAIN ON MCCLELLAND STREET PER ALL MISSOURI DEPARTMENT OF NATURAL RESOURCES AND MISSOURI AMERICAN WATER REQUIREMENTS. CONTRACTOR MAY REUSE ANY EXISTING DOUBLE CHECK DETECTOR VALVE ASSEMBLY IF INSPECTION AND TESTING IS APPROVED BY A QUALIFIED INSTALLER.

FIRE DEPARTMENT SHALL APPROVE EXACT LOCATION OF HYDRANTS PRIOR TO INSTALLATION.



2 C106 UNDERGROUND ELECTRICAL CONDUITS
SCALE: NOT TO SCALE

SPECIAL NOTE:
CONTRACTOR IS RESPONSIBLE FOR ALL PUBLIC UTILITY CONNECTIONS (ELECTRIC, WATER, GAS, SEPTIC, SEWER) AS WELL AS PROVIDING ALL INFRASTRUCTURE REQUIRED BY UTILITY COMPANIES.

WATER VAULT NOTE:
WATER VAULT TO BE RELOCATED 15' WEST TO ALLOW FOR BUILDING OF RETAINING WALL. COORDINATE WITH UTILITY COMPANY FOR RELOCATION AND LINE PLACEMENTS.

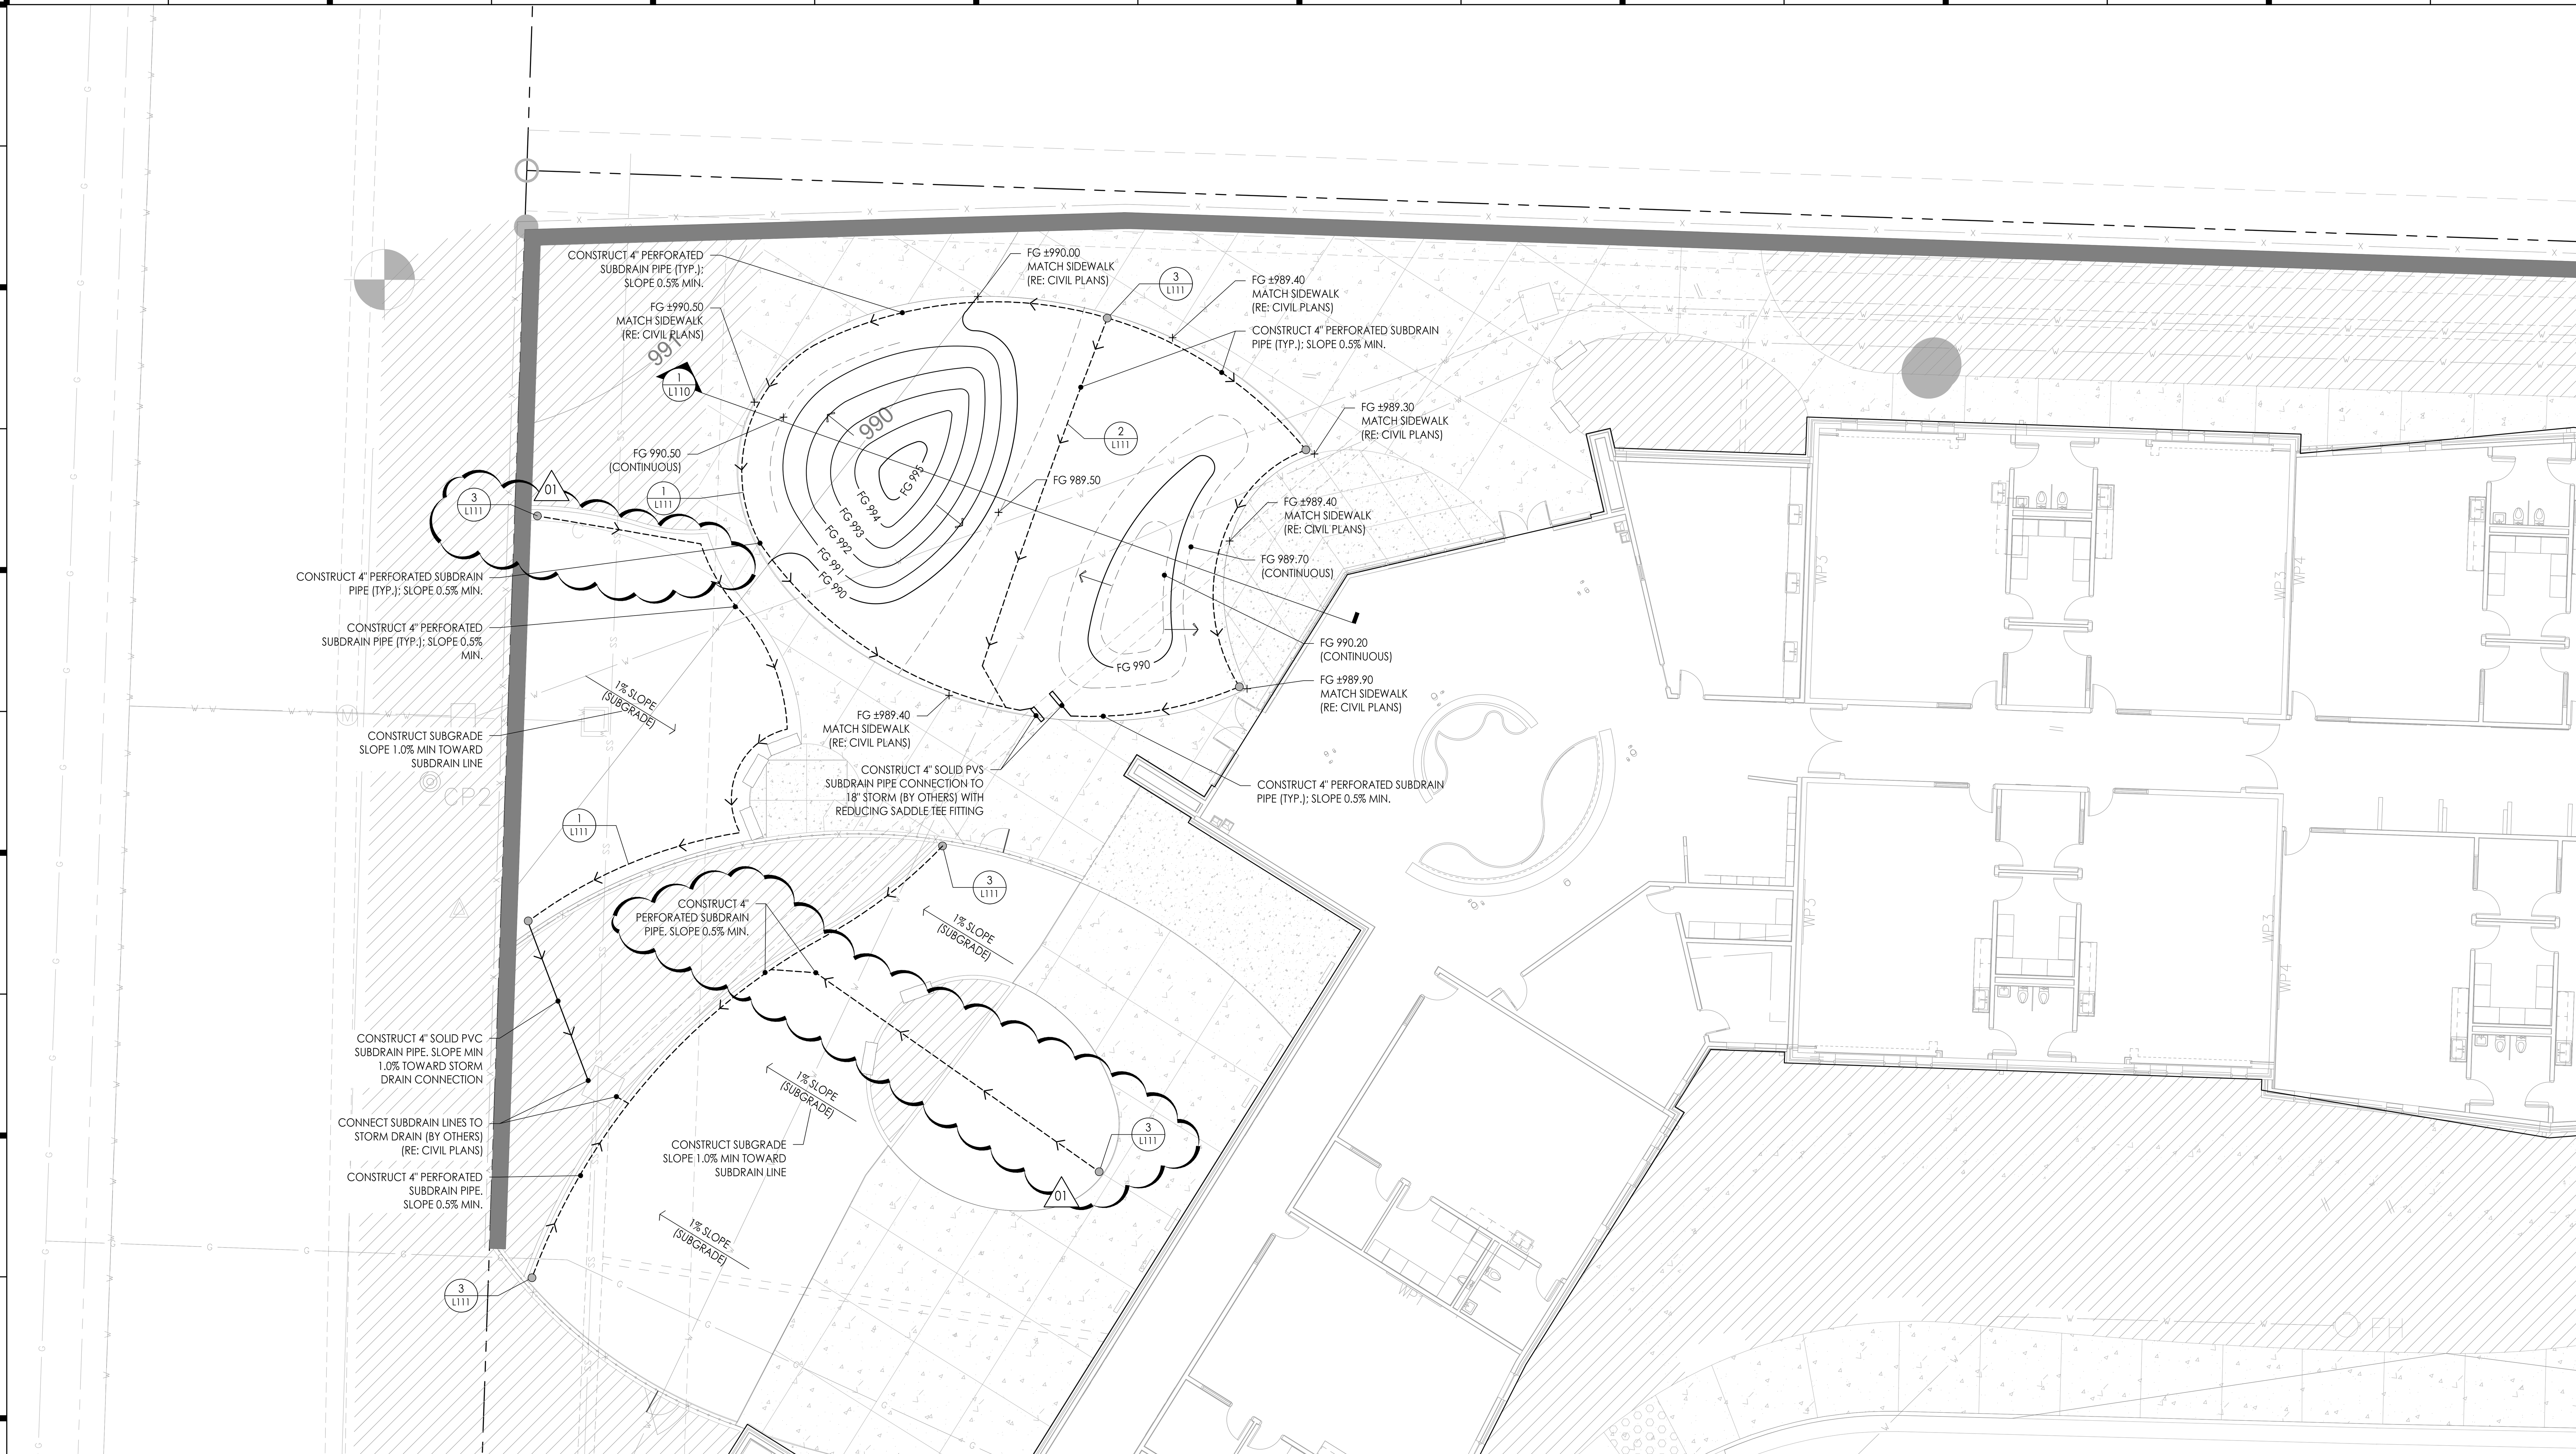
PLAY AREA ENLARGEMENT - LAYOUT

9/22/2016 7:50:53 AM



1 PLAY AREA GRADING AND DRAINAGE PLAN

Scale: 1" = 10'

GENERAL NOTES

1. ALL SITE AND UTILITY INFORMATION SHOWN IS BASED UPON INFORMATION AVAILABLE AT THE TIME OF DESIGN. VERIFY ALL SITE CONDITIONS, ELEVATIONS, UTILITY LOCATIONS AND DIMENSIONS INCLUDING NEW IMPROVEMENTS PRIOR TO COMMENCEMENT OF WORK. NOTIFY OWNER REPRESENTATIVE OF ANY DISCREPANCIES OR IRREGULAR CONDITIONS.
2. CONTRACTOR SHALL VERIFY LOCATION OF ALL UTILITIES BY CONTACTING ALL OF THE RESPECTIVE UTILITY COMPANIES AND/ OR THE LOCAL "ONE-CALL"/"CALL-BEFORE-YOU-DIG" SYSTEM AND BY EXCAVATING TEST PITS IF NECESSARY.
3. CONTRACTOR SHALL PROTECT ALL SITE IMPROVEMENTS AND UTILITIES. DAMAGE OCCURRING DURING AND AS A RESULT OF CONSTRUCTION SHALL BE REPAIRED/REPLACED BY THE CONTRACTOR AT NO INCREASE IN CONTRACT PRICE.
4. ALL DIMENSIONS SHOWN ARE REPRESENTED USING U.S. SURVEY DIMENSION STANDARDS.

GRADING NOTES

1. CONTOUR INTERVAL IS ONE FOOT UNLESS OTHERWISE NOTED.
2. PROTECT UTILITIES, DRAINAGE STRUCTURES, AND OTHER SITE IMPROVEMENTS FROM DAMAGE DURING GRADING ACTIVITIES.
3. CONTRACTOR TO NOTIFY LANDSCAPE ARCHITECT OF ANY EXISTING GRADE DISCREPANCIES ON SITE.

SUBDRAINAGE NOTES

1. ALL SUBDRAINAGE COLLECTOR PIPE SHALL BE INSTALLED AT A MINIMUM 0.5% SLOPE UNLESS OTHERWISE NOTED.
2. CONTRACTOR SHALL RESTORE SUBGRADE TO MEET GRADING AND COMPACTION REQUIREMENTS PER DRAWINGS AND SPECIFICATIONS.
3. CONTRACTOR TO PROTECT DRAIN LINES DURING CONSTRUCTION FROM DEBRIS (INCLUDING SOIL OR GRAVEL MATERIAL OR OTHER TRASH) FROM ENTERING OR BLOCKING LINES.
4. CONTRACTOR TO AVOID TRAFFIC OVER INSTALLED DRAINAGE TRENCHES TO PREVENT CRUSHING OF PIPE.
5. COORDINATE DRAINAGE CONNECTION AND INVERTS STORM DRAIN CONSTRUCTION.
6. SUBDRAINAGE LOCATION, LAYOUT, AND SITE CONDITIONS TO BE VERIFIED PRIOR TO CONSTRUCTION BY THE CONTRACTOR. NOTIFY OWNER'S REPRESENTATIVE OF ANY DISCREPANCIES OR IRREGULAR CONDITIONS ENCOUNTERED DURING CONSTRUCTION.
7. CONTRACTOR TO COORDINATE DRAINAGE LINES WITH ALL UNDERGROUND UTILITIES OUT IN THE FIELD.

	ISOLATION VALVE	RE: DETAIL 6/L310
	QUICK COUPLER	RE: DETAIL 7/L310
B	ROOT WATERING TUBES	RE: DETAIL 9/L310

IRRIGATION NOTES

1. THIS PLAN PROVIDES LAYOUT AND DISTRIBUTION TYPES FOR A COMPLETE AUTOMATIC IRRIGATION SYSTEM TO BE PROVIDED & INSTALLED BY THE LANDSCAPE CONTRACTOR. REFER TO **SPEC 328400 - IRRIGATION SYSTEM** FOR COMPLETE SCOPE OF WORK, RESPONSIBILITIES, PRODUCTS AND EXECUTION OF WORK.
2. ALL PLANTING BEDS AND TURF AREAS TO BE POP-UP SPRAY HEADS.
3. THE FINAL LOCATION AND EXACT POSITIONING OF AUTOMATIC CONTROLLERS AND RAIN SENSOR SHALL BE APPROVED BY THE OWNER'S REPRESENTATIVE PRIOR TO INSTALLATION.
4. 120-VOLT ELECTRICAL POWER SERVICE TO CONTROLLER ROOMS SHALL BE PROVIDED BY THE ELECTRICAL CONTRACTOR. SEE ENGINEER'S PLANS AND SPECIFICATIONS FOR MORE INFORMATION REGARDING ELECTRICAL SERVICE. COORDINATE WITH ELECTRICAL.
5. CONTRACTOR SHALL RUN TWO-WIRE PATH IN SAME TRENCH AS IRRIGATION MAINLINE.
6. INSTALL TRACER WIRE (#14 WITH PVC JACKET) ALONG ALL MAINLINE WHERE CONTROL WIRES OR TWO-WIRE PATH IS NOT PRESENT.
8. INSTALL ALL MAINLINES WITH A 1% MINIMUM SLOPE TO MANUAL DRAIN VALVES LOCATED AT LOW POINTS OF MAIN SYSTEM.
9. COORDINATE AND SEQUENCE SLEEVING, PIPE LOCATION, AND MECHANICAL IMPROVEMENTS WITH OTHER TRADES AS NECESSARY.
10. CONTRACTOR RESPONSIBLE FOR ENSURING THE FUNCTIONALITY OF ALL IRRIGATION EQUIPMENT AND ZONES BEFORE WORK WILL BE COMPLETE. ANY DAMAGE TO ADJACENT IRRIGATION EQUIPMENT MUST BE REPAIRED BY THE CONTRACTOR.

IMPORTANT:

WINTERIZATION WATER BLOW-OUT PROCESS WARNING -- THE IRRIGATION SYSTEM IS DESIGNED TO BE COMPLETELY DRAINED BY THE USE OF AN AIR COMPRESSOR TO PROTECT PIPES FROM BURSTING PRIOR TO FREEZING TEMPERATURES.

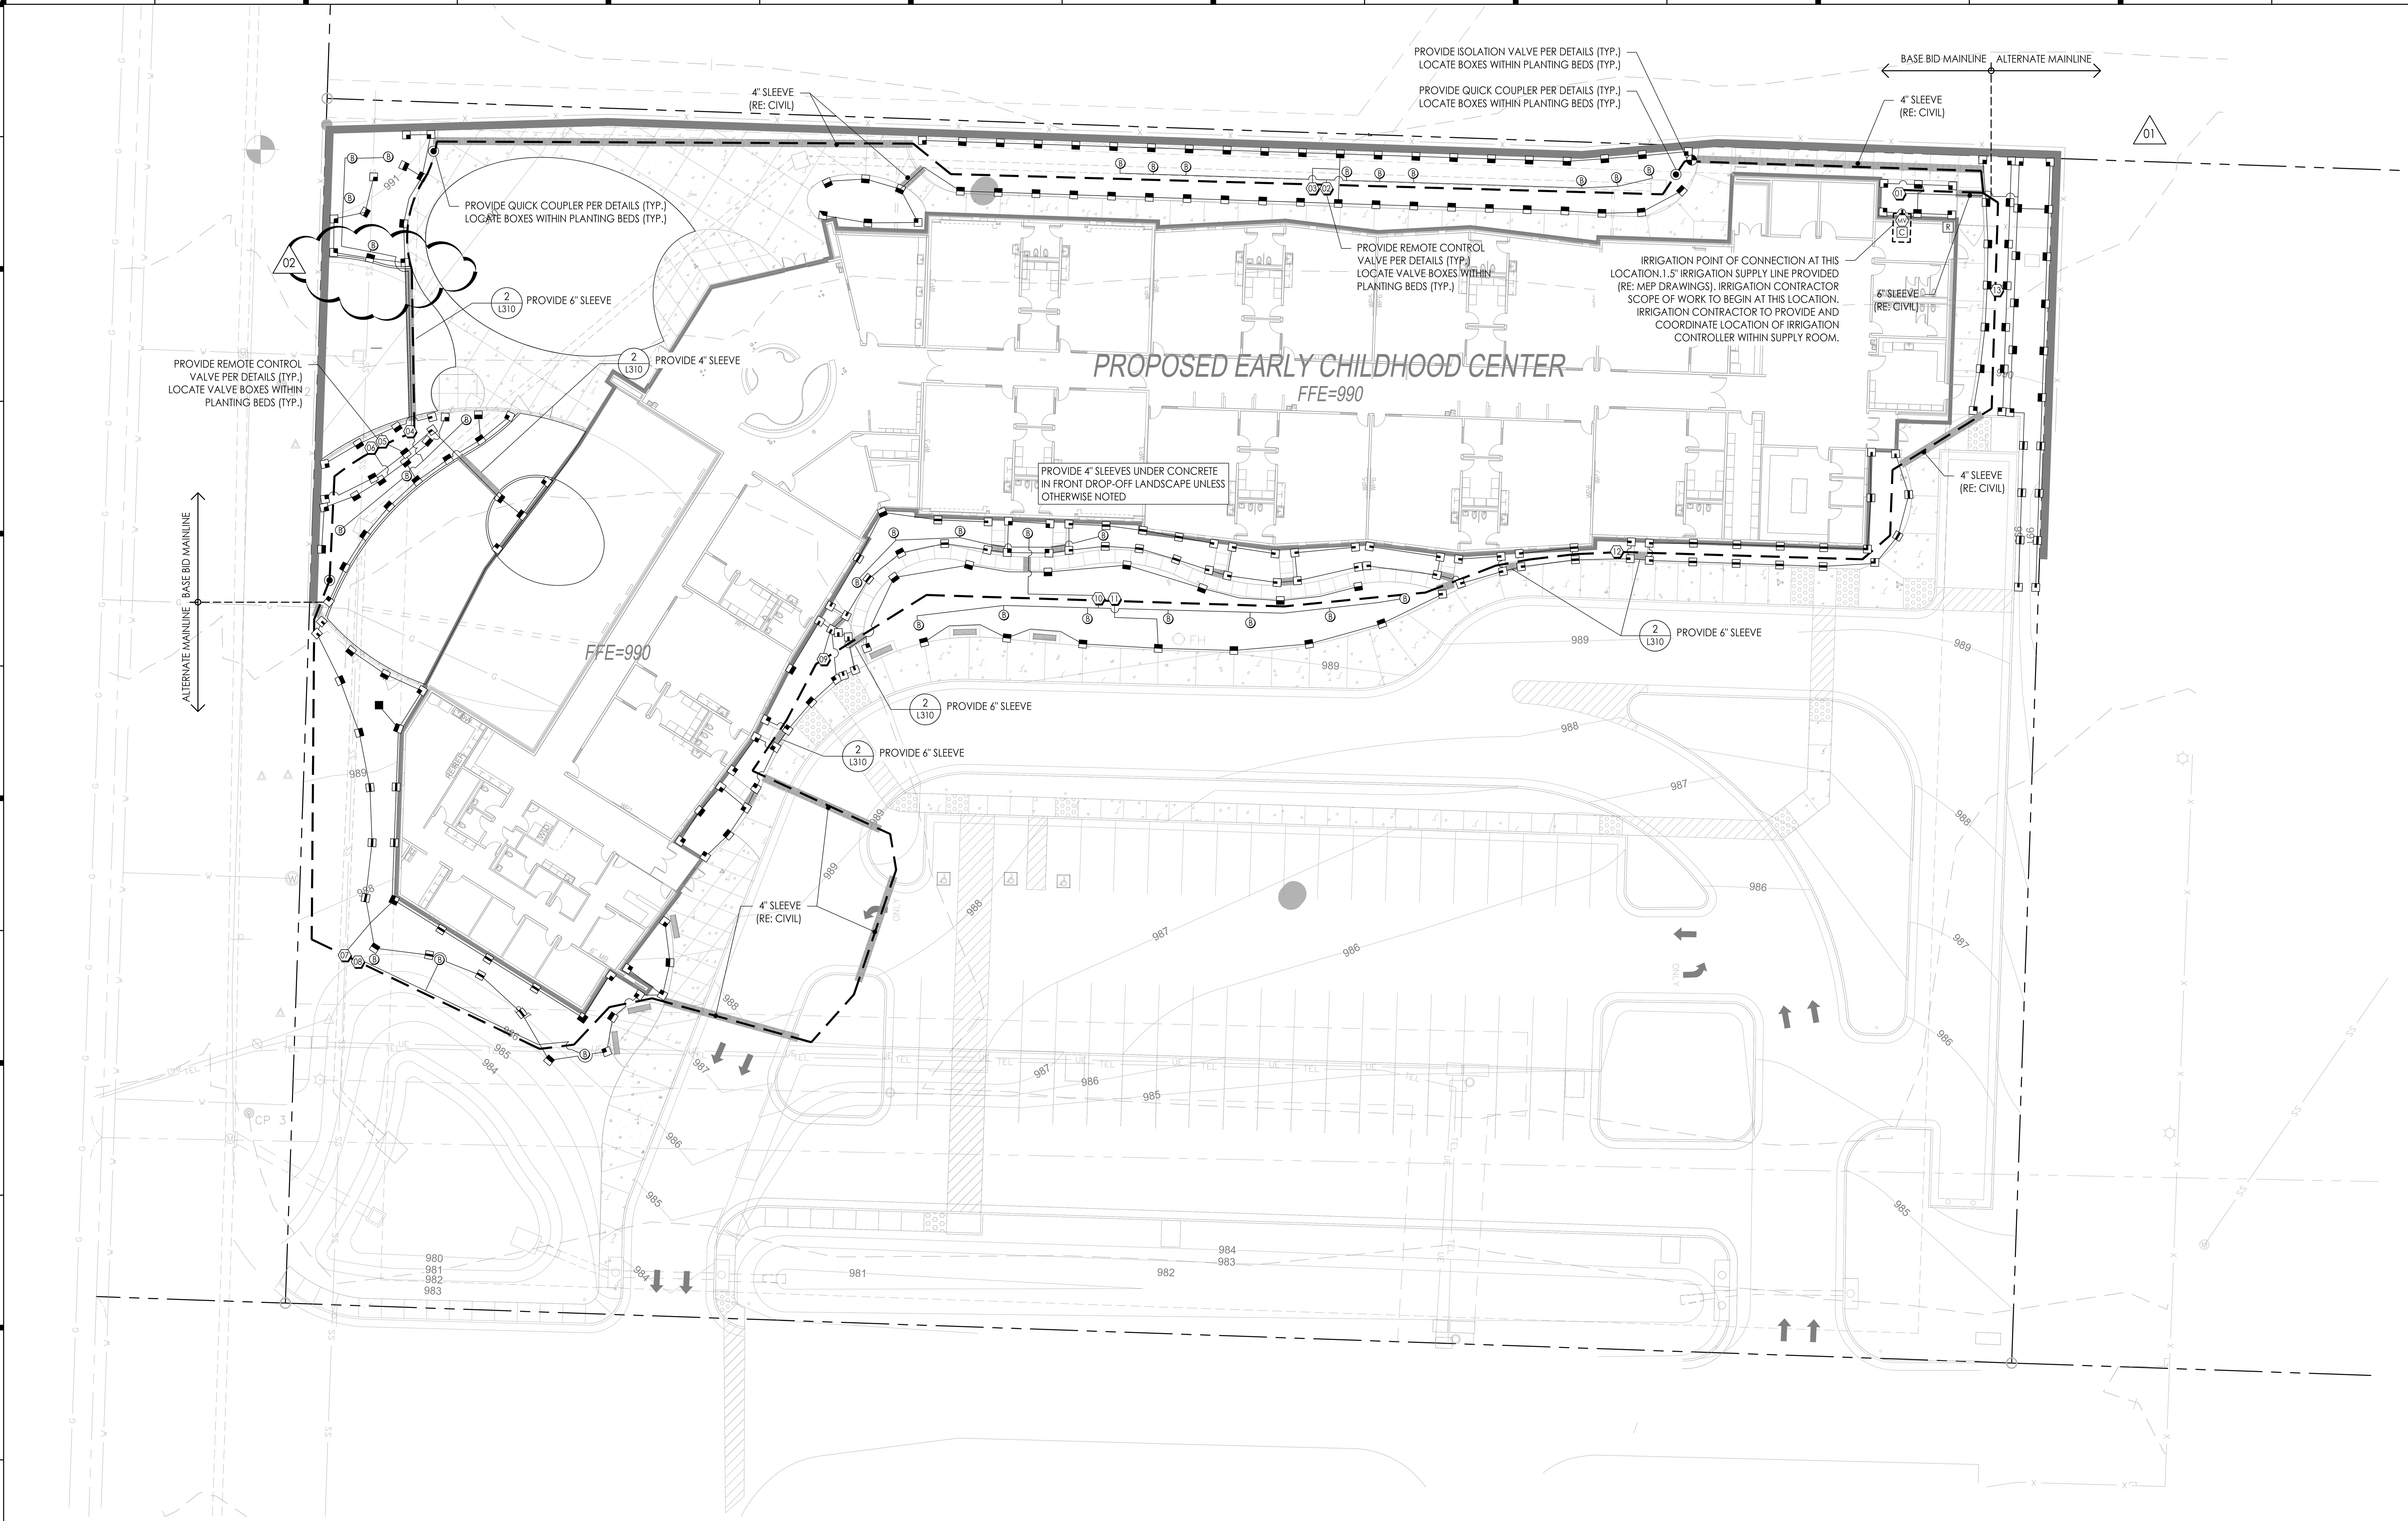
IRRIGATION PLAN (BASE BID)

6/22/2016 7:50:53 AM



1 ALTERNATE #6 - IRRIGATION PLAN

Scale: 1" = 20'

SHEET KEYNOTE LEGEND

ALTERNATE #6

FOR ALTERNATE #6, THE FOLLOWING PLAN IS TO REPLACE THE BASE BID IRRIGATION PLAN (L300) IN ITS ENTIRETY.

SEE L202 - LANDSCAPE PLAN ALTERNATES FOR THE PLANTING PLAN OF ALTERNATE #6

IRRIGATION LEGEND

SYMBOL	DESCRIPTION	DETAIL
C	AUTOMATIC CONTROLLER	RE: DETAIL 1/L310
R	RAIN SENSOR	RE: SPEC 328400
MV	MASTER VALVE	RE: DETAIL 4/L310
	BACKFLOW PREVENTER (N.I.C.)	RE: MEP DRAWINGS
M	WATER METER (N.I.C.)	RE: MEP DRAWINGS
	ISOLATION VALVE	RE: DETAIL 6/L310
	QUICK COUPLER	RE: DETAIL 7/L310
B	ROOT WATERING TUBES	RE: DETAIL 9/L310

IRRIGATION NOTES

1. THIS PLAN PROVIDES LAYOUT AND DISTRIBUTION TYPES FOR A COMPLETE AUTOMATIC IRRIGATION SYSTEM TO BE PROVIDED & INSTALLED BY THE LANDSCAPE CONTRACTOR. REFER TO **SPEC 328400 - IRRIGATION SYSTEM** FOR COMPLETE SCOPE OF WORK, RESPONSIBILITIES, PRODUCTS AND EXECUTION OF WORK.
2. ALL PLANTING BEDS AND TURF AREAS TO BE POP-UP SPRAY HEADS.
3. THE FINAL LOCATION AND EXACT POSITIONING OF AUTOMATIC CONTROLLERS AND RAIN SENSOR SHALL BE APPROVED BY THE OWNER'S REPRESENTATIVE PRIOR TO INSTALLATION.
4. 120-VOLT ELECTRICAL POWER SERVICE TO CONTROLLER ROOMS SHALL BE PROVIDED BY THE ELECTRICAL CONTRACTOR. SEE ENGINEER'S PLANS AND SPECIFICATIONS FOR MORE INFORMATION REGARDING ELECTRICAL SERVICE. COORDINATE WITH ELECTRICAL.
5. CONTRACTOR SHALL RUN TWO-WIRE PATH IN SAME TRENCH AS IRRIGATION MAINLINE.
6. INSTALL TRACER WIRE (#14 WITH PVC JACKET) ALONG ALL MAINLINE WHERE CONTROL WIRES OR TWO-WIRE PATH IS NOT PRESENT.
8. INSTALL ALL MAINLINES WITH A 1% MINIMUM SLOPE TO MANUAL DRAIN VALVES LOCATED AT LOW POINTS OF MAIN SYSTEM.
9. COORDINATE AND SEQUENCE SLEEVING, PIPE LOCATION, AND MECHANICAL IMPROVEMENTS WITH OTHER TRADES AS NECESSARY.
10. CONTRACTOR RESPONSIBLE FOR ENSURING THE FUNCTIONALITY OF ALL IRRIGATION EQUIPMENT AND ZONES BEFORE WORK WILL BE COMPLETE. ANY DAMAGE TO ADJACENT IRRIGATION EQUIPMENT MUST BE REPAIRED BY THE CONTRACTOR.

IMPORTANT:
WINTERIZATION WATER BLOW-OUT PROCESS WARNING -- THE IRRIGATION SYSTEM IS DESIGNED TO BE COMPLETELY DRAINED BY THE USE OF AN AIR COMPRESSOR TO PROTECT PIPES FROM BURSTING PRIOR TO FREEZING TEMPERATURES.

GENERAL FINISH NOTES

1. REFER TO FLOOR FINISH PLANS, REFLECTED CEILING PLANS, ELEVATIONS, AND DETAILS FOR EXTENT OF MULTIPLE FINISHES
2. ALL INTERIOR GYPSUM SOFFITS FINISH AS NOTED ON THE HORIZONTAL SURFACE TO MATCH FINISH ON THE VERTICAL SURFACE, AS DESIGNATED ON SCHEDULE OR RCP.
3. UNO, ALL EXPOSED CEILINGS AS SPECIFIED TO BE PAINTED AS INDICATED ON ROOM FINISH SCHEDULE. EXTENT OF PAINTING INCLUDES, BUT NOT LIMITED TO, ANY EXPOSED STRUCTURE, JOISTS, ROOF DECKING, EXISTING TECTUM PANELS, DUCTWORK AND MECH EQUIPMENT, ETC.
4. UNO, DO NOT PAINT ANY NATURAL STONE/BRICK OR GLAZED BLOCK OR ANY OTHER PRE-FINISHED MATERIALS
5. INTENT IS FOR ALL GYP OUTSIDE CORNERS TO HAVE CORNER GUARDS.
6. UNO, ALL EXPOSED STEEL TO BE PAINTED.
7. UNO, INTERIOR HOLLOW METAL DOORS AND FRAMES TO PAINTED TO MATCH WALL BEHIND.
8. UNO, INTERIOR HOLLOW METAL FRAMES WITH WOOD DOORS TO BE PAINTED TO MATCH SW 7019 GAUNTLET GRAY. REF DOOR SCHEDULE FOR FLAM DOORS AND METAL FRAME FINISHES.
9. THE FOLLOWING ITEMS SHALL MATCH ADJACENT PAINT/SURFACE FINISH. ELECTRICAL PANELS IN FINISHED ROOMS, AIR GRILLES, LOUVERS ETC. PRIMED OR SPECIFIED TO BE PAINTED, UNFINISHED SPEAKER OUTLET GRILLES, VISIBLE PARTS OF DUCTWORK AND MECH EQUIPMENT BEHIND VENTILATORS, GRILLES, AND DIFFUSERS.
10. DO NOT PAINT ALUMINUM OR OTHER NON FERROUS METALS THAT ARE PREFINISHED.
11. NO TRANSISTION STRIP BETWEEN CARPET AND FLOOR FINISHES RT1 & RT2 - LEVEL TRANSISTION. PROVIDE TRANSISTIONS FOR ALL OTHER INSTANCES.
12. IN AREAS WITH MULTIPLE CAPETS, INSTALLERS TO PROVIDE DIGITAL REPRESENTATION OF LAYOUT TO INSURE DESIGN INTENT - ROTATION OF CARPET TILE DETERMINES DESIGN.

___ OF ___

SIGNAGE TYPES

A. Building Code

1. The design and construction shall conform to the 2012 International Building Code (IBC) as amended by the City of Joplin, Missouri.

B. Design Loads

1. This project is designed to resist the most critical loads resulting from the basic load combinations outlined in section 1605 of the code.

2. Dead Loads
   a. The roof mounted equipment weights used for design are indicated on the contract documents. The Contractor shall submit actual weights for all roof mounted equipment for review by the Engineer.
   b. Total service roof dead load: 25 psf.

3. Live Loads
   a. Code Loads
      1. Roof 30 psf
      2. Hollow Core 100 psf
   b. Live load reduction has not been utilized.

4. Wind - The wind load is in accordance with ASCE 7-10 with the following criteria:
   a. Basic wind speed V3S=120 mph
   b. Risk Category III
   c. Exposure Factor C
   d. Internal Pressure Coifficient ±.18
   e. Components & Cladding Force per code

5. High wind area - The wind load is in accordance with ICC 500-08 with the following criteria: (1)
   a. Basic wind speed V3s=250 mph
   b. Building Category III
   c. Exposure Factor IW=1.0
   d. Internal Pressure Coifficient ±0.55
   e. Topographic Factor 1.0
   f. Directionality Factor 1.0
   g. Missile Impact Protection is Required

6. Snow - The snow load is in accordance with ASCE 7-10 with the following criteria:
   a. Ground snow load pg=30 psf,
   b. Exposure Factor Ce=0.9
   c. Importance Factor IS=1.10
   d. Thermal factor Ct=1.0

7. Seismic - The seismic design is in accordance with the general building code with the following criteria:
   a. Importance Factor IE=1.25
   b. Risk Category III
   c. 0.2 sec Spectral Response Acceleration Ss=12.9%
   d. 1.0 sec Spectral Response Acceleration S1=7.9%
   e. Soil Site Class D
   f. Design 0.2sec Spectral Response Acceleration Sds=13.8%
   g. Design 1.0sec Spectral Response Acceleration Sd1=12.7%
   h. Seismic Design Category B
   i. Basic Seismic Force Resisting System Light frame walls with shear panels of all other materials
   j. Design Base Shear 90 kips
   k. Seismic Response Coefficient Cs=0.086
   l. Response Modification Coefficient R=2.0
   m. Analysis Procedure Equivalent Lateral Force

C. Foundations

1. Geotechnical Report
   a. Read and be familiar with all aspects of the Geotechnical Engineering report which was prepared by Anderson Engineering, June 22, 2016, work order #50040-16.
   b. If any existing field conditions vary from the geotechnical report, it is the responsibility of the contractor to notify the Geotechnical Engineer, Architect and Engineer of Record.

2. Spread Footings, Trench Footing and Grade Beams
   a. All shallow foundations have been designed to bear on undisturbed soil or engineered fill for a net allowable bearing pressure of 2000 psf.

3. All structural concrete utilized for the purpose of retaining soil shall attain full design strength prior to any backfill being placed against the concrete.

4. Side forms for trenched foundations are not required.

D. Concrete

1. All concrete and reinforcing details shall conform to ACI 318-11 and CRSI "Manual of Standard Practice".

2. Strength - The following areas shall have a minimum 28 day compressive strength:
   a. Interior flatwork concrete: 4000 psi
   b. Exterior flatwork concrete: 4000 psi
   c. Footing and grade beams: 3000 psi
   d. Walls: 4000 psi

3. No water may be added to the concrete mix on the job site unless specifically withheld at the batch plant. The workability should be attained through the use of water-reducing agents and/or super-plasticizing chemical admixtures.

4. Reinforcing
   a. Grade
      1. Typical reinforcing ASTM A615, Grade 60
      2. Welded reinforcing ASTM A706
   b. Lap splices and development lengths in reinforcement shall be 48 bar diameters unless indicated elsewhere in the drawings and specifications. Lap welded wire reinforcing one full mesh space plus 2 inches.
   c. Welded Wire Reinforcing ASTM A185
      1. All welded wire reinforcing for slab on grade shall be supported on metal chairs specifically designed for soil bearing conditions. Pulling reinforcing up during concrete placement is not allowed.
   d. All concrete shall be reinforced unless specifically identified on the drawings as unreinforced. Reinforce sections with similar conditions located elsewhere on the project.
   e. All synthetic and steel fiber reinforcement shall be considered secondary reinforcing only.

5. Concrete cover shall be the following.
   a. Concrete cast against and exposed to earth 3"
   b. Concrete exposed to weather #5 and smaller 1 ½"
   c. Concrete exposed to weather #6 and larger 2"
   d. Concrete not exposed to weather or earth
      1. Slabs, wall and joist ¾"

6. All openings in slabs, walls, foundations, etc. shall have an additional 2-#5's on each side, in each corner of the opening and each face of the member. Extend reinforcing 2'-6" beyond edge of opening.

7. Aluminum items shall not be embedded in concrete.

8. House keeping pads and toppings slabs shall be reinforced with WWR 6x6-2.1x2.1, unless indicated elsewhere in the drawings and specifications.

E. Pre-Cast Concrete

1. All pre-cast design, detailing and connections shall be in accordance with the recommendations of PCI.

2. All pre-cast members shall have a minimum concrete strength of 5000 psi at 28 days.

3. Post tensioning strands shall be 270 ksi low relaxation strands.

4. All pre-cast design, including panel to panel connections and connections to the structure shall be the responsibility of the Contractor. Calculations shall be prepared and submitted along with shop drawings for review. All calculations shall be signed and sealed by a registered, professional engineer licensed in the State of the project. It is preferable that the calculations be well organized and indexed for ease of review.

F. Masonry

1. All masonry design and detailing shall be in accordance with the recommendations of TMS 402/ACI 530.

2. Materials
   a. Design strength f'm = 2000 psi

3. Minimum reinforcing for 8" and 12" non-load bearing masonry shall be (1)#4 at 48" on center minimum. Reference the Architectural drawings for location of all non-load bearing walls.

4. Control joints in all masonry shall be at 20 feet maximum on center unless indicated elsewhere in the drawings and specifications. All horizontal joint reinforcement shall be discontinuous at vertical control joints. All horizontal reinforcement in bond beams shall be continuous through vertical control joints. Reference Architectural plans and elevations for joint location and typical details.

5. All CMU shall be running bond unless otherwise noted in the contract documents.

6. When stacked bond is used for wall framing, the Contractor shall provide a continuous bond beam at 4'-0" on center vertically, reinforced with 1-#4 continuous.

7. Reinforcement Details
   a. Rebar positioners shall be used for all reinforcing and all vertical cells should be free of debris and excess mortar such that a minimum space of 3" by 3" is maintained to ease the placement of grout.
   b. Lap splices shall be 48 bar diameters minimum unless indicated elsewhere in the drawings and specifications.
   c. Locate wall reinforcing at jambs, ends of walls and each side of control joints. Reference typical details for additional reinforcing information.
   d. Reinforcing shall be placed prior to grouting.

8. Grout shall be consolidated by means of mechanical vibration unless self-consolidating grout is used.

9. Grout solid all units below grade and below finish floor.

G. Structural Steel

1. All steel fabrication and erection shall be in accordance with the requirements and recommendations of the American Institute of Steel Construction (AISC) Manual of Steel Construction, 14th edition
   a. Steel design shall be per Allowable Stress Design or Load and Resistance Factor Design as outlined by AISC.

2. Grade
   a. Steel W and WT-shapes ASTM A992 or ASTM A572, Gr. 50
   b. Channels, angles and plates ASTM A36
   c. Square hollow structural shapes ASTM A500, Grade B (46 ksi)
   d. Round hollow structural shapes ASTM A500, Grade B (42 ksi)
   e. Connection material ASTM A36

3. Connections
   a. Connection design shall be based on reactions listed on the drawings and specifications. Minimum connection design shall be 15 Kips unless noted otherwise. All gravity and lateral loads noted in the drawings are service level loads.
   b. All connection design calculations shall be signed and sealed by a licensed, professional engineer licensed in the State of the project.
   c. All bolted lateral bracing connections (beams, columns, and bracing) shall be designed as slip critical connections.
   d. It is the preference of the Engineer of record to have shop welded, field bolted connections unless shown otherwise on the drawings.

4. Anchor Rods
   a. Anchor rods shall conform to ASTM F1554, Grade 55.
   b. Steel or plywood templates shall be used for all anchor rod placement in concrete and masonry.

5. Thermal cutting is not allowed in the field.

6. The contractor shall supply all miscellaneous steel as required by the contract documents. Miscellaneous steel shall include, but is not limited to, shelf angle, glass support, lintels, catwalks and other steel required for stabilization of architectural elements.

H. Steel Deck

1. Steel roof and floor deck shall be designed, fabricated and erected in accordance with the recommendations of the latest edition of Steel Deck Institute (SDI) Manual.

2. Roof diaphragm shear connections shall be minimum X-EPN-19 36/4 with 3-#10 screw in nested side laps. The Contractor shall verify the diaphragm shear connection design with the diaphragm shear loads provided on the plans.

3. Crimped or button punched side lap fastening is not allowed for any roof deck or floor deck.

4. All roof deck shall be designed for a net uplift of 41psf in the corners, 25psf at the edges and 10 psf in the field of the building. Edge zone = 6 feet

J. Post Installed Anchors

1. All post installed anchors shall be installed per the manufactures recommendations.
   a. Install expansion anchors per the manufactures recommended standard embedment unless otherwise noted in the contract documents.
   b. The embedment of all post installed anchors shall be defined as the distance from the surface of the loaded material and the deepest part of the anchor after the anchor is placed but not expanded.

2. All expansion anchors shall perform to a minimum load capacity of the Hilti Kwik Bolt 3 or approved equal.

3. All adhesive anchors embedded in concrete shall perform to a minimum load capacity of the Hilti Hit HY-200 MAX Adhesive Anchors.

4. All anchors shall be stainless steel at exterior exposed conditions.

K. Cold Formed Steel

1. All cold formed steel framing shall be designed, fabricated and erected in accordance with the recommendations of latest edition of the American Iron and Steel Institute (AISI) Specification.

2. All cold formed steel indicated in these contract documents have been referenced by the Steel Stud Manufacturers Association (SSMA) nomenclature.

3. Wall bridging shall be installed at 4'-0" on center maximum.

4. Top and bottom tracks shall match the wall stud thickness and depth.

5. All welding shall conform to latest AWS D1.3.

6. Pre-drill holes for all screws which are not self-tapping.

7. All lapped, screwed connections shall be made with a minimum of 4-#12 screws or the equivalent weld unless noted otherwise.

8. All screwed connections shall provide for a minimum of ½" edge distance and spacing. All screws shall be completely installed such that the plies of metal being connected are tight to one another.

9. All floor and roof framing shall align with the wall stud below.

10. Joist bridging shall be spaced at 8'-0" maximum; use simpson TB27 or equivalent.

11. All framing members shall be cut square such that they fit tight at all perpendicularconnections.

12. Field splices of structural cold formed members are not allowed.

L. Cold Formed Steel Trusses

1. All cold formed steel trusses shall be designed, fabricated and erected in accordance with the recommendations of AISI.

2. Design calculations shall be prepared by a registered, professional licensed engineer in the State of the project.

3. Loads
   a. Top chord roof dead load: 15psf
   b. Top chord roof live load: 30psf
   c. Bottom chord roof dead load: 10psf
   d. Bottom chord roof live load: 10psf (non-concurrent)

4. Girder truss support shall be a minimum 3 full height studs continuous to the foundation.

5. Shop drawings shall be prepared under the supervision of a licensed engineer. Submit layout plans, typical details, bracing requirements and truss design details for the entire project. Design calculations shall be submitted and signed and sealed by a professional engineer in the State of the project.

6. All cold formed steel trusses shall be designed for a net uplift of 38psf in the corners, 22psf at the edges and 10psf in the field of the building. Edge zone = 6 feet.

7. Bottom chords of trusses are not braced by ceiling framing

M. Miscellaneous

1. Site visits will be made by representatives of Hollis and Miller Architects in order to establish the general conformance of the construction to the contract documents. Observations by the Engineer shall not be considered inspections and in no way relieves the Contractor of any requirements of the contract documents.

2. Stability of the structure during construction, including load bearing and non-load bearing masonry wall, is the responsibility of the Contractor. The Engineer is responsible for the stability of the completed structure only.

3. Conflict between the Architectural and Structural Drawings shall be brought to the attention of the Architect and Engineer immediately. When conflicts occur between the drawings and the specifications, the strictest interpretation shall govern.

4. The Engineer shall not be in control of, have charge of, or be responsible for the construction means and methods. The contractor is solely responsible for all construction means, methods, procedures, techniques and job sequence.

5. Typical details are intended to represent typical conditions for the entire project. Typical details may or may not be indicated on plans

6. All existing field and building conditions shall be verified by the Contractor before any other work shall begin. Coordinate with Engineer of Record regarding any discrepancy with existing building dimensions.

7. Submittals
   a. Submittals are to be based upon the latest submitted contract documents. This includes all addendums, Architectural Supplemental Instructions (ASIs) and Structural Supplemental Drawings (SSD's) and Requests for Information (RFI's).
   b. Submittals shall be original documents. Shop drawings shall not be a duplication, in any way,of the contract documents. This includes, but is not limited to, photocopies, electronic drawing copying or electronic scanning. Any submitted shop drawing that is not original will be rejected and returned without review.
   c. Prior to submission of the submittals to the Architect, the Contractor shall review the shop drawings for conformance to the means, methods, techniques, sequences and operations of construction. The Contractor's review stamp shall be affixed to all shop drawings prior to Architect or Structural Engineer review. Shop drawings not bearing the Contractor's review stamp will be returned without review.
   d. Design Calculations - All calculations shall be signed and sealed by a professional engineer licensed in the State of the project. Provide the following design calculations for review:
      1. Structural Steel connections
      2. Steel Stairs Framing
      3. Structural and Architectural Pre-Cast Concrete.
      4. Prefabricated cold formed steel trusses
   e. Submittals - Provide the following submittals for review:
      1. Concrete Mix Design and Materials
      2. Concrete Reinforcing
      3. Embedded Items (plates, angles, etc.)
      4. Structural Pre-Cast Concrete
      5. Masonry Products and Materials
      6. Masonry Reinforcing
      7. Structural Steel
      8. Miscellaneous Steel including lintels, stairs, etc.
      9. Metal Deck
      10. Prefabricated cold formed steel Trusses
   f. Substitutions are allowed prior to bid only. Reference the specifications for timing of submission

N. Special Inspections (based on 2012 IBC, Chapter 1704)

1. Special inspection reports shall be submitted to the Building Official, Owner, Architect, Engineer, Contractor, Sub-Contractor and any other pertinent entity in a timely manner.

2. All discrepancies found by the special inspector shall immediately be brought to the attention of the general contractor and corrected. If the contractor is unable to correct the discrepancy, the special inspector shall notify the Architect and Engineer.

3. Upon completion of the project, the special inspector shall submit a final report delineating that the work was, to the best of the inspector's knowledge, completed in conformance with the approved contract documents and applicable building code.

4. The Owner shall retain special inspection services for the items listed below. The Contractor shall provide light gerneral labor as required to assist with special inspections.

5. Foundations
   a. Bearing capacity
   b. Bearing elevation

6. Concrete
   a. Reinforcing steel placement
   b. Embedded items in concrete
   c. Concrete placement technique
   d. Sampling of fresh concrete

7. Pre-Cast Concrete
   a. Pre-Cast

8. Masonry
   a. Reinforcing steel placement
   b. Sampling of fresh grout and mortar
   c. Grout placement technique
   d. Level 1 special inspection required

9. Steel (includes structural steel, joist, deck and anchor rod placement)
   a. Periodic
      1. Single-pass fillet welds not exceeding 5/16 inch in size.
      2. Floor and roof deck attachment
      3. Headed stud anchors
      4. Welding of stairs and railing systems
      5. High strength bolts
   b. Continuous
      1. Partial and full penetration welds.
      2. All other welding not covered in periodic inspections.

10. Cold Formed Steel
   a. Screw pattern
   b. Welding

11. Post installed Anchors

FOUNDATION SECTIONS

ELECTRICAL PLAN NOTES:

1. PROPOSED UTILITY COMPANY TRANSFORMER LOCATION. INSTALL CONCRETE PAD PER UTILITY COMPANY STANDARDS. COORDINATE EXACT PRIMARY ELECTRICAL FEEDER REQUIREMENTS AND RESPONSIBILITIES WITH UTILITY COMPANY.
2. SECONDARY ELECTRICAL UTILITY FEEDER. REFER TO ONE LINE DIAGRAM FOR CONDUIT AND CONDUCTOR QUANTITY AND SIZE.
3. PROVIDE (2) EMPTY 4" CONDUITS WITH PULL STRING FROM MDF CLOSET OUT TO DATA SERVICE POINT. COORDINATE EXACT REQUIREMENTS WITH UTILITY.
4. SPACE FIXTURES AROUND FLAGPOLE AND AIM TO EVENLY ILLUMINATE FLAG. (Revision 1)

FLOOR PLAN - AREA A - POWER

SHEET KEYNOTE LEGEND

GENERAL NOTES:

1. REFER TO MECHANICAL SCHEDULES ON ME SHEETS FOR CIRCUITING INFORMATION OF MECHANICAL EQUIPMENT.
2. ALL WALL MOUNTED ELECTRICAL DEVICES ARE TO BE INSTALLED IN AN ORDERLY FASHION. DEVICES IN CLOSE PROXIMITY AND AT DIFFERENT HEIGHTS ARE TO BE STACKED VERTICALLY. DEVICES AT THE SAME HEIGHT SHOULD BE INSTALLED GANGED TOGETHER OR AS CLOSE AS REASONABLY EXPECTED. DEVICE ROUGH IN IS TO BE APPROVED BY ARCHITECT/ENGINEER PRIOR TO DRYWALLING.
3. TELECOM BOXES ARE TO HAVE TWO DROPS UNLESS NOTED OTHERWISE. PROVIDE 3/4" CONDUIT TO ABOVE ACCESSIBLE CEILING.
4. PROVIDE SLEEVES AS REQUIRED THROUGH WALLS THAT EXTEND TO STRUCTURE FOR COMMUNICATION CABLING PATHWAYS. FIRE STOP SLEEVES AS REQUIRED WHEN INSTALLED IN RATED WALLS.
5. PROVIDE DEDICATED 120V CIRCUIT TO EACH BMS PANEL AS REQUIRED. CIRCUIT FROM SPARE 20A SINGLE POLE BREAKERS.
6. PROVIDE SINGLE DATA OUTLET IN BOX ABOVE ACCESSIBLE CEILING AT ALL WIRELESS ACCESS POINT LOCATIONS. MARK TILES TO INDICATE WHERE WAPS ARE INSTALLED. COORDINATE WITH OWNER.
7. ALL SPEAKERS DENOTED WITH AN 'F' ARE DUAL TAP SPEAKERS WITH FIRE ALARM INPUT ON PRIMARY TAP. RE: SPECIFICATIONS.

ELECTRICAL PLAN NOTES:

1. POWER AND DATA FOR SMART BOARD. RE: ARCHITECTURAL DRAWINGS FOR EXACT ELEVATION AND MOUNTING LOCATIONS.
2. 4X12 CABLE TRAY. COORDINATE INSTALLATION WITH OTHER TRADES ABOVE CORRIDOR CEILING.
3. DEDICATED RECEPTACLE FOR DRINKING FOUNTAIN. COORDINATE ROUGH IN ELEVATION AND LOCATION TO BE CONCEALED WITHIN FIXTURE HOUSING.
4. PROVIDE FLOOR BOX WITH DUPLEX RECEPTACLE, (2) DATA OUTLETS, AND BLANK GANG WITH EMPTY 1-1/2" CONDUIT TO WALL BOX.
5. PROVIDE WIREMOLD EFSB4 WALL BOX FOR TV/MONITOR. PROVIDE WITH DUPLEX RECEPTACLE, (2) DATA OUTLETS, BLANK GANG WITH EMPTY 1-1/2" CONDUIT TO FLOOR BOX, AND BLANK GANG WITH EMPTY 1-1/2" CONDUIT TO ABOVE ACCESSIBLE CEILING. PROVIDE WITH BUSHINGS ON CONDUIT ENDS.
6. DEDICATED RECEPTACLE FOR REFRIGERATOR.
7. DEDICATED RECEPTACLE FOR VENDING MACHINE.
8. DEDICATED RECEPTACLE FOR DISHWASHER.
9. DEDICATED RECEPTACLE FOR UNDERCOUNTER REFRIGERATOR.
10. NEMA 14-30R FOR CLOTHES DRYER. CIRCUIT WITH (3)#10, #10G, 3/4"C.
11. DEDICATED CIRCUIT FOR WASHING MACHINE. COORDINATE EXACT ELEVATION AND MOUNTING LOCATION WITH APPLIANCE.
12. PROVIDE 8'X8' PLYWOOD BACKBOARD FOR MDF. PAINT WITH 2 COATS WHITE FIRE RETARDANT PAINT.
13. PROVIDE WIREMOLD EFSB4 WALL BOX FOR TV/MONITOR. PROVIDE WITH DUPLEX RECEPTACLE, (2) DATA OUTLETS, AND BLANK GANG WITH EMPTY 1-1/2" CONDUIT TO ABOVE ACCESSIBLE CEILING. PROVIDE WITH BUSHINGS ON CONDUIT ENDS.
14. ADA DOOR OPERATOR. PROVIDE JUNCTION BOXES AS INDICATED FOR PUSH BUTTONS. PROVIDE POWER AS REQUIRED FOR DOOR SYSTEM. COORDINATE LOCATIONS AND MOUNTING WITH ARCHITECT.
15. KEYPAD TO TEMPORARY DISARM EXTERIOR DOOR. COORDINATE WITH DOOR HARDWARE PROVIDER. PROVIDE ALL CONNECTIONS AS REQUIRED.
16. PUSH BUTTON FOR DOOR ENTRY REQUEST WITH AUDIO INTERCOM. COORDINATE MOUNTING WITH ARCHITECT. COORDINATE REQUIREMENTS WITH DOOR HARDWARE PROVIDER. (1)
17. JUNCTION BOX FOR EXTERIOR DOOR RELEASE. COORDINATE EXACT REQUIREMENTS WITH DOOR HARDWARE PROVIDER.
18. PROVIDE POWER CONNECTION FOR SECURED DOOR SYSTEM AS REQUIRED. COORDINATE EXACT REQUIREMENTS WITH DOOR HARDWARE PROVIDER.
19. PROVIDE NEMA 14-30R RECEPTACLE FOR UPS. CIRCUIT WITH (3)#10, #10G., 1/2"C.
20. ALL WORK IN THIS AREA TO BE PART OF ALTERNATE 2. (1)
21. MDF LOCATION. PROVIDE 4-POST RACK PER SPECIFICATIONS. COORDINATE EXACT LOCATION WITH OWNER. PROVIDE GROUNDING BUS BAR PER DETAIL.
22. PROVIDE POST TO MOUNT ENTRANCE HARDWARE ON. COORDINATE EXACT REQUIREMENTS WITH EQUIPMENT PROVIDER. COORDINATE EXACT LOCATION WITH ARCHITECT.

_____ OF _____

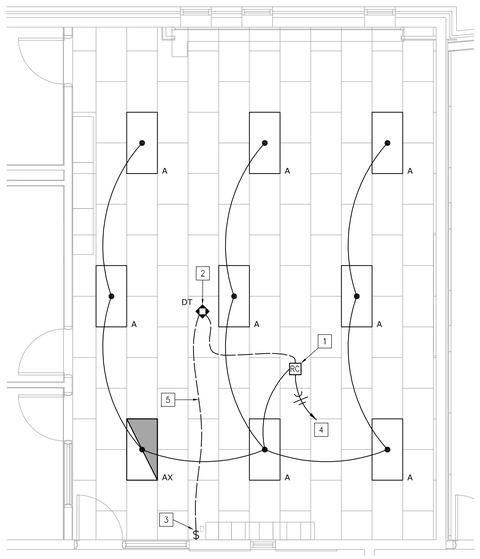
A1 | Scale 1/8" = 1'-0" | FLOOR PLAN - AREA C - POWER

FLOOR PLAN - AREA C - POWER



GENERAL NOTES:

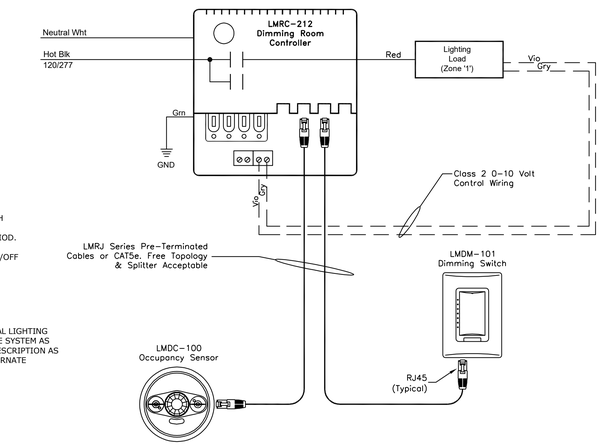
1. REFER TO LIGHTING CONTROL DETAIL FOR CONNECTION INFORMATION FOR LIGHTING CONTROL DEVICES.
2. PROVIDE ALL EQUIPMENT NEEDED FOR A COMPLETE WORKING DAY LIGHT HARVESTING CONTROLS SYSTEM.

PLAN NOTES:

1. ROOM CONTROLLER, 0-10V DIMMING, WATTSTOPPER MODEL LMRC-212 OR APPROVED EQUAL. PROVIDE CONTROL OF FIXTURES AS SHOWN. MOUNT ABOVE ACCESSIBLE CEILING AS REQUIRED.
2. CEILING MOUNTED DUAL TECHNOLOGY OCCUPANCY SENSOR (VACANCY SENSOR), WATTSTOPPER MODEL LMDC-100 OR APPROVED EQUAL. PROVIDE AUTOMATIC OFF ONLY, OCCUPANT MUST MANUALLY TURN FIXTURES ON VIA SWITCH AS SHOWN.
3. 1-BUTTON DIMMING WALL SWITCH, WATTSTOPPER MODEL LMDM-101 OR APPROVED EQUAL.
4. 277V CIRCUIT AS INDICATED ON DRAWINGS.
5. CAT 5 CABLE TYPICAL ALL DASHED LINES THIS PLAN. REFER TO MANUFACTURERS CONNECTION DIAGRAMS FOR ALL CONNECTIONS REQUIRED.

TYPICAL CLASSROOM - LIGHTING CONTROL

SCALE : 1/4" = 1'-0"



SEQUENCE OF OPERATION

- LIGHT FIXTURES ARE MANUAL ON/OFF WITH OCCUPANCY SENSOR TO TURN OFF LIGHTS AFTER AN ADJUSTABLE VACANCY TIME PERIOD.
- CONTROL LOCATION AT ENTRY ALLOWS ON/OFF AND DIMMING CONTROL OF LIGHTING.

GENERAL NOTES:

1. BASIS OF DESIGN IS WATTSTOPPER DIGITAL LIGHTING MANAGEMENT SERIES. PROVIDE COMPLETE SYSTEM AS REQUIRED TO MEET LIGHTING CONTROL DESCRIPTION AS INDICATED FOR BASIS OF DESIGN OR ALTERNATE MANUFACTURER.

TYPICAL CLASSROOM - LIGHTING CONTROL DETAIL

NOT TO SCALE

INTERIOR LIGHTING CONTROL EQUIPMENT LEGEND

SYMBOL	FUNCTION	MOUNTING	SETTING(TYPICAL)	WATT STOPPER MODEL #	NOTES
◆DT	MOTION SENSOR	CEILING	ON: AUTOMATIC OFF: 30 MINUTE DELAY	WATTSTOPPER LMDC-100	NOTE 1
$M	MOTION SENSOR	WALL SWITCH	ON: MANUAL OFF: 15 MINUTE DELAY	WATTSTOPPER PW-100	NOTE 3
$	OVERRIDE SWITCH	WALL SWITCH	----	RE: SPECS	NOTE 2
RC	ROOM CONTROLLER	----	----	WATTSTOPPER LMRC	NOTE 4

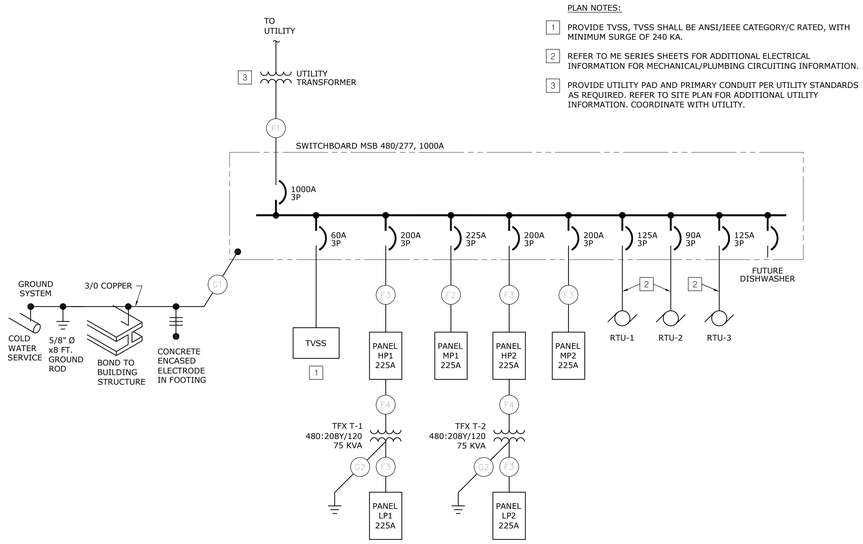
GENERAL NOTES: THE MANUFACTURERS AND MODELS LISTED ARE THE BASIS OF DESIGN, ALL PRODUCT SUBSTITUTIONS SUBMITTED MUST BE APPROVED AS EQUAL. REFER TO DRAWINGS FOR QUANTITIES.

NOTE 1: PROVIDE "B" SERIES POWER PACKS AS REQUIRED IN EACH SPACE. PROVIDE 8'-0" OF EXCESS CONTROL WIRING, COILED AND TIED, BETWEEN CEILING MOUNTED OCCUPANCY SENSORS AND CORRESPONDING POWER PACKS AT EACH SENSOR LOCATION.

NOTE 2: LINE VOLTAGE LOCAL OVERRIDE SWITCH FOR MOTION SENSORS, REFER TO OCCUPANCY SENSOR WIRING DIAGRAM FOR CIRCUITING/LOCATION OF SWITCH. OVERRIDE SWITCH TO TURN OFF LIGHTS ONLY, NOT OCCUPANCY SENSOR.

NOTE 3: PASSIVE INFRARED-SINGLE RELAY WALL MOUNT-LINE VOLTAGE.

NOTE 4: LOCATE DEVICE ABOVE ACCESSIBLE CEILING, LOCATIONS SHOWN ON DRAWINGS ARE SCHEMATIC.



PLAN NOTES:

1. PROVIDE TVSS, TVSS SHALL BE ANSI/IEEE CATEGORY/C RATED, WITH MINIMUM SURGE OF 240 KA.
2. REFER TO ME SERIES SHEETS FOR ADDITIONAL ELECTRICAL INFORMATION FOR MECHANICAL/PLUMBING CIRCUITING INFORMATION.
3. PROVIDE UTILITY PAD AND PRIMARY CONDUIT PER UTILITY STANDARDS AS REQUIRED. REFER TO SITE PLAN FOR ADDITIONAL UTILITY INFORMATION. COORDINATE WITH UTILITY.
